Adjectives

HSK 4

Two ways to make a description stronger. 全 + noun covers the whole of something (全班, 全家, 全国), and adjective + 死了 is an everyday, exaggerated "extremely": 累死了, 热死了. Both are common in speech; 死了 is informal, so keep it out of essays.

At a glance

- **1.** 全 + Noun – the whole / all of: 全班都在照片里。
- **2.** Adj + 死了 – extremely …: 今天热死了!

1. 全 + Noun (the whole / all of)

Form: 全 + group noun + 都 + verb

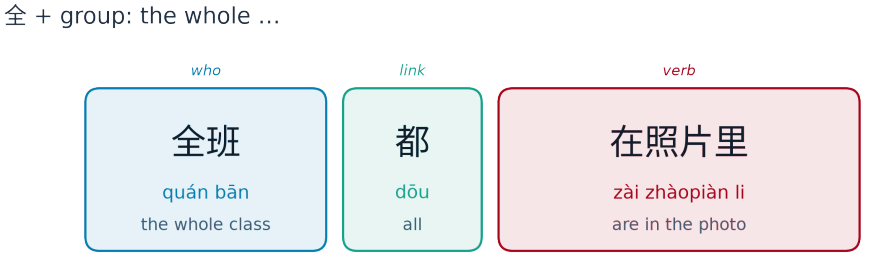
- **全班都在照片里。** *Quán bān dōu zài zhàopiàn li.* – The whole class is in the photo.
- **全家都来了。** *Quán jiā dōu lái le.* – The whole family came.
- **全班都通过了考试。** – The whole class passed the exam.
- **这家公司全年都招人。** – This company hires all year round.

How it works. 全 *quán* + noun gathers one bounded group, "the whole …": 全家, 全班, 全校, 全国, 全年, 全市. 都 before the verb usually follows to stress that every member is included; it is common, but not compulsory. On signs: 全场半价 (the whole store at half price), 全市有雨 (rain across the whole city).

全 + noun	每 / 所有 + noun
the whole of one group	every one, separately; all of them
全家都来了 (our family)	每个家庭都爱拍照 (every family)
全年都在工作 (the whole year through)	每年都来 (comes every year)

Watch out

- 全家都喜欢这个餐厅 is about *this* family. "All families" is 所有家庭.



2. Adj + 死了 (extremely ...)

Form: adjective / feeling verb + 死了 (casual)

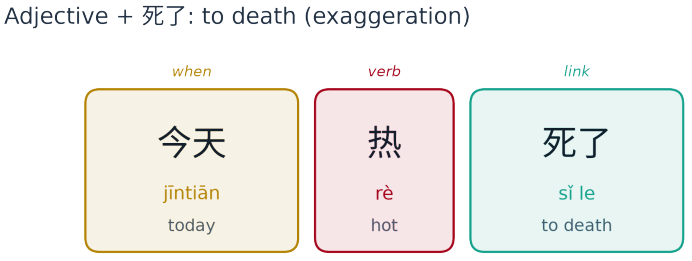
- **今天热死了！** *Jīntiān rè sǐ le!* – It's boiling today!
- **这个作业难死了。** *Zhège zuòyè nán sǐ le.* – This homework is impossibly hard.
- **听到这个消息，我高兴死了！** – I was over the moon when I heard!
- **想死你了！** – I miss you like crazy!

How it works. 死了 *sǐ le* after an adjective exaggerates a feeling to the extreme: 累死了, 饿死了, 忙死了. It ends the clause, and the adjective stands alone. It is casual speech, mostly for complaints, sometimes for strong joy.

极了	死了	得要命	非常 / 十分
enthusiastic, fits praise	casual, mostly complaints	casual	neutral, fits writing
好极了	累死了	累得要命	这个地区的冬天非常冷

Watch out

- No 很 in front: *wrong:* 很冷死了 → 冷死了.
- Not in essays or formal emails: write 非常累 instead.



Practice

Cover the teaching pages before you answer. The answers are at the end.

■ 1. 全 + Noun (the whole / all of)

1. The whole family came. …… 家都来了。

2. 全班都通过了考试 means…

- A. the class didn't pass
- B. the whole class passed

- C. only the class leader passed
- D. some students passed

3. Which word usually follows a 全 phrase before the verb?

- A. 也
- B. 就
- C. 才
- D. 都

4. True or false? 全场半价 on a shop sign means everything in the shop is half price. If false, correct it.

5. Say in Chinese: "It will rain across the whole city tomorrow."

6. The whole school took part in the sports day.

Put in order: 全校 / 参加了 / 都 / 运动会。

■ 2. Adj + 死了 (extremely ...)

7. Complain to a friend: "I'm exhausted!" 我累 ……!

8. Which sentence suits a formal report?

- A. 这个地区的冬天冷死。
- B. 这个地区的冬天很冷死了。
- C. 这个地区的冬天冷死了。
- D. 这个地区的冬天非常冷。

9. Build: "This homework is impossibly hard."

Put in order: 死了。/ 难 / 这个作业

10. True or false? 想死你了 means "I miss you terribly." If false, correct it.

11. You come into the classroom after cycling across town in 38 degrees. Use Adj + 死了. Write your answer in Chinese, then say it aloud.

Mixed practice

These questions mix the patterns and use new situations.

12. Which sentence is correct?

- A. 今天很热死了。
- B. 今天热死了。
- C. 今天死了热。

13. Say "The whole family went to the beach."

14. Find and fix the problem. A visitor complains about the heat: 天气很热死了. Correct the sentence and say when you would use it.

15. Use it yourself. Say that the whole class has arrived, and that you are extremely tired.

Answers and explanations

Mark your work, then correct each mistake in your own words.

■ 1. 全 + Noun (the whole / all of)

1. 全

全 + group noun.

2. B. the whole class passed

全 + group + 都: everyone in it.

3. D. 都

全 …… 都 stresses that no one is left out.

4. True.

全场 = the whole venue.

5. 明天全市有雨。

全 + 市.

6. 全校都参加了运动会。

全 + group + 都 + verb.

■ 2. Adj + 死了 (extremely …)

7. 死了

Adj + 死了 exaggerates the feeling.

8. D. 这个地区的冬天非常冷。

死了 is casual; a report uses 非常 or 十分.

9. 这个作业难死了。

Subject + Adj + 死了.

10. True.

With 想 (miss), 死 exaggerates the longing.

11. Model answer: 今天热死了!

Check your answer:

- Use it with friends and family; in an essay or a formal email, write 非常累 or 十分饿 instead.
- No 很 or 非常 in front, and nothing between the adjective and 死了: 累死了, not 很累死了.

■ Mixed practice

12. B. 死了 follows the adjective directly and already means “extremely”, so it does not take 很.

13. 全家都去海边了。全 + noun covers everyone, and 都 usually follows.

14. Say 天气热死了. 死了 already means “extremely”, so drop 很. It is casual and exaggerated: fine with friends, not in an essay.

15. Model answer. 全班都到了。我累死了。

Review later. Tomorrow, use 全 with two new nouns and make one complaint with 死了.

Adverbs

HSK 4

HSK 4 adverbs mostly show the speaker's attitude: surprise (竟然, 原来), pressure (只好, 不得不), advice (最好, 千万), doubt (恐怕, 看来) or how close something came (差点, 差不多). They go before the verb or adjective. The groups below put adverbs with similar jobs side by side, so learn the differences inside each group.

At a glance

- **27.** 先 … ，再 … – first …, then …: 你先填这张表，再去人事部，然后领电脑。
- **28.** 从来 + 不 / 没 – never: 爷爷从来不抽烟。
- **29.** 正好 – just right / exactly: 你来得正好，我正想给你打电话。
- **30.** 结果 – as a result / in the end: 我们准备了一上午，结果下雨了。
- **31.** 顺便 – while you're at it: 你去超市的时候，顺便帮我买一瓶牛奶吧。
- **32.** 忽然 vs 突然 – suddenly: 我们正在吃饭，灯忽然灭了。
- **33.** 重新 vs 再 – start over / once more: 这篇文章我要重新写。

Seeming and guessing

- **34.** 看来 – it seems / in one's view: 看来要下雨了，我们回去吧。
- **35.** 恐怕 – I'm afraid / probably: 恐怕来不及了。
- **36.** 大概 and 也许 – probably / maybe: 他大概已经到家了。
- **37.** 估计 – I reckon, to estimate: 我估计他今天不会来了。

1. 原来 (so it turns out / all along)

Form: 原来 + discovery (，难怪 …) · 原来的 + noun · subject + 原来 + past state

- **原来他牙疼，难怪不吃饭。** *Yuánlái tā yá téng, nánguài bù chī fàn.* – So he has toothache; no wonder he isn't eating.
- **我以为他是老师，原来他是学生。** – I thought he was a teacher, but it turns out he's a student.
- **原来是你！** – Oh, it's you!
- **他原来住在北京，后来搬到了上海。** – He originally lived in Beijing; later he moved to Shanghai.

How it works. 原来 *yuánlái* has two meanings.

At the start of a clause	Before a noun, or with a past state
a discovery: "so it turns out"	"original(ly)", before a change
原来下雪了，难怪这么冷	原来的计划是星期一出发

As a discovery it often pairs with 难怪 (no wonder) and follows 我以为 (I thought). 原来是这样！ means "So that's how it is!"

原来: so it turns out · 难怪: no wonder

2. 竟然 (actually / unexpectedly)

Form: subject + 竟然 / 居然 + verb

- **他竟然得了第一名！** *Tā jìngrán déle dì yī míng!* – He actually won first place!
- **这么简单的题，我竟然做错了。** – I actually got such an easy question wrong.
- **她竟然没来！** – She actually didn't come!
- **六岁的孩子竟然会说三种语言。** – A six-year-old who can speak three languages!

How it works. 竟然 *jìngrán* marks a surprise: the event goes against what the speaker expected, good or bad. It sits after the subject, before the verb. 居然 means the same and is common in speech.

竟然 / 居然	果然
against expectation	just as expected
他竟然没来	天气预报说下雨，果然下雨了

Watch out

- Only for surprises; a plain fact needs no 竟然.
- *wrong:* 竟然他来了 → 他竟然来了.

竟然: surprisingly

3. 难道 (rhetorical: don't tell me ...?)

Form: 难道 + statement + 吗? · subject + 难道 + … + 吗?

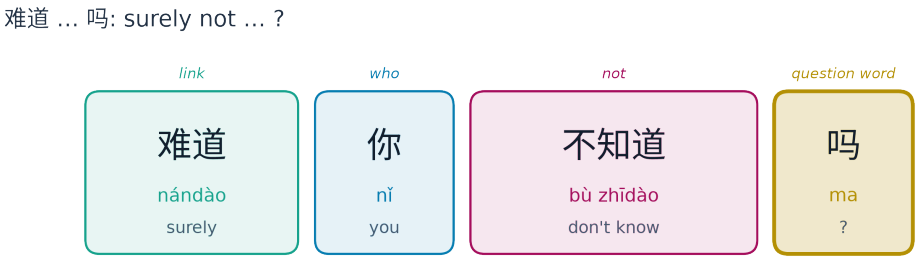
- **难道你不知道吗?** *Nándào nǐ bù zhīdào ma?* – Don't tell me you don't know?
- **难道他真的忘了吗?** – Can he really have forgotten?
- **难道你不饿吗?** – Surely you're hungry?
- **这么重要的事，难道你不应该先问我吗?** – Shouldn't you have asked me first about something so important?

How it works. 难道 *nándào* makes a rhetorical question: the speaker already believes the answer is the opposite of what the words say. A negative 难道 question means "surely yes": 难道你不累吗? = "You must be tired." It shows surprise or reproach. 难道 goes at the start or after the subject.

你知道吗?	难道你不知道吗?
a real question	"You must know!" (surprise, annoyance)

Watch out

- 难道 never asks for information you don't have.



4. 到底 (on earth / after all)

Form: subject + 到底 + question word / A-not-A · 到底 in statements (after all)

- **你到底来不来?** *Nǐ dàodǐ lái bu lái?* – Are you coming or not?
- **这到底是怎么回事?** *Zhè dàodǐ shì zěnme huí shì?* – What on earth is going on?
- **他到底是个孩子，别太生气。** – He is just a child, after all; don't be too angry.
- **我们等了很久，他到底还是来了。** – We waited a long time, and in the end he did come.

How it works. In a question, 到底 *dàodǐ* adds impatience or insistence: "on earth, exactly". It goes after the subject, before the question part, and needs a question word or an A-not-A form. In a statement it means "after all" or "in the end".

Watch out

- No 吗 with 到底: *wrong:* 你到底去吗? → 你到底去不去?

到底 in a question: so which is it?

5. 究竟 (exactly / on earth)

Form: topic + 究竟 + question word / A-not-A

- **那究竟是什么?** *Nà jiūjìng shì shénme?* – What exactly was it?
- **事故的原因究竟是什么?** *Shìgù de yuányīn jiūjìng shì shénme?* – What exactly caused the accident?
- **我们究竟应该怎么做?** – What exactly should we do?

How it works. 究竟 *jiūjìng* works like 到底 in questions, but sounds more serious and suits reports and discussions. It goes after the topic and before the question part, and needs a question word or A-not-A.

到底	究竟
spoken, often impatient	more formal, calmer
also in statements: 他到底还是来了	rarely in statements

Watch out

- No 吗: *wrong:* 你究竟同意吗? → 你究竟同意不同意?

究竟: what on earth (formal 到底)

6. 可 + Adj (emphatic)

Form: 可 + adjective + 了 / 呢 · 可 + 别 / 要 + verb

- **哈尔滨的冬天可冷了！** *Hā'ěrbīn de dōngtiān kě lěng le!* – Harbin winters are really cold!
- **这个电影可有意思了。** – This film is really interesting.
- **你可别忘了！** *Nǐ kě bié wàng le!* – Don't you forget!
- **你可要小心！** – Do be careful!

How it works. 可 *kě* before an adjective adds spoken emphasis: "really, so". It often tells someone something they may not know or believe, and it needs 了 or 呢 at the end. Before 别 or 要, it makes a warning or reminder more urgent.

At the start of a clause, 可 is short for 可是 "but": 我想去，可没时间.

Watch out

- *wrong:* 可冷 alone → 可冷了.
- In writing, use 非常 or 十分 instead.

7. 又 + 不 / 没 (emphatic negation)

Form: subject + 又 + 不 / 没 + verb (protest)

- **我又不是你的服务员！** *Wǒ yòu bú shì nǐ de fúwùyuán!* – I'm not your waiter, you know!
- **你别怪他，他又没做错。** *Nǐ bié guài tā, tā yòu méi zuòcuò.* – Don't blame him; it's not as if he did anything wrong.
- **怕什么？他又不会吃了你。** – What are you afraid of? He's not going to eat you.
- **我又不是不想去。** – It's not that I don't want to go.

How it works. Here 又 does not mean "again". Before 不 or 没 it strengthens the denial to reject what someone assumes: "it's not as if …". It is spoken and often impatient or defensive, and usually explains a reaction (别怪他, 怕什么).

又不 / 又没	并不 / 并没
personal, emotional, spoken	calm, more written
我又不是小孩子!	这个问题并不难。

Watch out

- In a neutral statement, plain 不 / 没 is enough: 他没做错.

8. 差不多 (almost / about the same)

Form: A 跟 / 和 B 差不多 (+ adjective) · 差不多 + number / time / 都

- **这两个手机差不多。** *Zhè liǎng ge shǒujī chàbuduō.* – These two phones are about the same.
- **我跟我哥哥差不多高。** *Wǒ gēn wǒ gēge chàbuduō gāo.* – I'm about as tall as my brother.
- **差不多十点了。** – It's almost ten.
- **同学们差不多都来了。** – Almost all the classmates have come.

How it works. 差不多 *chàbuduō* has two jobs, told apart by position.

After the things compared	Before a number, time or 都
"about the same, similar"	"almost, about"
价格差不多	差不多五十个人

After a verb + 得 it can mean "nearly done": 作业写得差不多了. 差不多就行了 means "that's good enough".

差不多	差点儿
about, almost (an amount)	nearly happened, but didn't
差不多十点了	我差点儿迟到

差不多: about the same

9. 差点 (almost / nearly)

Form: subject + 差点儿 (+ 没) + verb (+ 了)

- **我差点儿摔倒。** *Wǒ chàdiǎnr shuāidǎo.* – I nearly fell.
- **我差点儿忘了你的生日！** *Wǒ chàdiǎnr wàngle nǐ de shēngrì!* – I nearly forgot your birthday!
- **我差点儿没赶上火车。** – I nearly missed the train (but caught it).
- **他差点儿没考上大学。** – He nearly failed to get into university (but got in).

How it works. 差点儿 *chàdiǎnr* + verb: something almost happened, but did not. It goes after the subject, before the verb. The tricky part is adding 没.

Result	差点儿 + verb	差点儿没 + verb
unwanted (fall, crash)	nearly happened	the same: nearly happened
wanted (pass, catch)	nearly happened, but didn't: 差点儿考上 = just failed	it did happen, only just: 差点儿没考上 = only just passed

Watch out

- 差点儿 (nearly happened) is not 差不多 (about, in amount): 差不多十点了.

差点儿: nearly (but didn't)

10. 够 (enough / sufficient)

Form: noun + (不) 够 · 够 + verb (enough to) · 够 + adjective

- **菜不够了，我再做两个吧。** *Cài bú gòu le, wǒ zài zuò liǎng ge ba.* – There isn't enough food; I'll make two more dishes.
- **钱够不够?** *Qián gòu bu gòu?* – Is there enough money?
- **钱够买一张票。** – The money is enough to buy one ticket.
- **这些水不够喝。** – This water isn't enough to drink.

How it works. 够 *gòu* "enough" follows the thing that is enough: 钱够了, 时间不够, 我们人够了. To say what it is enough *for*, put the verb after 够: 够吃, 够用, 够买一张票. 够 + adjective means "… enough": 这个房间够大. 足够 is more formal: 我们有足够的时间.

Watch out

- 够吃 (enough to eat) is not 吃够 (have had your fill of something).

11. 甚至 (even / to the point that)

Form: …, 甚至 + strongest point · 甚至 + 连 … 都 / 也

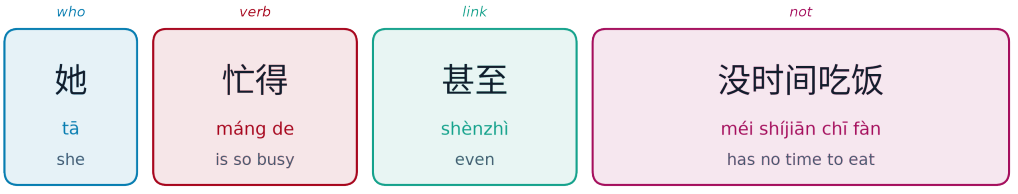
- **她忙得甚至没时间吃饭。** *Tā máng de shènzhì méi shíjiān chī fàn.* – She's so busy she doesn't even have time to eat.
- **这首歌大人喜欢，孩子喜欢，甚至老人也喜欢。** – Adults like this song, children like it, even old people like it.
- **他甚至连自己的名字都写错了。** – He even wrote his own name wrong.
- **他不说话，甚至不看我。** – He won't speak; he won't even look at me.

How it works. 甚至 *shènzhì* "even" introduces the most extreme or surprising point. It goes before the part it highlights, usually last in a list. It is more formal than 连 …… 都 alone, and the two often appear together. Unlike 连 …… 都, it can also join whole clauses to raise the stakes.

Watch out

- The 甚至 item must be the strongest one: in 夏天热，春天也热，甚至冬天也不冷, it comes before the most surprising part.

甚至: even



12. 就 (only / just – small quantity)

Form: 就 + amount / person (only)

- **我就有十块钱。** *Wǒ jiù yǒu shí kuài qián.* – I've only got ten yuan.
- **就两个人来了。** *Jiù liǎng ge rén lái le.* – Only two people came.
- **我就去过一次。** – I've only been once.
- **就这么多了?** – Is that all?

How it works. Before an amount or a person, 就 means "only, just". It is casual and matter-of-fact, and is stressed in speech. Between a time and a verb, 就 has its other meaning, "as early as": 他六点就起床了.

只	就	才
neutral "only"	casual "only"	"only", with surprise
我只有十块钱	我就有十块钱	他才十岁!

就 + amount: only

13. 也都 (also all of them)

Form: subject + 也 + 都 + verb / 不 / 没

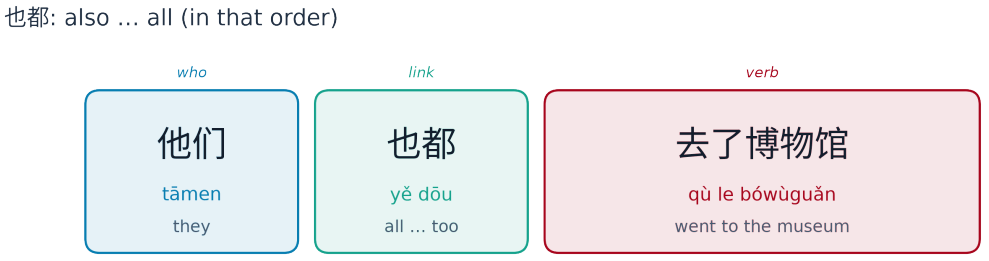
- **他们也都去了博物馆。** *Tāmen yě dōu qùle bówùguǎn.* – They all went to the museum too.
- **我的朋友喜欢这首歌，我的父母也都喜欢。** – My friends like this song, and my parents both like it too.
- **他们也都不知道。** – None of them knows either.

How it works. 也 adds this group to another; 都 says every member of the group is included. Together they come after the subject, in a fixed order: 也 first, then 都.

我们都去	我们也去	我们也都去
all of us are going	we are going too	we are all going too

Watch out

- *wrong:* 都也 → 也都.



14. 尤其 (especially)

Form: general fact, 尤其是 + noun · subject + 尤其 + verb / adjective

- **我喜欢水果，尤其是西瓜。** *Wǒ xǐhuan shuǐguǒ, yóuqí shì xīguā.* – I like fruit, especially watermelon.
- **他喜欢运动，尤其是踢足球。** – He likes sport, especially football.
- **这里冬天很冷，晚上尤其冷。** – Winters here are cold, and the nights are especially cold.

How it works. First say something about a whole group; then 尤其 picks out the one case that fits it most. 尤其是 comes before a noun; 尤其 alone goes before a verb or adjective, after the subject.

特别好	我特别喜欢秋天	我尤其喜欢秋天
really good (very)	I especially like autumn	I especially like autumn

Watch out

- *wrong:* 尤其是饺子，我喜欢中国菜 → 我喜欢中国菜，尤其是饺子 (the group comes first).
- For plain "very" with no group, use 很 or 特别, not 尤其.

15. 稍微 (slightly / a little)

Form: 稍微 + adjective + 一点儿 / 一些 · 稍微 + verb + 一下 / 一点儿

- **今天比昨天稍微暖和一点儿。** *Jīntiān bǐ zuótiān shāowēi nuǎnhuo yìdiǎnr.* – Today is a little warmer than yesterday.
- **请稍微等一下。** – Please wait a moment.
- **你能稍微说慢一点儿吗?** – Could you speak a little more slowly?

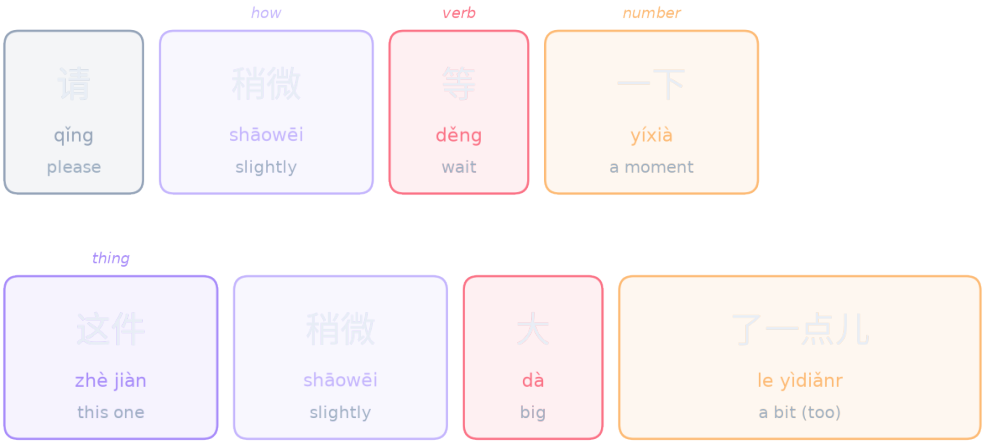
How it works. 稍微 makes a difference or an action small. It goes before the adjective or verb, and a small amount (一点儿, 一些, 一下) goes after it. With a verb, it makes a request sound polite.

有点儿贵	稍微贵一点儿	稍微等一下
a bit (too) expensive – a complaint	a little more expensive – a comparison	wait a moment – a polite request

Watch out

- *wrong:* 稍微贵 → 稍微贵一点儿.
- *wrong:* 等稍微一下 → 稍微等一下.
- 稍微有点儿 + adjective is also fine: 稍微有点儿贵 is a very soft complaint.

稍微 … 一点儿 / 一下: just a little



16. 几乎 (almost / hardly)

Form: 几乎 + 都 / 每 / 所有 … · 几乎 + 不 / 没 + verb

- **几乎每个人都知道这件事。** *Jīhū měi ge rén dōu zhīdào zhè jiàn shì.* – Almost everyone knows about it.
- **他几乎每天都跑步。** – He runs almost every day.
- **他昨天几乎没睡觉。** – He hardly slept last night.

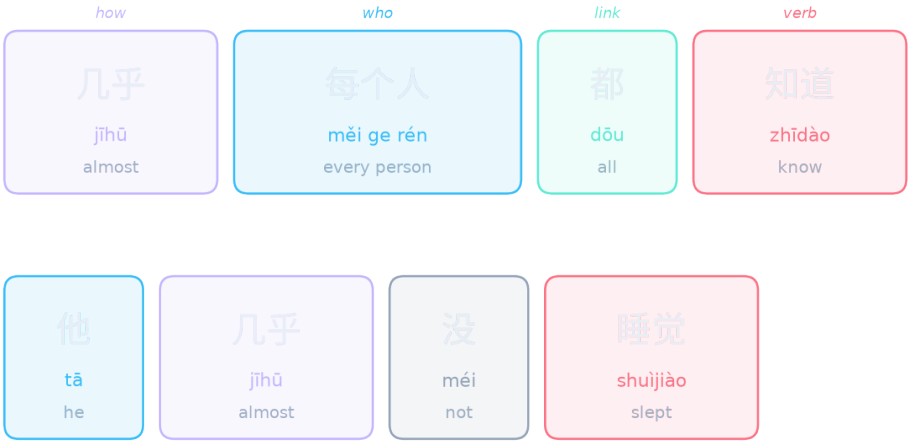
How it works. 几乎 says something is very close to the whole amount. With 都, 每 or 所有 it means "almost all"; with 不 or 没 it means "hardly, almost never". It goes after the subject, before the verb.

几乎每天	差点儿迟到	差不多
almost every day (how much)	nearly late (a close call)	about the same; can stand alone

Watch out

- For a close call, 差点儿 is the most common word (几乎摔倒 "nearly fell" is also possible).
- *wrong:* 这两个几乎 → 这两个差不多 (几乎 cannot stand alone).

几乎: very close to all (or none)



17. 偶尔 (once in a while)

Form: subject + 偶尔 + verb

- **我偶尔去电影院。** *Wǒ ǒu'ěr qù diànyǐngyuàn.* – I go to the cinema once in a while.
- **他不常喝酒，偶尔喝一点儿。** – He doesn't drink often, just a little now and then.
- **周末我偶尔去爬山。** – At weekends I go hiking now and then.

How it works. 偶尔 says something happens, but rarely. Like the other "how often" words, it comes after the subject and before the verb.

总是	经常	有时候	偶尔	从来不
always	often	sometimes	once in a while	never

Watch out

- *wrong:* 我打篮球偶尔 → 我偶尔打篮球.
- One single time is 一次, not 偶尔: 去年我去过一次上海.

偶尔 + verb: once in a while

18. 至少 and 最多 (at least / at most)

Form: 至少 / 最多 + verb or number · 至少 + sentence

- **做这个菜至少要一个小时。** *Zuò zhège cài zhìshǎo yào yí ge xiǎoshí.* – This dish takes at least an hour to cook.
- **我最多等你十分钟。** – I'll wait ten minutes for you, at most.
- **虽然输了，但至少我们努力了。** – We lost, but at least we tried our best.

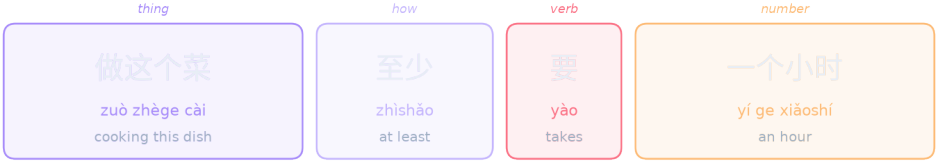
How it works. 至少 sets a lower limit and 最多 an upper limit; both go before the verb or number. 至少 + a sentence gives the smallest thing that should happen, or the one good point.

至少一个小时	最多十分钟	一百人以上
at least an hour	ten minutes at most	over a hundred people

Watch out

- *wrong:* 至少一百人以上 → 至少一百人.

至少 + amount: at least



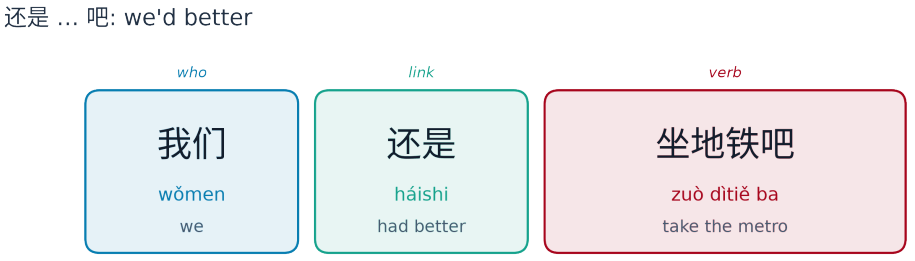
19. 还是 + Verb (had better)

Form: (subject +) 还是 + verb (+ 吧) · 还是 + 不 + verb + 了

- **我们还是坐地铁吧。** *Wǒmen háishi zuò dìtiě ba.* – We'd better take the subway.
- **下雨了，我们还是在家吧。** – It's raining; we'd better stay home.
- **想了想，我还是不去了。** *Xiǎngle xiǎng, wǒ háishi bú qù le.* – I thought it over, and I'm not going after all.

How it works. Before a verb in a statement, 还是 *háishi* means "had better": a decision reached after weighing the options. 吧 makes it a gentle suggestion. 还是不 …… 了 reverses a plan.

还是 + verb	A 还是 B?	最好 + verb
had better, after weighing options	"or" in a question	direct advice
我们还是打车吧	你去还是我去?	你最好早点儿去



20. 最好 (had best / it's best to)

Form: subject + 最好 + verb · 最好别 / 最好不要 + verb

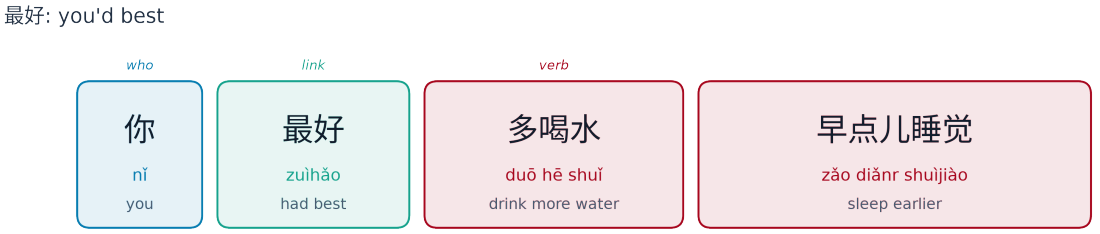
- **你最好多喝水，早点儿睡觉。** *Nǐ zuìhǎo duō hē shuǐ, zǎodiǎnr shuìjiào.* – You'd best drink plenty of water and go to bed early.
- **最好提前订票，不然买不到。** – It's best to book in advance, or you won't get a ticket.
- **你今晚最好别开车。** – You'd better not drive tonight.

How it works. 最好 *zuìhǎo* + verb gives friendly but clear advice: "it's best to, you'd better". It goes after the subject. 最好的 + noun is a different use: "the best" (他是我最好的朋友).

应该	最好
what is right or expected	the wisest option
你应该道歉	你最好先道歉

Watch out

- "Better not" is *wrong:* 不最好去 → 最好别去.



21. 千万 (be sure to / whatever you do)

Form: (subject +) 千万 + 别 / 不要 / 要 + verb

- **你千万别忘了带护照！** *Nǐ qiānwàn bié wàngle dài hùzhào!* – Whatever you do, don't forget your passport!
- **这件事千万不要告诉别人。** – Whatever you do, don't tell anyone about this.
- **你千万要注意身体。** – Do take care of yourself.

How it works. 千万 *qiānwàn* makes advice or a warning urgent: "whatever you do, (don't) …". It goes before 别 / 不要 / 要, after the subject. It is mostly used to warn against something going wrong.

一定要	千万别 / 千万要
must, definitely	urgent warning or reminder
你一定要来	你千万别迟到

Watch out

- Only in advice or requests, never to describe facts: *wrong:* 他千万没来.

22. 只好 (have no choice but to)

Form: obstacle, subject + 只好 + verb

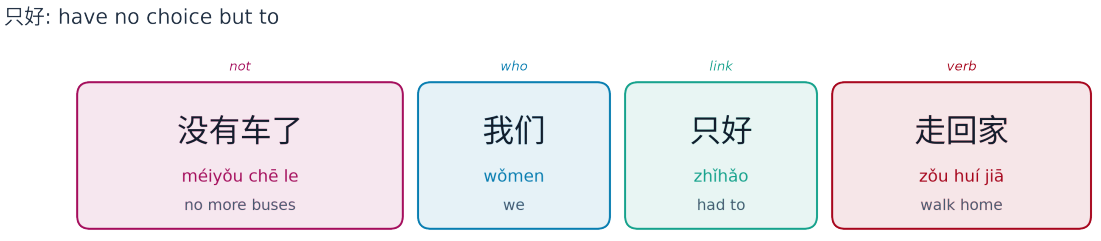
- **没有车了，我们只好走回家。** *Méiyǒu chē le, wǒmen zhǐhǎo zǒu huí jiā.* – There's no transport left, so we have no choice but to walk home.
- **电梯坏了，我们只好走楼梯。** – The lift is broken, so we have to take the stairs.
- **商店关门了，我只好明天再来。** – The shop was closed, so I'll have to come back tomorrow.

How it works. 只好 *zhǐhǎo* means "have no choice but to": after an obstacle, this action is the only option left. Give the reason first; 只好 goes after the subject of the result. It sounds resigned: "Oh well, I'll just have to …".

只好	不得不
resigned, second-best choice	stronger, forced by duty or pressure
他不会做饭，只好吃方便面	他病了，我不得不替他上课

Watch out

- 只好 with no reason sounds incomplete. Say what blocked you first.
- *wrong:* 只好我走路 → 我只好走路.



23. 不得不 (have no choice but to)

Form: subject + 不得不 + verb

- **他发烧了，不得不请假。** *Tā fāshāo le, bùdébù qǐngjià.* – He has a fever, so he has no choice but to take time off.
- **因为没钱，他不得不卖掉了车。** – Because he had no money, he had to sell his car.
- **飞机晚点了，我们不得不在机场住一晚。** – The flight was delayed, so we had to spend a night at the airport.
- **我不得不走了。** – I have to leave now.

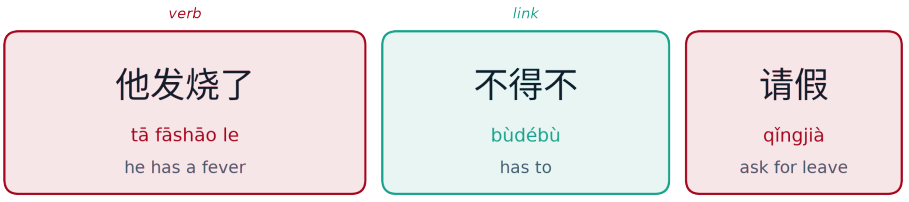
How it works. 不得不 *bùdébù* is a double negative, "cannot not": the situation forces the action. It goes after the subject.

只好	不得不	必须
resigned, casual	forced by the situation	a requirement
没车了，只好走回去	我们不得不改计划	你必须带护照

Watch out

- 不得不 means “must”, never “mustn’t”. “Mustn’t” is 不能 or 不可以: 这里不能停车.

不得不: have to (no way round it)



24. 尽量 (as much as possible)

Form: subject + 尽量 + verb · 尽量不 / 尽量别 + verb

- **我尽量早点儿回来。** *Wǒ jǐnliàng zǎo diǎnr huílai.* – I’ll try my best to come back early.
- **请尽量说汉语。** – Please speak Chinese as much as possible.
- **晚上尽量别玩手机。** – Try not to use your phone at night.

How it works. 尽量 means “as much as possible” and goes before the verb. It is about trying, so it suits promises, plans and advice.

尽量多吃蔬菜	尽量别熬夜	我已经尽力了
eat as many vegetables as you can	try not to stay up late	I’ve done my best (尽力)

Watch out

- “I’ve done my best” is usually 我已经尽力了.
- 尽量 comes before the verb.

25. 刚 + Verb (just did)

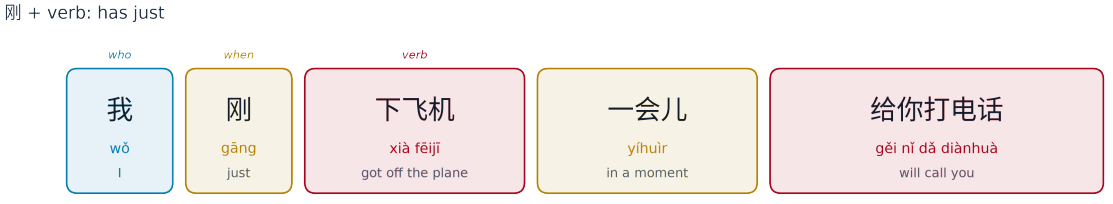
Form: subject + 刚 + verb (+ duration) · 刚 ……, 就 ……

- **我刚下飞机，一会儿给你打电话。** *Wǒ gāng xià fēijī, yíhuìr gěi nǐ dǎ diànhuà.* – I've just got off the plane; I'll call you in a bit.
- **他刚走。** *Tā gāng zǒu.* – He has just left.
- **他刚来北京两个月。** – He's only been in Beijing for two months.
- **我刚到家，就下雨了。** – I'd only just got home when it started to rain.

How it works. 刚 *gāng* + verb means something happened a short time ago. It sits right before the verb, and the sentence usually needs no 了. "Recent" is the speaker's view: two months is 刚 for a newcomer. 刚 …… 就 …… says the second event followed immediately.

Watch out

- 刚 never starts the sentence: *wrong:* 刚我到 → 我刚到 (刚才 can start one).



26. 本来 (originally / at first)

Form: subject + 本来 + plan / situation, 后来 / 可是 + change · 本来就 (naturally)

- **我本来想去云南，后来去了海南。** *Wǒ běnlái xiǎng qù Yúnnán, hòulái qùle Hǎinán.* – I originally wanted to go to Yunnan, but in the end I went to Hainan.

- **我本来不想来，可是朋友一定要我来。** – I didn't really want to come, but my friend insisted.
- **我本来打算星期一走。** – I originally planned to leave on Monday.
- **学生本来就应该学习。** – Students are, of course, supposed to study.

How it works. 本来 *běnlái* gives the original plan or situation before something changed. It goes after the subject or at the start, often followed by 后来, 可是 or 但是. 本来就 has no change of plan: it says something was always, obviously true.

本来	原来
originally	originally; also a discovery
本来的计划	原来是你!

Watch out

- Only 原来 announces a discovery: *wrong:* 本来是你! → 原来是你!

27. 先 … ，再 … (first …, then …)

Form: 先 A，再 B (，然后 C，最后 D) · 等 … 再 … · 先 … 再说

- **你先填这张表，再去人事部，然后领电脑。** *Nǐ xiān tián zhè zhāng biǎo, zài qù rénshìbù, ránhòu lǐng diànnǎo.* – First fill in this form, then go to HR, and after that collect your computer.
- **等雨停了再走。** *Děng yǔ tíngle zài zǒu.* – Wait until the rain stops before you leave.
- **先吃饭，别的事以后再说。** – Let's eat first; we can talk about the rest later.

How it works. 先 …… 再 …… orders steps still to come: plans, instructions and suggestions. Add 然后 and 最后 for longer sequences. Both 先 and 再 come after the subject, before their own verbs: 我先走，你再走.

- **等 …… 再 ……** "wait until … then": 再 means "only then".
- **…… 再说** puts a matter off until later.

Watch out

- Not for the past. Yesterday's steps take 先 …… 然后 …… with 了: 我先去了银行，然后去了超市.

28. 从来 + 不 / 没 (never)

Form: subject + 从来不 + verb (habit) · subject + 从来没 (有) + verb + 过 (experience)

- **爷爷从来不抽烟。** *Yéye cónglái bù chōuyān.* – Grandpa has never smoked.
- **她从来不吃肉。** *Tā cónglái bù chī ròu.* – She never eats meat.
- **我从来没去过西藏。** *Wǒ cónglái méi qùguo Xīzàng.* – I've never been to Tibet.
- **他从来不着急。** – He's never in a hurry.

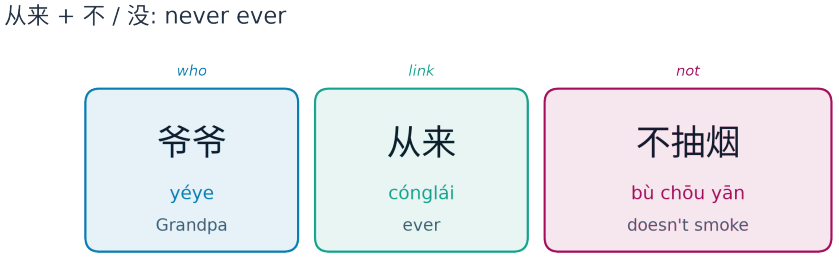
How it works. 从来 *cónglái* goes after the subject and strengthens a negative to "never (ever)".

从来不 + verb	从来没 + verb + 过
a habit, rule or choice	an experience that has never happened
他从来不喝酒	我从来没吃过榴莲

过 highlights experience in this model; it is not required after every 从来没.

Watch out

- 从来 is not the usual word for "always". In a positive sentence, 从来都 stresses "without exception" (他从来都是这样); a plain "always" is 一直 or 总是.



29. 正好 (just right / exactly)

Form: 正好 (just right) · verb + 得 + 正好 · 正好 + verb (happen to) · 正好 + number (exactly)

- **你来得正好，我正想给你打电话。** *Nǐ lái de zhènghǎo, wǒ zhèng xiǎng gěi nǐ dǎ diànhuà.* – You've come at just the right moment; I was about to call you.
- **大小正好。** – The size is just right.
- **我正好也要去超市，一起走吧。** – I happen to be going to the supermarket too; let's go together.
- **一共正好五十块。** – That's exactly fifty yuan altogether.

How it works. 正好 *zhènghǎo* means "just right" or "exactly". Before a verb it points to a lucky coincidence: "happen to". At the start of a sentence it stresses the lucky timing: 正好，他也在那儿. 刚好 means almost the same.

正好	正在	左右 / 差不多
just right, exactly, happen to	in the middle of doing	about
正好一百块	我正在吃饭	一百块左右

Watch out

- "I'm eating" is 我正在吃饭, not *wrong:* 我正好吃饭.

30. 结果 (as a result / in the end)

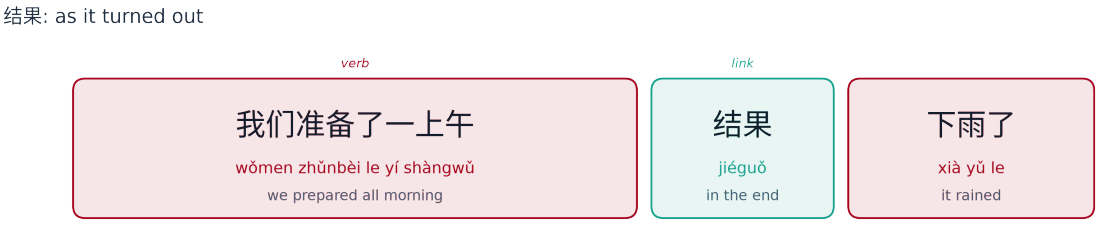
Form: what happened before, 结果 + what finally happened

- **我们准备了一上午，结果下雨了。** *Wǒmen zhǔnbèile yí shàngwǔ, jiéguǒ xià yǔ le.* – We spent the whole morning preparing, and in the end it rained.
- **他睡得很晚，结果今天迟到了。** – He went to bed late, and as a result he was late today.
- **我试了一下，结果真的成功了。** – I gave it a try, and it actually worked.
- **考试的结果出来了。** – The exam results are out.

How it works. 结果 *jiéguǒ* introduces what actually happened in the end, often a surprise or a disappointment, sometimes good news. It starts the second clause. As a noun it means "result, outcome": 比赛的结果是二比一; 结果怎么样?

Watch out

- 结果 reports a real outcome, not a plan: *wrong:* 如果下雨，结果我们不去 → 如果下雨，我们就不去.
- In most speech it starts the clause: ……，结果他迟到了.



31. 顺便 (while you're at it)

Form: main action，顺便 + small extra action ．顺便问一下，…

- **你去超市的时候，顺便帮我买一瓶牛奶吧。** *Nǐ qù chāoshì de shíhou, shùnbiàn bāng wǒ mǎi yì píng niúnǎi ba.* – When you go to the supermarket, could you pick up a bottle of milk for me while you're there?
- **我下班回家，顺便去了一趟银行。** – On my way home from work, I stopped at the bank.
- **顺便问一下，你明天有空吗?** – By the way, are you free tomorrow?

How it works. 顺便 adds a small extra job to something you are doing anyway. It goes before the extra action. 顺便问一下 means "by the way".

顺便	另外
while you're at it (tied to a main action)	also, in addition (a separate point)

Watch out

- There must be a main action for 顺便 to attach to.
- *wrong:* 帮我买顺便 → 顺便帮我买.

32. 忽然 vs 突然 (suddenly)

Form: 忽然 / 突然 + verb · 突然 (adjective): 太突然了, 突然的变化

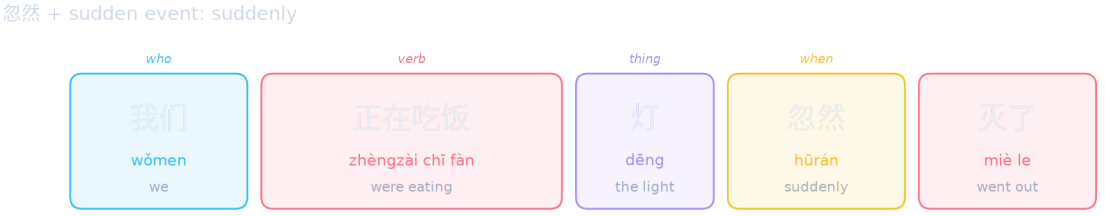
- **我们正在吃饭，灯忽然灭了。** *Wǒmen zhèngzài chī fàn, dēng hūrán miè le.* – We were having dinner when suddenly the lights went out.
- **忽然，外面下起了大雨。** – Suddenly it started pouring outside.
- **这个消息太突然了。** – This news is so sudden.

How it works. As adverbs, 忽然 and 突然 both mean "suddenly" and usually swap. Only 突然 is also an adjective, so only 突然 takes 很 / 太; before a noun with 的, the usual word is 突然.

灯忽然灭了	太突然了	突然的变化
the light suddenly went out	so sudden	a sudden change

Watch out

- *wrong:* 太忽然了 → 太突然了.



33. 重新 vs 再 (start over / once more)

Form: 重新 + verb (start over) · 再 + verb (once more)

- **请再说一遍。** – Please say it once more.
- **请重新再做一遍。** – Please do it all over again.

How it works. 重新 means you start over, often because the first try was wrong or needs a new way. 再 means once more, for something not yet done. 又 is for a repeat that already happened.

重新开始	明天再来	他又迟到了
start again	come again tomorrow	he was late again

Watch out

- *wrong:* 明天重新来 → 明天再来. *wrong:* 他重新迟到了 → 他又迟到了.

重新 + verb: do it again from the start

34. 看来 (it seems / in one's view)

Form: evidence, 看来 + conclusion · 在 + person + 看来, opinion

- **看来要下雨了，我们回去吧。** *Kànlái yào xià yǔ le, wǒmen huíqu ba.* – It looks like it's going to rain; let's head back.
- **他到现在还没回消息，看来是很忙。** – He still hasn't replied; he must be busy.
- **在我看来，这个办法不太好。** *Zài wǒ kànlái, zhège bànfǎ bú tài hǎo.* – In my view, this approach isn't very good.

How it works. 看来 *kànlái* draws a conclusion from what you have noticed: "it seems, it looks as if". The evidence often comes first; 看来 then starts the conclusion. 在 …… 看来 gives someone's opinion instead.

看来	看起来
a conclusion from evidence	how something looks
看来这儿的菜不太好吃	她看起来很年轻

Watch out

- 看来 goes before the conclusion: *wrong:* 他病了看来 → 看来他病了.

看来: it seems (from what you see)

35. 恐怕 (I'm afraid / probably)

Form: 恐怕 + unwelcome guess · subject + 恐怕 + guess

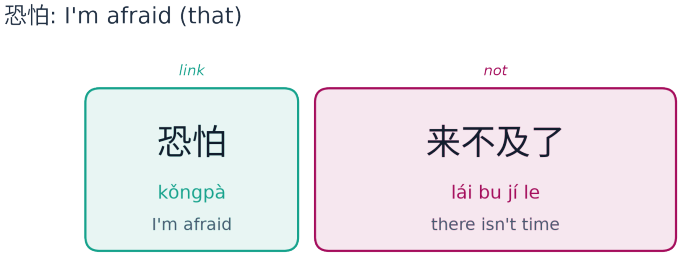
- **恐怕来不及了。** *Kǒngpà láibují le.* – I'm afraid we won't make it.
- **恐怕票已经卖完了。** – I'm afraid the tickets are sold out.
- **这件事恐怕有点儿难。** – I'm afraid this may be a bit difficult.
- **明天恐怕要下雨。** – It'll probably rain tomorrow, I'm afraid.

How it works. 恐怕 *kǒngpà* introduces a cautious guess, usually about unwelcome news, and softens it. It can start the sentence or follow the subject.

可能	恐怕	怕
neutral maybe	probably, with regret	be scared of
他可能在家	他恐怕来不了了	妹妹怕黑

Watch out

- "Scared of dogs" is 我怕狗, not *wrong:* 我恐怕狗.



36. 大概 and 也许 (probably / maybe)

Form: 大概 / 也许 + verb · 大概 + number

- **他大概已经到家了。** *Tā dàgài yǐjīng dào jiā le.* – He's probably home by now.
- **也许他忘了。** – Maybe he forgot.
- **大概有三十个人。** – There were about thirty people.

How it works. 大概 = probably (fairly sure); before a number it means "roughly". 也许 = maybe (less sure). Neither takes 很 or 不: for that, use 可能 (很可能, 不可能).

大概到家了	也许忘了	大概三十个人	很可能
probably home	maybe forgot	about thirty people	very likely

Watch out

- *wrong:* 很大概 → 很可能. In writing and exams, *wrong:* 大概三十个人左右 → 大概三十个人.

- **他估计已经睡了。** – He's probably asleep already.
- **我估计有两百多人。** – I reckon there are over two hundred people.

How it works. 估计 makes a guess based on facts, or gives a rough number. 大概 = probably; 也许 = maybe (less sure); 看来 = it seems (from what you see or know now).

我估计他会来	估计要一个小时	看来要下雨了
I reckon he'll come	probably takes an hour	looks like rain

Watch out

Adverbs with adjectives

HSK 4

挺 + adjective + 的 is the everyday way to say "quite" or "pretty": 挺好的, 挺忙的. It is friendlier and lighter than 很 or 非常, and the 的 at the end is common in speech. For a negative, put 不 after 挺: 挺不容易的.

At a glance

- **1.** 挺 + Adj + 的 – quite / rather: 挺好的，就是离公司有点儿远。
- **2.** 极其 vs 非常, 十分 and 特别 – extremely: 安全问题极其重要。

1. 挺 + Adj + 的 (quite / rather)

Form: 挺 + adjective / feeling verb + (的)

- **挺好的，就是离公司有点儿远。** *Tǐng hǎo de, jiùshì lí gōngsī yǒudiǎnr yuǎn.* – It's pretty nice; it's just a bit far from the office.
- **这儿的菜挺好吃的。** *Zhèr de cài tǐng hǎochī de.* – The food here is pretty good.
- **我挺喜欢这个城市的。** *Wǒ tǐng xǐhuan zhège chéngshì de.* – I quite like this city.
- **他挺会说话的。** *Tā tǐng huì shuōhuà de.* – He's pretty good with words.
- **今天挺冷的，多穿点儿。** *Jīntiān tǐng lěng de, duō chuān diǎnr.* – It's quite cold today; wear a bit more.
- **这个电影挺不错的，你可以去看看。** *Zhège diànyǐng tǐng búcuò de, nǐ kěyǐ qù kànkan.* – This film is pretty good; you could go and see it.

How it works. 挺 *tǐng* means "quite, pretty" in everyday speech. It sits where 很 sits, right before the adjective, and 的 at the end of the clause makes it sound relaxed and friendly. Feeling verbs and skill phrases take it too: 挺喜欢, 挺想去, 挺会做饭.

挺 is softer than 太 …… 了 and warmer than plain 很. That makes it the natural word for a fair, mild opinion, and 挺 …… 的，就是 …… is how people give a compliment with a small "but": the first half is positive, the 就是 half names one small problem.

很好	挺好的	太好了!
neutral; the default "good"	friendly, casual: "pretty good"	strong; excited, or "too" with a problem
这个办法很好。	这个办法挺好的。	你来了，太好了!

Watch out

- "Not very" is 不太 or 不怎么: *wrong:* 不挺好 → 不太好. You can put 不 *after* 挺: 挺不错 (quite good), 挺不方便的 (quite inconvenient).

Conjunctions

HSK 4

HSK 4 conjunctions link whole sentences. Three of them contrast (但是/可是, 不过, 而), four add more information (还有, 另外, 并且, 再说), one shows what happened next (于是), and 用/通过 …… 来 …… says how something is done. Choose by the job: contrast, adding, or result.

At a glance

But

- **1.** 可是 / 但是 – two words for "but": 这家咖啡馆很贵，可是咖啡真的很好喝。
- **2.** 不过 – a softer "but": 房间很干净，不过晚上有点儿吵。
- **3.** 而 – whereas / and yet: 北方的冬天很冷，而南方很暖和。

Adding more

- **4.** 还有 – also / and / what's more: 带护照、钱包，还有手机充电器。
- **5.** 另外 – besides / in addition: 另外，下周五公司放假。
- **6.** 并且 – moreover / and also: 这家酒店很干净，并且价格也不贵。
- **7.** 再说 – besides / what's more: 我太累了，再说也没钱了。
- **8.** 首先 … 其次 … 最后 – first, second, finally: 首先要多听，其次要多说，最后要坚持。
- **9.** 例如 vs 比如 – for example: 我喜欢运动，例如游泳和跑步。

And so, and by means of

- **10.** 于是 – thereupon / and so: 雨停了，于是孩子们跑出去玩了。
- **11.** 用 / 通过 … 来 … – by means of …: 我用手机软件来记生词。

1. 可是 / 但是 (two words for "but")

Form: (虽然) A，可是 / 但是 + B

- **这家咖啡馆很贵，可是咖啡真的很好喝。** *Zhè jiā kāfēiguǎn hěn guì, kěshì kāfēi zhēn de hěn hǎohē.* – This café is expensive, but the coffee is really good.
- **我想去，可是妈妈不让。** *Wǒ xiǎng qù, kěshì māma bú ràng.* – I want to go, but Mum won't let me.
- **虽然下雨，但是比赛照常进行。** – Although it was raining, the match went ahead.

How it works. Both start the second clause, before the subject, and both pair with 虽然. 却 after the subject can strengthen the contrast: 他很聪明，但是却不努力.

不过	可是	但是
a small reservation	clear contrast, spoken, often with feeling	clear contrast, neutral, fits writing

Watch out

- One “but” per contrast: *wrong:* 虽然 …… 可是但是 …….
- *wrong:* 我但是没去 → 但是我没去.

2. 不过 (a softer “but”)

Form: A，不过 B (but, though) · 不过 + amount / noun (only)

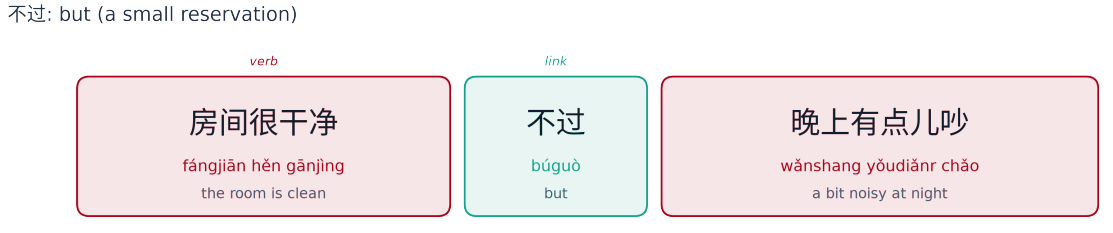
- **房间很干净，不过晚上有点儿吵。** *Fángjiān hěn gānjìng, búguò wǎnshang yǒudiǎnr chǎo.* – The room was clean, though it was a bit noisy at night.
- **你可以用我的电脑，不过别下载游戏。** – You can use my computer, but don’t download games.
- **他不过是个孩子。** – He’s only a child.

How it works. 不过 *búguò* adds a contrast or a small reservation, more gently than 但是. The first clause is usually positive; 不过 adds the limit. It starts its clause, before the subject. Before a noun or amount, 不过 means “only, merely”: 这不过是个小问题.

不过	但是 / 可是
a small reservation	a clear contrast

Watch out

- *wrong:* 我不过今天没时间 → 不过我今天没时间.



3. 而 (whereas / and yet)

Form: A，而 B (whereas) · adjective + 而 + adjective (written "and")

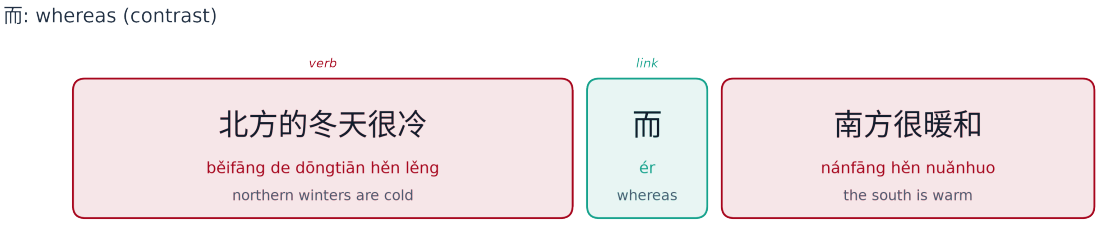
- **北方的冬天很冷，而南方很暖和。** *Běifāng de dōngtiān hěn lěng, ér nánfāng hěn nuǎnhuo.* – Winters in the north are cold, whereas the south is warm.
- **他学法律，而我学医。** – He studies law, while I study medicine.
- **他很有钱，而生活却很简单。** – He's very rich, yet he lives very simply.
- **这个方法简单而有效。** – This method is simple and effective.

How it works. 而 *ér* sets two comparable facts side by side (two places, two people, two qualities). It is written and formal; it suits a newspaper article comparing two cities. With 却 it contrasts a fact with an expectation. Between two adjectives, it means "and".

但是	而
the second part goes against the first	often just sets two facts side by side
spoken and written	written, formal

Watch out

- In chat, say 但是, 可是 or 却 instead.



4. 还有 (also / and / what's more)

Form: A、B，还有 C · 还有，+ new point

- **带护照、钱包，还有手机充电器。** *Dài hùzhào, qiánbāo, hái yǒu shǒujī chōngdiànqì.* – Bring your passport and wallet, and also your phone charger.
- **我买了面包、牛奶，还有鸡蛋。** – I bought bread and milk, and eggs too.
- **还有，你别忘了给妈妈打电话。** – Also, don't forget to call Mum.

How it works. 还有 *hái yǒu* adds one more item to a list, or one more point after a pause, often after a comma. 和 joins two nouns inside one phrase (面包和牛奶); 还有 adds an afterthought.

Followed by an amount, 还 + 有 means "still have": 我还有两个苹果. Check what follows: an amount (still have), or a new item or point (and also).

还有: and also (one more item)

5. 另外 (besides / in addition)

Form: 另外， + new point · subject + 另外 + verb · 另外 (的) + number + noun

- **另外，下周五公司放假。** *Lìngwài, xià zhōuwǔ gōngsī fàngjià.* – Also, the company is closed next Friday.
- **另外，请带身份证。** – In addition, please bring your ID.
- **我另外给你准备了一份。** – I've prepared an extra one for you.
- **另外一个人 / 另外两个问题** – the other person / the other two questions

How it works. 另外 *lìngwài* has three uses.

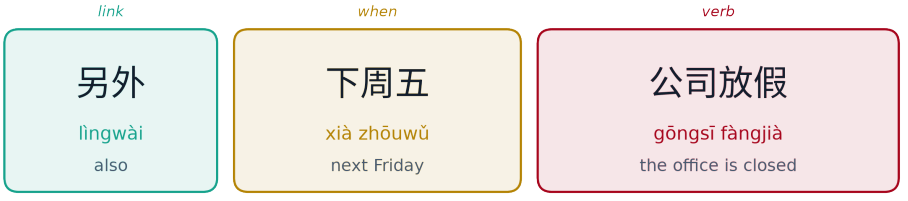
Position	Meaning	Example
start of the sentence, with a comma	in addition (a separate point)	另外，……
after the subject, before a verb	separately, on the side	他另外还学日语
before a number or 的 + noun	the other, another	另外一个人

It is common in emails, meetings and instructions.

Watch out

- 另外 adds something *different*. To add more of the same, use 还 or 也.

另外: in addition, separately



6. 并且 (moreover / and also)

Form: clause, 并且 (+ 也 / 还) + clause

- **这家酒店很干净，并且价格也不贵。** *Zhè jiā jiǔdiàn hěn gānjìng, bìngqiě jiàgé yě bú guì.* – This hotel is clean, and moreover the price isn't high.
- **他按时完成了任务，并且做得很好。** – He finished the task on time, and did it very well too.
- **房间很大，并且很亮。** – The room is big, and bright as well.

How it works. 并且 *bìngqiě* adds a further point in the same direction, "and moreover". It starts the second clause; 也 or 还 often follow. It is close to 而且 but more written, and suits lists of actions or facts.

而且	并且
very common in speech	written
pairs with 不但: 不但便宜，而且好吃	lists of actions or facts

Watch out

- Both points go the same way. For a contrast, use 但是.
- 并且 does not join nouns: *wrong:* 苹果并且香蕉 → 苹果和香蕉.

7. 再说 (besides / what's more)

Form: reason 1, 再说 + reason 2 · … 以后再说 (deal with it later)

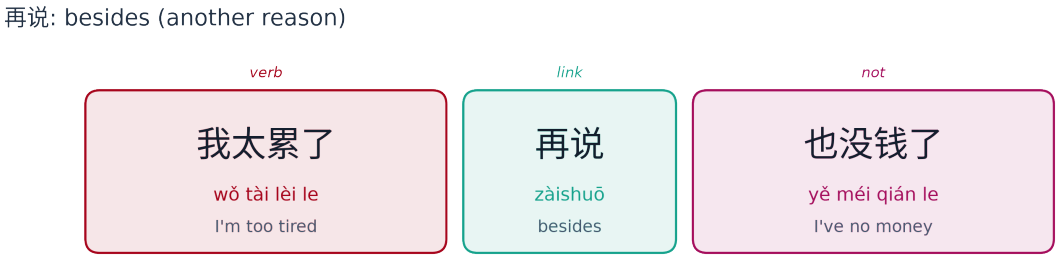
- **我太累了，再说也没钱了。** *Wǒ tài lèi le, zàishuō yě méi qián le.* – I'm too tired, and besides, I'm out of money.
- **太晚了，再说商店也关门了。** – It's too late, and besides, the shop is closed.
- **别买了，太贵了，再说你已经有一个了。** – Don't buy it; it's too expensive, and besides, you already have one.
- **这件事以后再说吧。** – Let's talk about it later.

How it works. 再说 *zàishuō* starts a second clause to add a further reason, in conversation: "besides, what's more". The added reason often has 也 or 还. It is spoken; in writing use 而且 or 此外.

At the end of a sentence, 再说 means “we’ll deal with it later”: 这个问题明天再说.

Watch out

- 再说 adds reasons, not steps. “Then” in a sequence is 然后.



8. 首先 … 其次 … 最后 (first, second, finally)

Form: 首先 …，其次 …，最后 …

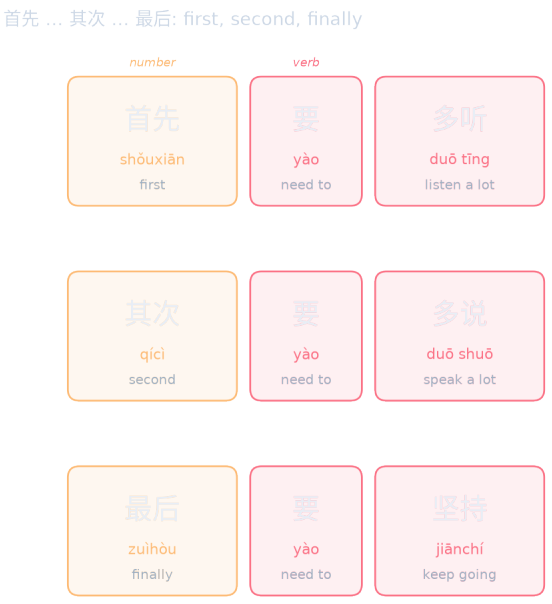
- **首先要多听，其次要多说，最后要坚持。** *Shǒuxiān yào duō tīng, qícì yào duō shuō, zuìhòu yào jiānchí.* – First, listen a lot; second, speak a lot; finally, keep going.
- **首先洗手，然后切菜，接着炒菜，最后放调料。** – First wash your hands, then cut the vegetables, next fry them, and finally add the seasoning.
- **首先，我要感谢大家。** – First of all, I’d like to thank everyone.

How it works. 首先, 其次 and 最后 put points or steps in order. Each starts its own point. Add 然后 or 接着 for more steps.

首先 … 其次 … 最后	然后	开始 … 后来
first, second, finally (a list)	then (in a story)	at first … later

Watch out

- *wrong:* 我吃了早饭，其次去上学 → 我吃了早饭，然后去上学.
- *wrong:* 我首先不习惯，后来 … → 我开始不习惯，后来 ….



9. 例如 vs 比如 (for example)

Form: general word，例如 / 比如 + A、B (等)

- **我喜欢运动，例如游泳和跑步。** *Wǒ xǐhuan yùndòng, lìrú yóuyǒng hé pǎobù.* – I like sport, for example swimming and running.
- **很多水果对身体好，例如苹果、香蕉。** – Lots of fruit is good for you, for example apples and bananas.
- **你可以做点儿运动，比如打打球。** – You could do some exercise, like playing a bit of ball.

How it works. Say the general group first, then 例如 (a little formal) or 比如 / 比如说 (spoken) and the examples, separated by 、. End an incomplete list with 等. 像 + noun + 这样的 = like ….

例如苹果、香蕉等	比如说	像北京这样的城市
for example apples, bananas …	for example (speech)	cities like Beijing

Watch out

- *wrong:* 例如苹果，我喜欢水果 → 我喜欢水果，例如苹果.

10. 于是 (thereupon / and so)

Form: past event，于是 + what someone did next

- **雨停了，于是孩子们跑出去玩了。** *Yǔ tíng le, yúshì háizimen pǎo chūqu wán le.* – The rain stopped, so the children ran out to play.
- **他饿了，于是去买了面包。** – He was hungry, so he went to buy some bread.
- **他听说那家店很有名，于是决定去试试。** – He heard the shop was famous, so he decided to try it.

How it works. 于是 *yúshì* moves a story forward: the second event happens because of, and straight after, the first. It starts the second clause, before any new subject. It is for past narration: event, then reaction.

所以	于是
a logical result, any time	the next action in a past story
因为下雨，所以比赛取消了	下雨了，于是我们回家了

Watch out

- Not for plans, rules or advice: *wrong:* 如果下雨，于是我们不去 → 如果下雨，我们就不去.

11. 用 / 通过 ... 来 ... (by means of ...)

Form: 用 + tool + (来) + verb · 通过 + method + (来) + verb

- **我用手机软件来记生词。** *Wǒ yòng shǒujī ruǎnjiàn lái jì shēngcí.* – I use a phone app to memorise new words.
- **我用词典来查生词。** – I use a dictionary to look up new words.
- **他通过运动来减肥。** *Tā tōngguò yùndòng lái jiǎnféi.* – He loses weight through exercise.
- **他通过朋友介绍找到了工作。** – He found the job through a friend's introduction.

How it works. The means comes first, then the action. 来 here does not mean "come": it links the means to the purpose, and can be left out (我用手机记生词).

用	通过
a concrete tool or language	a method, process or channel
用筷子吃饭, 用中文写	通过网络学习, 通过朋友介绍

Watch out

- In this pattern the tool goes first: *wrong:* 吃饭用筷子 → 用筷子吃饭.

其中 means “among them” or “of which”. It points back to a group already named or clear from context and picks out part of it: 我们班有三十个学生，其中五个是留学生. Name the group first, then use 其中 at the start of the next clause.

其中 (among them / of which)

Form: group，其中 + part (number + measure word / 最 …)

How it works. 其中 *qízhōng* means “among them, of which”. It points back to a group you have just named and picks out part of it, so it starts the *second* clause. After 其中 comes the part: a number + measure word (其中两个, 其中一本), a 最 phrase (其中最便宜的), or a whole clause about one member (其中一个人是我哥哥).

Think of it as a pointer: the first clause draws a circle around a group, and 其中 says “inside that circle”. This is why it is so common when reporting numbers: total first, then 其中 + the part.

其中	在 …… 中 / …… 里
refers back to a group already named	names the group inside the same phrase
我有三个朋友，其中两个是老师。	在这些学生中，他最高。

Watch out

- 其中 needs a group in the clause before it; it cannot open a conversation: *wrong:* 其中一个是医生。(said first) → 我有三个朋友，其中一个是医生。
- Do not use 中间 for this meaning: *wrong:* 我有三个朋友，中间一个是医生 → 其中一个是医生. (中间 means “in the middle” of a place or row.)

- 其中之一 means “one of them”: 苹果是其中之一. The group before it must have several members; 其中 cannot point back to one single thing.

Numbers

HSK 4

Two number patterns. Fractions in Chinese name the whole first and the part second: 三分之一 is “one third” (literally “of three parts, one”). 一 + measure word + 一 + measure word means “one by one”: 一个一个地进来.

At a glance

- **1.** 一 + MW + 一 + MW – one by one: 别着急，一步一步地学。
- **2.** Fractions with 分之: 五分之一的学生走路上学。

1. 一 + MW + 一 + MW (one by one)

Form: 一 + measure word + 一 + measure word + 地 + verb · … + 的 + noun

- **别着急，一步一步地学。** *Bié zháojí, yí bù yí bù de xué.* – Don’t rush; learn it step by step.
- **请一个一个地进来。** – Please come in one by one.
- **孩子一天一天地长大了。** – The child grew up day by day.
- **一座一座的高楼** – tall building after tall building

How it works. Repeating 一 + measure word shows things happening one at a time, or change bit by bit: 一个一个, 一天一天, 一步一步, 一本一本. Before a verb it takes 地 and comes before the verb. Before a noun it takes 的 and describes many in a row.

Watch out

- Use the same measure word twice: *wrong:* 一本一个 → 一本一本.
- *wrong:* 问一个一个 → 一个一个地问.

一 + measure + 一 + measure: one by one

exercises.lol exercises.com.cn

2. Fractions with 分之

Form: bottom number + 分之 + top number · 百分之 + number

- **五分之一的学生走路上学。** *Wǔ fēn zhī yī de xuésheng zǒulù shàngxué.* – One fifth of the students walk to school.
- **三分之二的人** – two thirds of the people
- **我们的成绩提高了百分之二十。** *Wǒmen de chéngjì tígāole bǎi fēn zhī èrshí.* – Our scores rose by 20%.

How it works. Chinese says the **bottom** number first: "of five parts, one" = 五分之一. Per cent works the same way, with 百 (a hundred) at the bottom. Before a noun, add 的.

Value	Chinese
1/3	三分之一
3/4	四分之三
2/5	五分之二
4/3	三分之四
50%	百分之五十
100%	百分之百

In speech, a half is usually 一半: 一半的学生. To ask "what fraction?", say 几分之几.

Reading data with 占. A 占 + fraction / % = "A makes up …". Divide the part by the total, then say the bottom number first: 16 of 40 students → 16 ÷ 40 = 2/5 → **坐公共汽车的学生占五分之二，也就是百分之四十。**

Discounts with 打折. 打 N 折 means you pay N tenths of the price: **打八折** = pay 80% (20% off), **打五折** = half price. 200 yuan 打八折 → 160 yuan.

Watch out

- 3/4 is 四分之三; *wrong:* 三分之四 is 4/3.
- *wrong:* 五十百分之 → 百分之五十.
- 打八折 is not "80% off": you pay 80%.

Particles

HSK 4

Three sentence-final particles that change how a sentence sounds. 吗 after a statement checks something you think is true; 吧 used twice weighs two options (去吧，太远；不去吧，又不好意思); and a final 的 makes a statement sound certain: 他会来的.

At a glance

- **1.** Statement + 吗 – yes/no confirmation: 你下个星期就搬家吗?
- **2.** … 吧，… ；… 吧，… – weighing options: 去吧，太远；不去吧，工资又很高。
- **3.** Sentence-final 的 – modal: certainty: 你一定会成功的。

1. Statement + 吗 (yes/no confirmation)

Form: statement + 吗? · negative statement + 吗?

- **你是学生吗?** *Nǐ shì xuésheng ma?* – Are you a student?
- **你下个星期就搬家吗?** – You're moving as soon as next week?
- **你不累吗?** *Nǐ bú lèi ma?* – Aren't you tired?

How it works. 吗 at the end turns a statement into a yes-no question; the word order does not change. Said with surprise, it checks something you heard (你不去吗?). A negative 吗 question often shows surprise or expects "yes".

Answering a negative question. 对 agrees with the statement inside the question, which can feel the opposite of English.

Q: 你不饿吗?	Meaning
对，我不饿。	Right, I'm not hungry.
不，我饿。	No, I am hungry.

Watch out

- One question form at a time. No 吗 after a question word (*wrong:* 你去哪儿吗? unless you mean "anywhere") or after A-not-A (*wrong:* 你去不去吗?).

就 + time … 吗: checking a surprising detail

exercises.lol exercises.com.cn

2. … 吧，… ；… 吧，… (weighing options)

Form: option 1 + 吧，problem；option 2 + 吧，(又) + problem

- **去吧，太远；不去吧，工资又很高。** *Qù ba, tài yuǎn; bú qù ba, gōngzī yòu hěn gāo.* – If I take it, it's too far; if I don't, the pay is high.
- **说吧，怕他生气；不说吧，又觉得不好。** – If I tell him, I'm afraid he'll be angry; if I don't, I feel bad.
- **吃吧，会胖；不吃吧，会饿。** – If I eat it, I'll get fat; if I don't, I'll be hungry.

How it works. This pattern shows a dilemma: two choices, each with a drawback. Here 吧 means "suppose I …", followed by a comma and the problem. 又 in the second half adds "but on the other hand". Keep the two halves parallel.

吧 + comma + problem	sentence + 吧
"if I were to …" (dilemma)	a suggestion: "let's"
去吧，太远	我们走吧

去吧 … 太远: weighing a choice

3. Sentence-final 的 (modal: certainty)

Form: (一定 / 肯定) + 会 / 能 + verb + 的

- **你一定会成功的。** *Nǐ yídìng huì chénggōng de.* – You'll definitely succeed.
- **放心，我不会告诉别人的。** *Fàngxīn, wǒ bú huì gàosu biérén de.* – Don't worry, I won't tell anyone.
- **这个问题能解决的。** – This problem can be solved, I'm sure.

How it works. 的 at the end of a sentence with 会 or 能 makes a judgement, promise or reassurance firmer. The sentence is correct without it; 的 adds certainty.

会 …… 的	是 …… 的
certainty about the future	focus on a detail of a past event
我会来的 (I'll definitely come)	我是昨天来的 (it was yesterday that I came)

一定会 … 的: sure to

讨论并通过	他并不知道

Watch out

- They join verb phrases, not nouns: *wrong:* 老师并学生 → 老师和学生.

并: and (joining two verbs, written)

7. 从来 + 不 / 没 (never)

Form: 从来没 (有) + verb + 过 (never once) · 从来不 + verb (never, as a habit)

- **我从来没去过新疆。** *Wǒ cónglái méi qùguo Xīnjiāng.* – I've never been to Xinjiang.
- **我从来没听说过这个地方。** – I've never heard of this place.
- **他从来没迟到过。** – He has never once been late.
- **他从来不喝咖啡。** – He never drinks coffee.

How it works. 从来 stresses the whole of the past. For experience: 从来没 + verb + 过. For a habit or rule: 从来不 + verb.

还没去过	从来没去过	一直没
not yet (but might)	never once	not all this time (a specific wait)
我还没去过西安	我从来没去过新疆	他一直没回我消息

Watch out

- Do not mix the two: *wrong:* 他从来不去过 → 他从来没去过.

8. Verb + 到 + Time / Event (until)

Form: verb + 到 + time / event · verb + object + verb + 到 + time

- **她昨天工作到凌晨三点。** *Tā zuótiān gōngzuò dào língchén sān diǎn.* – She worked until three in the morning yesterday.
- **我睡到十点。** – I slept until ten.
- **我们等到雨停了才出发。** – We waited until the rain stopped before setting off.
- **他看书看到半夜。** – He read until midnight.

How it works. 到 + end point goes right after the verb: do something until then. The end can be a time or an event (一直工作到退休). With an object, repeat the verb (看书看到很晚) or put the object first (书看到很晚).

Verb + 到	直到 …… 才 ……
a neutral end point	something happened only that late
玩到十点	直到十点他才回家

Watch out

- 到十点睡 means “go to bed at ten”. “Sleep until ten” is 睡到十点.

Verb + 到 + time: until

9. V 着 V 着就 … 了 (while …-ing, suddenly)

Form: subject + verb 着 verb 着，就 + new event + 了

- **他看着看着就睡着了。** *Tā kànzhe kànzhe jiù shuìzháo le.* – He was watching, and then he fell asleep.
- **我们走着走着就迷路了。** – We were walking along, and before we knew it we were lost.
- **孩子玩着玩着就笑了起来。** – While playing, the child started laughing.
- **他走着走着就到了。** – He walked on, and soon he was there.

How it works. The repeated verb + 着 shows an action going on for a while; then something new slips in without any plan. It tells a past story, so the second part ends with 了. Use a one-syllable verb.

一边 …… 一边 ……	V 着 V 着就 ……
two planned actions at once	a new event slips in
一边吃一边看	吃着吃着就睡着了

Watch out

- *wrong:* 看看着着 → 看着看着.

V着V着: while doing it, something else happens

10. Separable verbs (离合词)

Form: verb + (了 / 过 / amount / 的) + object part · 跟 / 给 + person + separable verb

- **我理了一次发，游了两次泳。** *Wǒ lǐle yí cì fà, yóule liǎng cì yǒng.* – I had my hair cut once and went swimming twice.
- **我们见过面。** *Wǒmen jiànguo miàn.* – We have met before.
- **我想跟你见面。** – I'd like to meet you.
- **你能帮我一个忙吗?** – Could you do me a favour?

How it works. Some words are really verb + object in one word (离合词): 游泳 (swim + swimming), 见面 (see + face), 睡觉, 帮忙, 结婚, 生气, 上课, 毕业, 洗澡, 唱歌, 跳舞. Words like 了, 过, amounts and 的 go **between** the two parts: 见了面, 睡了八个小时觉, 唱了一首歌, 结过两次婚, 生他的气 (be angry with him).

Because they already contain an object, they cannot take a second one. Bring the person in with 跟 or 给.

Wrong	Right
wrong: 见面他	跟他见面
wrong: 帮忙我	帮我一个忙 / 给我帮忙
wrong: 睡觉了八个小时	睡了八个小时觉 / 睡觉睡了八个小时

A split verb: the count goes in the middle

”But” statements

HSK 4

Three ways to say “but”. 尽管 …… 但是 …… admits a fact before contrasting it; 却 comes after the subject and shows that the result is not what you expected; 倒 shows a surprising or opposite point, often in speech. 却 and 倒 are adverbs, so they follow the subject.

At a glance

- **1.** 尽管 … ，但是 … – although: 尽管下着雪，运动会还是照常举行了。
- **2.** 却 + Predicate – however / yet: 我很累，却睡不着。
- **3.** 倒 – actually / on the contrary: 这家小饭馆倒挺贵的。

1. 尽管 … ，但是 … (although)

Form: 尽管 A，(但是 / 可是) subject + 还是 / 也 / 却 + B · 尽管 + verb (feel free to)

- **尽管下着雪，运动会还是照常举行了。** *Jǐnguǎn xiàzhe xuě, yùndònghuì háishi zhàocháng jǔxíng le.* – Although it was snowing, the sports day still went ahead.
- **尽管很晚了，他还在工作。** – Although it was late, he was still working.
- **尽管他很努力，可是成绩还是不太好。** – Although he works hard, his grades still aren’t very good.
- **有问题尽管问我。** – Feel free to ask me if you have any questions.

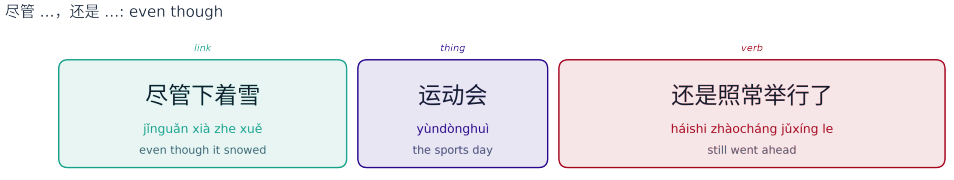
How it works. 尽管 *jǐnguǎn* states a real fact that does not stop the result. The second clause often has 但是, 可是, 还是, 也 or 却. It is a bit stronger and more formal than 虽然.

尽管 / 虽然	即使
although (it is true)	even if (it may happen)

Before a verb, 尽管 means “feel free to”.

Watch out

- One “although” is enough: don’t combine 尽管 with 虽然 or 即使 in the same clause.



exercises.lol exercises.com.cn

2. 却 + Predicate (however / yet)

Form: clause, (但是) subject + 却 + predicate

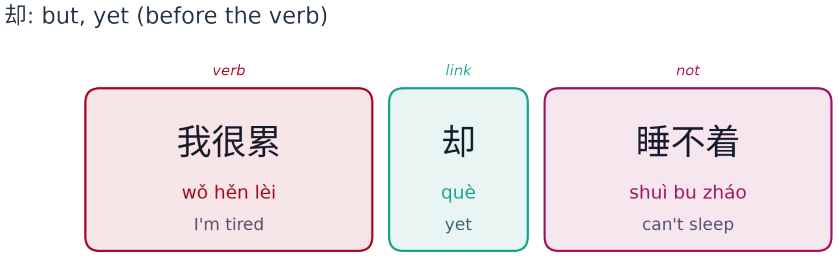
- **我很累，却睡不着。** *Wǒ hěn lèi, què shuì bu zháo.* – I'm exhausted, yet I can't sleep.
- **已经是春天了，天气却还很冷。** – It's already spring, yet it's still very cold.
- **我想帮他，但是他却不需要。** – I wanted to help him, but he didn't need it.

How it works. 却 *què* marks a surprising contrast. It is an adverb: it goes after the subject of the second clause, before the verb. It can follow 但是 or 可是, and is common in writing and stories.

但是	却
opens the clause	after the subject, inside the clause
但是他不来	他却不来

Watch out

- 却 never opens a clause: *wrong:* 却他不来 → 他却不来.



3. 倒 (actually / on the contrary)

Form: subject + 倒 + predicate · …… 倒是 ……，就是 ……

- **这家小饭馆倒挺贵的。** *Zhè jiā xiǎo fànguǎn dào tǐng guì de.* – This little restaurant is actually quite expensive.
- **大家都很紧张，他倒很平静。** – Everyone was nervous; he, surprisingly, was calm.
- **东西倒是不错，就是太贵了。** – The goods are fine; it's just that they're too expensive.
- **你说得倒容易！** – That's easy for you to say!

How it works. 倒 *dào* marks a result opposite to what you'd expect. It needs an expectation to go against, and sits after the subject, before the verb or adjective. 倒是 concedes a point before a "but" (就是). 你说得倒容易 is ironic: easy to say, hard to do.

却	倒	反而
plain “yet”	contrary to expectation, mild	on the contrary, stronger
他很累，却睡不着	他倒不着急	吃了药，病反而更重了

Watch out

- *wrong:* 倒他不着急 → 他倒不着急.

How it works. 即使 *jíshǐ* “even if” introduces a situation that *may* happen, often an extreme or unwelcome one, and the second clause says the result does not change. 也 is needed in the second clause, placed after its subject and before the verb.

即使 often meets 再 + adjective (“however …”): 即使再累, 即使再难. The second clause often carries 要, 会 or 还是 to show determination. It is neutral in register; in casual speech 就算 does the same job.

At a glance

- **1.** 由于 – due to / owing to: 由于天气原因，航班推迟起飞。
- **2.** 因此 – therefore / for this reason: 新产品价格低，因此很受欢迎。
- **3.** 既然 … ，就 … – since / now that: 既然来了，就一起吃饭吧！

1. 由于 (due to / owing to)

Form: 由于 + cause，(所以 / 因此) + result (formal)

How it works. 既然 *jìrán* "since, now that" starts from a fact both people already know. The second clause draws a conclusion: a suggestion (吧), a decision, or a question (为什么还 ……?). 就 goes after the subject.

- **我明天有事，去不了。** – I've got something on tomorrow; I can't make it.

How it works. 得 or 不 between a verb and its complement says whether the result can be achieved in the situation.

Form	Meaning
买得到 / 买不到	can / can't get hold of
拿得动 / 拿不动	can / can't lift
来得及 / 来不及	there is / isn't time
受不了	can't stand it
听不清楚	can't hear clearly
记不住	can't remember
去得了 / 去不了	able / unable to go

The object goes after the complement, or first as the topic: 我听不懂他的话 / 他的话我听不懂.

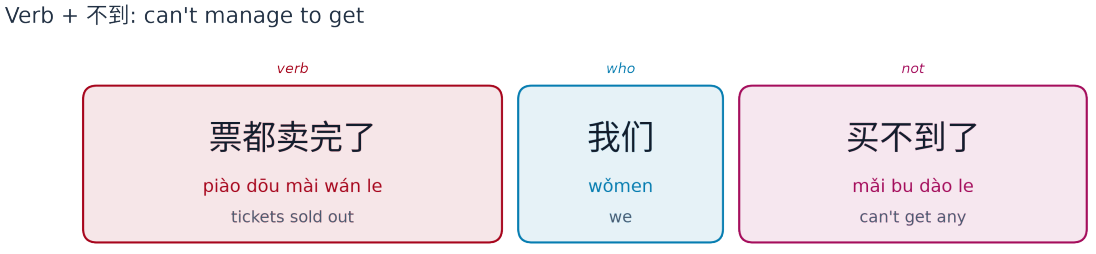
Build it from a result. Start from verb + result and put 得 (can) or 不 (can't) in the middle:

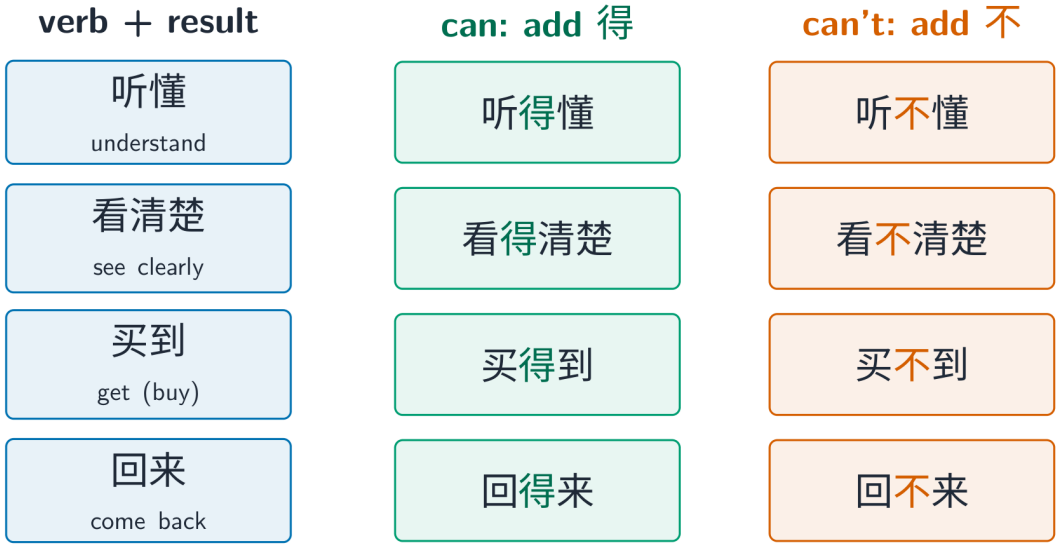
verb + result	can	can't
听懂 understand	听得懂	听不懂
看清楚 see clearly	看得清楚	看不清楚
买到 get (buy)	买得到	买不到
回来 come back	回得来	回不来

没听懂 vs 听不懂. 没听懂 = didn't understand (this time); 听不懂 = can't understand (beyond you). Answer a question with the complement itself: 你听得懂吗? – 听得懂。/ 听不懂。

Watch out

- Permission and rules take 不能, not a complement: 这里不能停车.





3. Verb / Adj + 起来 (start to ...)

Form: verb / adjective + 起来 · verb + 起 + object + 来

- **音乐一响，大家都跳起来了。** *Yīnyuè yì xiǎng, dàjiā dōu tiào qǐlai le.* – As soon as the music played, everyone started dancing.
- **宝宝突然哭起来了。** – The baby suddenly started crying.
- **下起雪来了。** *Xià qǐ xuě lái le.* – It started to snow.
- **天气热起来了。** – It's getting hot.

How it works. After a verb, 起来 means an action starts and goes on: 笑起来, 聊起来. After an adjective, it means a state begins to develop, usually towards "more": 热起来, 好起来, 胖起来. (Getting cooler is often 冷下来 / 凉下来.) An object goes **between** 起 and 来: 下起雨来, 唱起歌来.

起来	下去
start something new	continue something already going
他们聊起来了	请说下去

Watch out

- *wrong:* 下起来雨 → 下起雨来.

一 ...，(就) ...: as soon as

4. Verb + 起来 (in terms of doing it)

Form: thing + verb + 起来 + comment

- **这个手机用起来很方便。** *Zhège shǒujī yòng qǐlai hěn fāngbiàn.* – This phone is very convenient to use.
- **这个菜吃起来有点儿辣。** – This dish tastes a bit spicy.
- **这首歌听起来很熟悉。** – This song sounds familiar.
- **说起来容易，做起来难。** – Easier said than done.

How it works. Verb + 起来 + comment judges what it is like to do something. Put the thing you judge first.

Three uses of 起来.

Use	Example
judging the experience	这个包背起来很舒服
starting an action	大家都笑起来了
upward movement	站起来

The comment after it tells you it is a judgement.

Basic sentence patterns

HSK 4

Patterns that stress a point. 连 …… 都/也 …… means "even" and picks the least likely case; 一点 …… 也/都不 means "not at all"; question word + 都 means "every"; A 是 B 的 N 倍 compares sizes; and 不知道 …… 好 says you cannot decide.

At a glance

- **1.** 连 … 都 / 也 – even: 这个连小孩子都知道!
- **2.** 连 … 都 … 不 / 没 – not even: 我今天忙得连一口水都没喝。
- **3.** 一点 + 也 / 都 + 不 – not at all: 一点儿也不可怕。
- **4.** Question Word + 都 – every: 哪儿都行，你选吧。
- **5.** A 是 B 的 N 倍 – N times: 现在的房子是以前的三倍。
- **6.** 不知道 + embedded choice + 好 – unsure what is best: 我不知道送什么好。

1. 连 ... 都 / 也 (even)

Form: 连 + X + 都 / 也 + verb

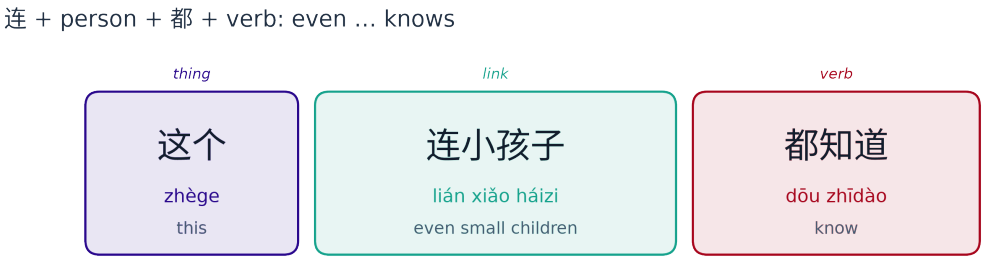
- **这个连小孩子都知道!** *Zhège lián xiǎo háizi dōu zhīdào!* – Even a small child knows that!
- **连我奶奶都用微信。** – Even my grandma uses WeChat.
- **连老师也不知道答案。** – Even the teacher doesn't know the answer.
- **他连周末都在工作。** – He works even at weekends.

How it works. 连 *lián* X 都 / 也 means "even X". X is the least likely case, which makes the statement strong. X can be the subject or an object moved forward, and the 连 phrase comes before the verb.

Positive	Negative
连小孩子都会 (even a child can, so it's easy)	连一个字都不会写 (not even one, so it's hopeless)

Watch out

- Keep 都 / 也: *wrong:* 连他来了 → 连他都来了.
- X must be the surprising case; 连 + an ordinary item sounds odd.



2. 连 ... 都 ... 不 / 没 (not even)

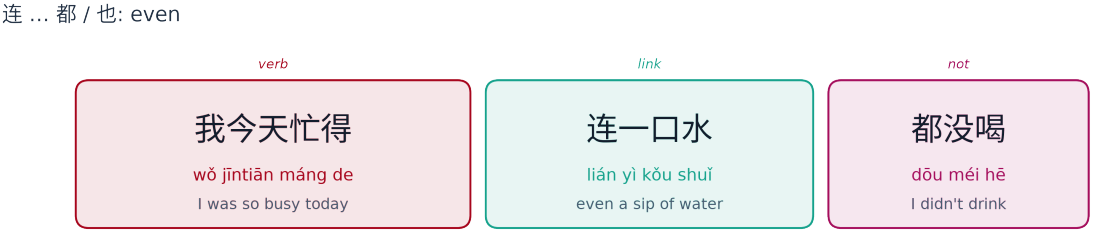
Form: 连 + X + 都 / 也 + 不 / 没 + verb · 连 + verb + 都没 + verb

- **我今天忙得连一口水都没喝。** *Wǒ jīntiān máng de lián yì kǒu shuǐ dōu méi hē.* – I was so busy today I didn't even have a sip of water.
- **他连我的名字都不知道。** – He doesn't even know my name.
- **他连一个字都没写。** – He didn't write a single character.
- **他连想都没想就答应了。** – He agreed without even thinking.

How it works. X is the smallest or easiest thing, and still it didn't happen: "not even X". The 连 phrase moves **before** the verb, and 都 or 也 must follow it. Repeating the verb (连看都没看, 连想都没想) shows how little care was taken.

Watch out

- *wrong:* 没吃连饭 → 连饭都没吃.
- Keep 都 / 也: *wrong:* 连水没喝 → 连水都没喝.



3. 一点 + 也 / 都 + 不 (not at all)

Form: 一点儿 + 也 / 都 + 不 / 没 + adjective / verb

- **一点儿也不可怕。** *Yìdiǎnr yě bù kěpà.* – It wasn't scary at all.
- **这个一点儿也不贵。** – This isn't expensive at all.
- **我一点儿都不累。** – I'm not tired in the slightest.
- **他一点儿也没变，还是那么年轻。** – He hasn't changed at all; he still looks so young.

How it works. 一点儿也 / 都 + a negative is the strongest denial: "not … at all". It goes before 不 or 没, and it always needs one.

有点儿冷	不太冷	一点儿也不冷
a bit cold	not very cold	not cold at all

Watch out

- *wrong:* 不一点儿冷 → 一点儿也不冷.
- *wrong:* 一点儿也冷 is wrong; "a bit cold" is 有点儿冷.

一点儿也不: not … at all

4. Question Word + 都 (every)

Form: question word (+ noun) + 都 + (不 / 没) + verb

- **哪儿都行，你选吧。** *Nǎr dōu xíng, nǐ xuǎn ba.* – Anywhere is fine; you choose.
- **他什么都会。** – He can do anything.
- **什么菜都好吃。** – Every dish is delicious.
- **我怎么都找不到。** – I can't find it no matter how I look.

How it works. A question word before 都 means "every-, any-"; with a negative it means "no-". The question word moves **before** 都 and the verb. With a noun: 哪个 / 什么 + noun + 都.

Question word + 都	Meaning
谁都	everyone
什么都	everything
哪儿都	everywhere
什么时候都	any time
怎么都	however (you try)

Short, spoken	Spelled out
谁都可以来	不管谁来，我都欢迎

Watch out

- *wrong:* 我吃什么都 → 我什么都吃.

5. A 是 B 的 N 倍 (N times)

Form: A 是 B 的 N 倍 · A 比 B 多 N 倍 · 增加了 N 倍

- **现在的房子是以前的三倍。** *Xiànzài de fángzi shì yǐqián de sān bèi.* – My place now is three times the size of my old one.
- **她的工资是他的两倍。** – Her salary is twice his.
- **这个城市的人口是那个的两倍。** – This city's population is twice that city's.
- **价格增加了一倍。** – The price has doubled.

How it works. 倍 *bèi* counts multiples. The two patterns count differently.

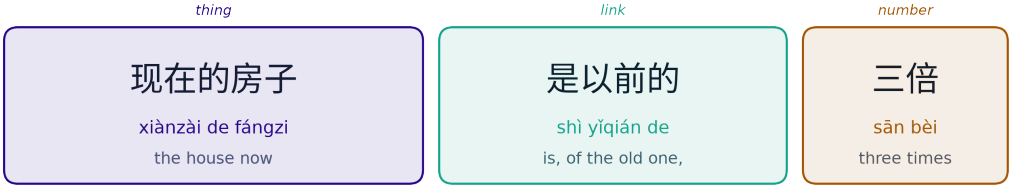
Pattern	Counts	B = 10, so A =
A 是 B 的两倍	the total	20 (×2)
A 比 B 多一倍	the increase on top	20 (×2)
A 比 B 多两倍	the increase on top	30 (×3, in careful usage)

增加了一倍 also counts the increase: it doubled. For "half as much", 倍 is not used: A 是 B 的一半.

Watch out

- 倍 is multiples; 次 is occasions: *wrong:* 我去过三倍 → 我去过三次.

A 是 B 的 … 倍: … times as much



6. 不知道 + embedded choice + 好 (unsure what is best)

Form: 不知道 + verb + question word + 好 · 你说 + … + 好?

- **我不知道送什么好。** *Wǒ bù zhīdào sòng shénme hǎo.* – I don't know what would be best to give.
- **他不知道怎么办好。** – He didn't know what to do.
- **我不知道去北京好还是去上海好。** – I don't know whether it's better to go to Beijing or Shanghai.
- **你说我买哪个好?** – Which do you think I should buy?

How it works. 好 at the end of the embedded choice means "would be best". The question word sits inside the sentence, so a 不知道 sentence is a statement, with no question mark. To ask for advice, use 你说 … 好? or 你知道 …… 好吗?

Watch out

- 好 goes at the end of the choice: *wrong:* 不知道好说什么 → 不知道说什么好.

Verb + 什么好: what would be best to …

- **2.** 一 … 就 … – as soon as / whenever: 门铃一响，它就跑过去。
- **3.** 一方面 … ，一方面 … – on one hand / on the other: 一方面，大城市机会多；另一方面，生活也更方便。

1. Adj + 是 + Adj，但是 … (concede, then object)

Watch out

- Repeat the identical word: *wrong:* 贵是很贵 → 贵是贵.
- The second clause must object: *wrong:* 好是好，而且 …….

A 是 A，但是 …: it is …, but

Comparing similar time words

HSK 4

以后 and 的时候 both place an event in time, but differently. …… 以后 means "after": 下课以后 is after class has ended. …… 的时候 means "when, while": 下课的时候 is the moment class ends.

以后 vs 的时候 (after vs when)

Form: A 的时候，B (at the same time) · A (了) 以后，B (one after the other)

- **你打电话的时候我在做饭，吃完饭以后我给你回了电话。** *Nǐ dǎ diànhuà de shíhou wǒ zài zuò fàn, chīwán fàn yǐhòu wǒ gěi nǐ huíle diànhuà.* – When you called, I was cooking; after dinner I called you back.

How it works. Both patterns put a time clause *before* the main clause; Chinese never puts it at the end the way English can ("I was cooking when you called"). To choose, ask one question: do the two events overlap, or does one follow the other?

A 的时候 means "during A, while A, when A": B happens inside A's time (我到的时候，他正在吃饭). A 以后 means "after A": A finishes, then B starts. Verb + 了 + 以后 stresses that A is complete: 你到了以后, 我做完作业以后.

的时候	以后
B happens during A	B happens after A ends

Say it aloud: opinions, plans and suggestions

HSK 4

Choose a study plan together

Your class is deciding whether to revise alone or in a group. State a view, explain a reason, acknowledge a drawback and suggest a next step. These are useful choices for organising a turn, not compulsory stages of every Mandarin answer.

我觉得一起复习比较好，因为遇到问题可以互相帮助。不过，人太多可能会很吵。不如我们三个人一组，先试一次吧。

Wǒ juéde yìqǐ fùxí bǐjiào hǎo, yīnwèi yùdào wèntí kěyǐ hùxiāng bāngzhù. Búguò, rén tài duō kěnéng huì hěn chǎo. Bùrú wǒmen sān ge rén yì zǔ, xiān shì yí cì ba.

I think revising together is better because we can help each other with problems. However, too many people might be noisy. How about trying groups of three first?

Match the connector to its job

Job	Example	What it adds
View	我觉得这个办法不错。	the speaker's judgment
Additional point	而且大家可以互相帮助。	another supporting point
Qualification	不过，需要先约好时间。	a limitation or drawback
Suggestion	不如先试一次吧。	a possible next step

认为 can also be used in speech, and 觉得 is not banned from a serious answer. Their suitability depends on tone and context; they are not a simple spoken/formal switch.

State an intention or preparation

我打算下周开始复习。 I intend to start revising next week.

我准备下周开始复习。 I plan to start revising next week.

我正在准备考试。 I am preparing for the exam.

准备 can express a plan or the activity of getting ready. 正在 and the following phrase clarify the third example. A plan can be genuine without an explicit time, but adding one makes arrangements easier to follow.

Suggest without assuming permission

不如坐地铁吧。 How about taking the metro?

你应该早点休息。 You should rest earlier.

最好提前买票。 It would be best to buy tickets in advance.

These are different ways of advising, not a fixed scale of politeness. Relationship, wording and intonation matter. 不如 can introduce a suggestion even when no earlier alternative was spoken aloud. 吧 often softens a suggestion, but does not automatically make a demand polite.

Respond to a practical objection

A partner says **可是我星期三没空。** But I am not free on Wednesday.

那我们星期四再一起复习，星期三先自己看书。 Then let's revise together on Thursday; on Wednesday we can read on our own first.

The reply changes the arrangement instead of ignoring the objection. Practise with a different unavailable day. Check that the final date is clear and the reason remains relevant.

Practice

1. Label the job of each connector: 我觉得 …… / 而且 …… / 不过 …… / 不如 …… 吧。
2. Fill the gap: 我们一起复习吧，＿＿可以互相帮助。(而且 / 不过)
3. Fill the gap: 坐地铁很快，＿＿早上人很多。(而且 / 不过)
4. Translate: How about going to the library first? (use 不如 …… 吧)
5. Is 准备 a plan or an activity in each sentence? A. 我准备明年去北京。B. 他正在准备晚饭。
6. Your partner says 可是我星期五要上课。Reply with a new arrangement in one or two sentences.

Mixed practice

These questions mix the patterns and use new situations.

7. Find and fix the problem. A classmate says 不如 can only start a suggestion after someone else's idea, and that 准备 always means you have already started preparing. Correct both rules.

8. Use it yourself. Suggest studying together, answer a friend who says they are busy on Thursday, and offer another day.
