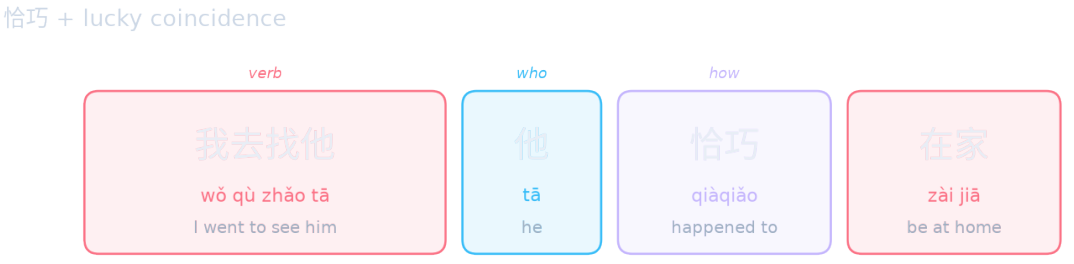
- **恰巧那天我也在北京，我们就见了一面。** – As it happened, I was in Beijing that day too, so we met up.
- **这双鞋大小恰好。** – These shoes are exactly the right size.

How it works. 恰巧 tells a coincidence: two things met by chance at the right moment. 恰好 means "exactly right" (size, time, amount) and can also mean "as it happened". Both are written; in speech say 正好 / 刚好.

他恰巧在家	大小恰好	正好十点
he happened to be home	exactly the right size	exactly ten o'clock (spoken)

Watch out

- *wrong:* 大小恰巧 → 大小恰好.



26. 必定 vs 一定 (surely / must)

Form: (condition), 必定 (会) + result

- **只要坚持下去，你必定会成功。** *Zhǐyào jiānchí xiàqu, nǐ bìdìng huì chénggōng.* – As long as you keep going, you will surely succeed.
- **这件事必定有原因。** – There must be a reason for this.
- **不保护环境，必定会受到自然的惩罚。** – If we don't protect the environment, nature will surely punish us.

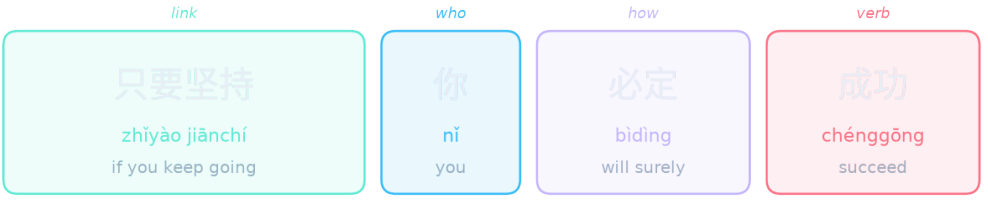
How it works. 必定 gives a confident judgement: something is bound to be true or to happen. It is formal. For requests (一定要来) and "not necessarily" (不一定), use 一定; in everyday speech, 肯定.

必定会成功	你一定要来!	不一定
will surely succeed	you must come!	not necessarily

Watch out

- *wrong:* 你必定要来 → 你一定要来. *wrong:* 不必定 → 不一定.

必定 + certain result



27. 或许 vs 也许 and 恐怕 (perhaps)

Form: 或许 + verb · 或许 at the start

- **他或许已经知道了。** *Tā huòxǔ yǐjīng zhīdào le.* – Perhaps he already knows.
- **换个方法或许会更好。** – Trying another way might work better.
- **恐怕要下雨了。** – I'm afraid it's going to rain.

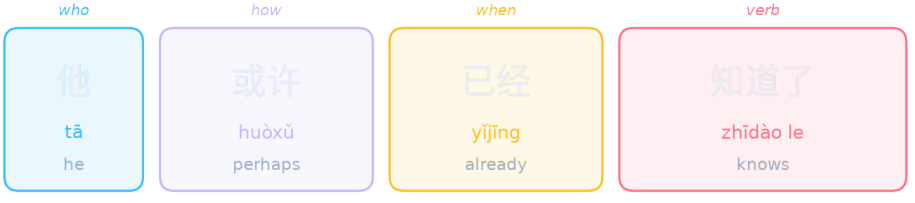
How it works. 或许 makes a soft guess or polite suggestion; it means the same as 也许 but sounds a little more written. 恐怕 guesses something you don't want.

或许你说得对	也许吧	恐怕来不及了
perhaps you're right	maybe (everyday)	I'm afraid it's too late

Watch out

- Not for certain facts: *wrong:* 太阳或许从东边升起.

或许 + soft guess



28. 明明 (clearly …, yet …)

Form: subject + 明明 + fact, (却 / 还 / 为什么) + the opposite

- **你明明知道，为什么不告诉我?** *Nǐ míngmíng zhīdào, wèishénme bú gàosu wǒ?* – You clearly knew – why didn't you tell me?

- **他明明不会，还说自己会。** – He obviously can't do it, but he still says he can.
- **我明明把钥匙放在桌上了，怎么不见了？** – I definitely put the keys on the table – how come they're gone?

How it works. 明明 states a plain fact, and the next part goes against it: a complaint or surprise. For a neutral "obviously", use 显然 or 很明显.

明明知道，却不说	显然失败了	分明
clearly knew, yet said nothing	obviously failed	clearly (written)

Watch out

- 明明 needs a contrast after it.

29. 犹如 vs 好像 and 像 …… 一样 (just like)

Form: A 犹如 B (written) · A 像 B 一样 (spoken)

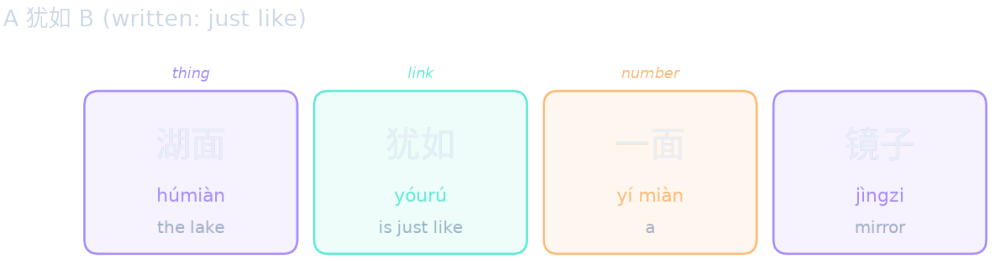
- **湖面犹如一面镜子。** *Húmiàn yóurú yí miàn jìngzi.* – The surface of the lake was just like a mirror.
- **时间犹如流水，一去不复返。** – Time is like flowing water: once gone, it never comes back.
- **他好像生病了。** – He seems to be ill.

How it works. 犹如 makes a written comparison in descriptions and essays; 仿佛 (as if) is also written. In speech say 像 …… 一样. 好像 can also mean "it seems" (a guess); 犹如 is not used that way.

犹如一面镜子	像镜子一样	好像生病了
just like a mirror (written)	like a mirror (spoken)	seems ill

Watch out

- For a guess, use 好像, not 犹如.



30. 凡是 … 都 (all / any without exception)

Form: 凡是 + category (… 的 + noun), 都 + …

- **凡是迟到的学生，都要写说明。** *Fánshì chídào de xuésheng, dōu yào xiě shuōmíng.* – Any student who is late must write an explanation.
- **凡是他答应的事，都会做到。** – Whatever he promises, he does.
- **凡是有问题的，请举手。** – Anyone with a question, please raise your hand.

How it works. 凡是 *fánshì* "every, any … without exception" sets up a whole category, usually with a 的 phrase, and 都 in the main clause applies the rule to all of it. It suits rules and strong generalisations.

所有的学生都 ……	每个学生都 ……	凡是 …… 的学生，都 ……
all the students	each student	any student who …, no exceptions

Watch out

- 都 is required: *wrong:* 凡是学生要参加 → 凡是学生都要参加.
- (请举手 is a request, so 都 can be left out there.)

31. 一律 (uniformly / without exception)

Form: group / items + 一律 + verb / predicate

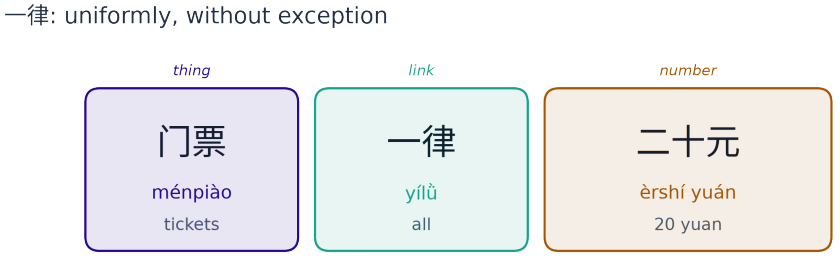
- **门票一律二十元。** *Ménpiào yílǜ èrshí yuán.* – All tickets are twenty yuan.
- **学生一律穿校服。** – All students must wear school uniform.
- **过期的票一律无效。** – Expired tickets are invalid, no exceptions.

How it works. 一律 *yílǜ* applies one rule to every case in the same way. It is formal and typical of signs, notices and policies (一律免费, 一律不退).

都	一律
all (a neutral description)	all, by rule, no exceptions
学生都来了	外卖一律放门口

Watch out

- The group comes first: *wrong:* 一律学生穿校服 → 学生一律穿校服.
- Use 一律 for rules, not plain descriptions.



32. 再 + Adj + 也 (however ..., still ...)

Form: (topic) + 再 + adjective / verb, (subject) + 也 + unchanged result

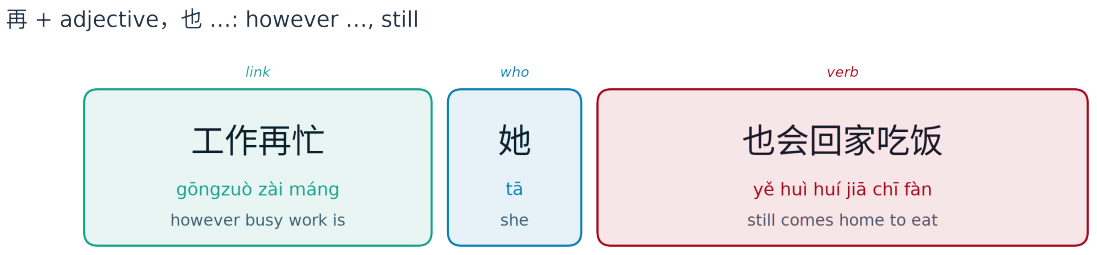
- **工作再忙，她也会回家吃饭。** *Gōngzuò zài máng, tā yě huì huí jiā chī fàn.* – However busy work gets, she still comes home for dinner.
- **再贵我也要买。** – I'm buying it, however expensive it is.
- **你再解释也没用，他不会相信的。** – However much you explain, it's no use; he won't believe it.

How it works. Here 再 means "however much, even more", not "again". Whatever the degree, the result after 也 stays the same. It is very common in speech; 无论 / 不管 + 多 says the same thing more explicitly.

再忙也会来	无论多忙，她都会来
short, spoken	explicit, any register

Watch out

- 也 is required: *wrong:* 再忙来 → 再忙也来.



33. 唯独 (only X – the exception)

Form: group (都) …，唯独 + person / verb …

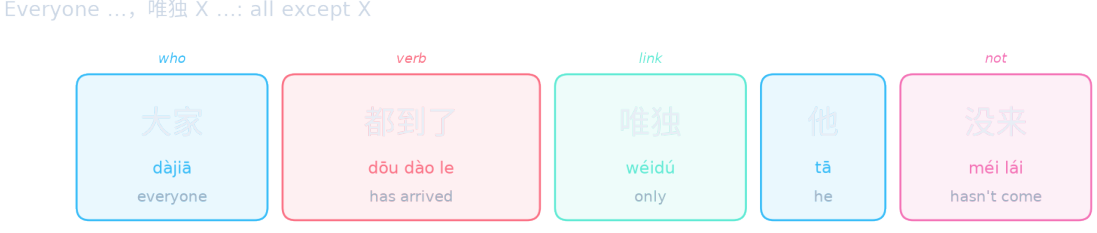
- **大家都到了，唯独他没来。** *Dàjiā dōu dào le, wéidú tā méi lái.* – Everyone has arrived; only he hasn't come.
- **我什么菜都吃，唯独不吃香菜。** – I eat everything except coriander.
- **他什么都不怕，唯独怕打针。** – He's afraid of nothing – except injections.

How it works. 唯独 singles out the one exception: first say what is true for the group, then 唯独 + the one that differs. It is a little formal. For a plain "only" with no contrast, use 只有 / 只.

唯独他没来	只有他知道	除了他以外，大家都到了
only he didn't come	only he knows	everyone except him has arrived

Watch out

- With no group to contrast, say 只有, not 唯独.



34. 统统 (all, every single one)

Form: (group / 把 + things) 统统 + verb

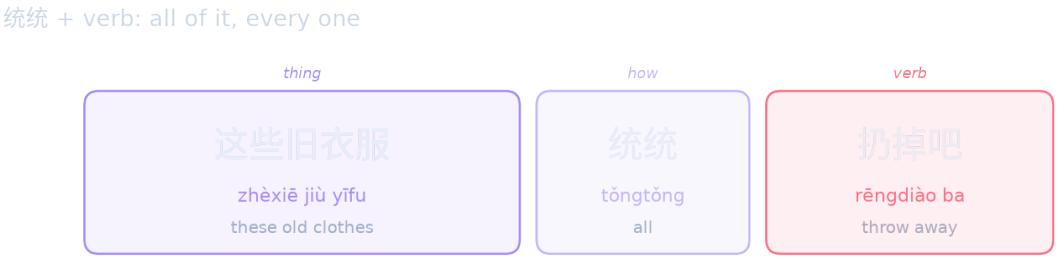
- **这些旧衣服统统扔掉吧！** *Zhèxiē jiù yīfu tǒngtǒng rēngdiào ba!* – Throw all these old clothes away!
- **把桌子上的东西统统拿走！** – Take everything off the table!
- **我说的话他统统忘了。** – He forgot every word I said.

How it works. 统统 means "all, every single one". Like 都 it goes before the verb, but it is stronger and spoken, common in orders and 把 sentences. Before a noun, say 所有 / 全部; in formal writing, 全部 / 都.

统统扔掉	所有人	已全部提交
throw it all away	everyone	all submitted (formal)

Watch out

- *wrong:* 统统人 → 所有人.



35. 归根到底 (in the final analysis)

Form: details …。归根到底 (还是 / 是) + basic cause

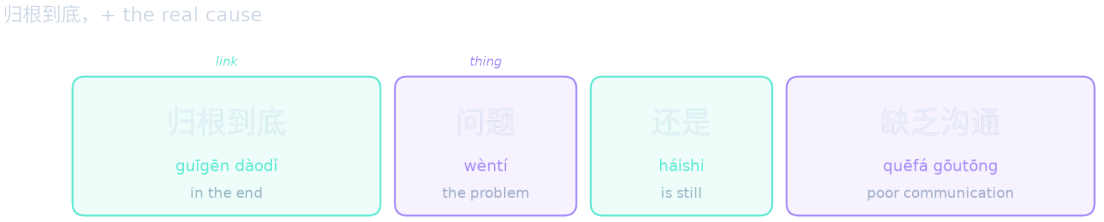
- **归根到底，问题还是缺乏沟通。** *Guīgēn dàodǐ, wèntí háishi quēfá gōutōng.* – In the end, the real problem is poor communication.
- **归根到底，学习还得靠自己。** – In the end, learning depends on yourself.
- **说到底，还是钱的问题。** – When it comes down to it, it's about money.

How it works. 归根到底 (also 归根结底) names the one basic cause or truth after you have listed details. It is written; 说到底 is the spoken version. 总之 just sums up; for time, use 最后.

归根到底	说到底	总之
at root (written)	when it comes down to it	in short

Watch out

- Not for time: *wrong:* 归根到底他来了 → 他最后还是来了.



36. 很是 + Adj (a formal "very")

Form: subject + 很是 + two-syllable adjective / feeling verb

- **居民们对新公园很是满意。** *Jūmínmen duì xīn gōngyuán hěn shì mǎnyì.* – Residents are very satisfied with the new park.
- **老人一个人住，孩子们很是担心。** – The old man lives alone, and his children are very worried.
- **听到这个消息，大家很是高兴。** – Everyone was very pleased by the news.

How it works. 很是 is a literary "very": one unit before a two-syllable adjective or feeling verb. It gives a measured, slightly old-fashioned tone suited to narratives and reports.

很是满意	他是很忙
very (degree, written)	是 for emphasis: he really **is** busy

Watch out

- Prefer two-syllable words: *wrong:* 很是好 → 很是满意 / 很好.
- In conversation, use 很 or 非常.

37. 足足 + Amount (a full / as much as)

Form: 足足 + verb + number + measure word · 足足 + amount

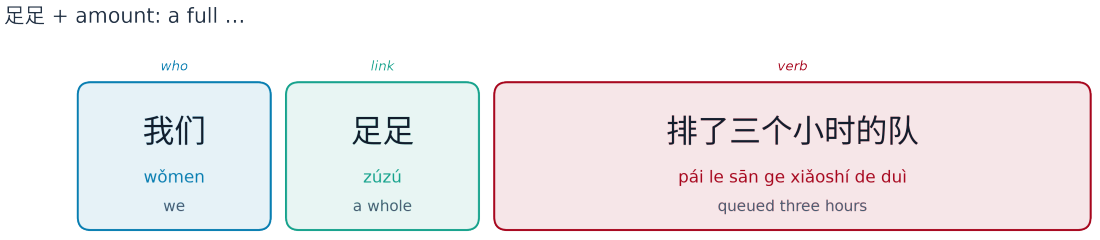
- **我们足足排了三个小时的队。** *Wǒmen zúzú páile sān gè xiǎoshí de duì.* – We queued for a full three hours.
- **他足足比我高了一个头。** – He's a whole head taller than me.
- **这顿饭足足花了五百块。** – That meal cost a full 500 yuan.

How it works. 足足 *zúzú* stresses that an amount of time, weight, money or distance is large: at least that much, more than expected. It needs a number.

足足	整整	才 / 只
a full (large!)	exactly, a whole (complete)	only (small)
足足三个小时	整整一天	才五分钟

Watch out

- *wrong:* 足足很久: give the amount (足足等了两个小时).



38. Verb + 得 + 倒 + Adj (a pointed note)

Form: verb + 得 + 倒 + adjective

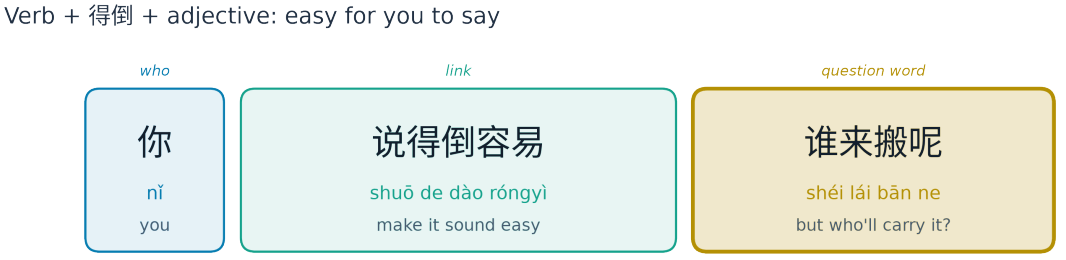
- **你说得倒容易，谁来搬呢?** *Nǐ shuō de dào róngyì, shéi lái bān ne?* – That's easy for you to say. Who's going to do the lifting?
- **他想得倒美，以为不复习也能考满分。** – Dream on: he thinks he'll get full marks without revising.
- **这孩子画得倒不错。** – This child actually draws rather well.

How it works. 倒 *dào* after 得 marks a contrast with what you'd expect. Most often it is ironic: the words or idea sound fine, but reality is different (说得倒轻松, 说得倒好听, 想得倒美). It can also be sincere, meaning better than expected (画得倒不错). Context and tone decide which.

你说得很容易	你说得倒容易
describes how you said it	implies "but it isn't really"

Watch out

- Order: verb + 得 + 倒 (*wrong:* 说倒得容易).
- The ironic use is a jab; avoid it with people you should be polite to.



39. 未免 (rather too – a soft criticism)

Form: subject + 未免 + 太 / 有点儿 / 过于 + adjective

- **一碗面要九十八块，这碗面未免太贵了。** *Zhè wǎn miàn wèimiǎn tài guì le.* – 98 yuan for a bowl of noodles – that's rather too expensive.
- **你这样说未免有点儿不公平。** – Saying that is a bit unfair, don't you think?
- **才学了一个月就想当翻译，未免太着急了。** – Wanting to be an interpreter after one month of study is rather too hasty.

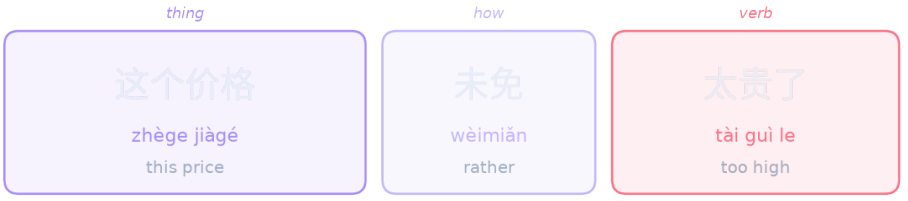
How it works. 未免 gives a soft, polite criticism: the speaker thinks something goes too far. A degree word (太, 有点儿, 过于) usually follows it.

未免太高了	难免紧张	太贵了
rather too high (a judgement)	bound to be nervous (a natural result)	too expensive (blunt)

Watch out

- 未免 ≠ 难免: *wrong:* 他的要求难免太高了 → 他的要求未免太高了.
- In speech, keep the degree word: 未免太可惜了.

未免 + 太 / 有点儿 + adjective: rather too (a judgement)



40. 难以 (hard to – formal)

Form: 难以 + two-syllable verb (相信, 接受, 理解, 忘记, 形容)

- **这真让人难以相信。** *Zhè zhēn ràng rén nányǐ xiāngxìn.* – That is really hard to believe.
- **这个结果让人难以接受。** – This result is hard to accept.
- **那天的风景美得难以形容。** – The scenery that day was beautiful beyond words.

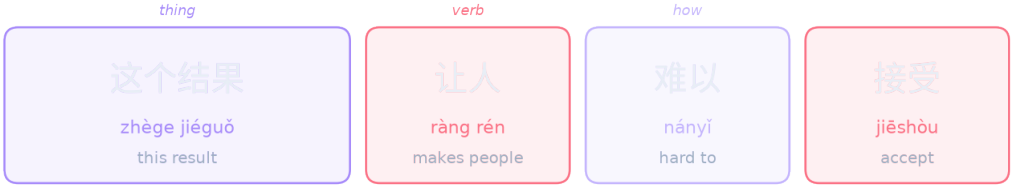
How it works. 难以 is the formal way to say "hard to". It takes a two-syllable verb. In everyday speech, or with a one-syllable verb, use 很难 + verb.

难以理解	很难说	很难吃
hard to understand (formal)	hard to say (speech)	tastes bad (not "hard to eat")

Watch out

- *wrong:* 难以懂 → 难以理解 / 很难懂.
- 很难吃 / 很难看 = tastes bad / looks ugly.

难以 + two-syllable verb: hard to (formal)



41. 不止 (more than / not only)

Form: 不止 + amount · 不止 + person / group

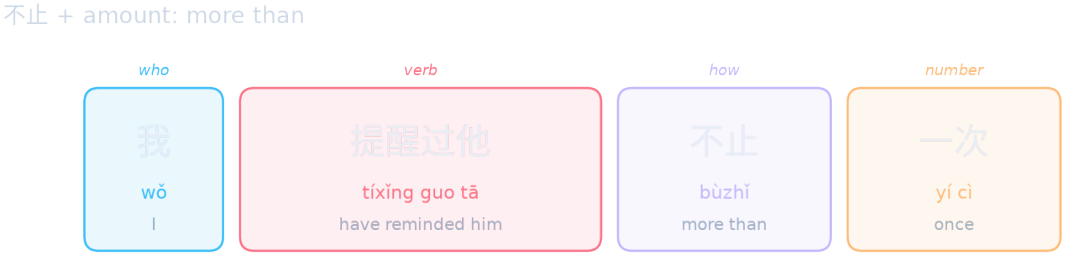
- **我提醒过他不止一次。** *Wǒ tíxǐng guo tā bùzhǐ yí cì.* – I reminded him more than once.
- **他看起来不止六十岁。** – He looks older than sixty.
- **不止他一个人这么想。** – He's not the only one who thinks so.

How it works. Before an amount, 不止 means "more than". Before a person or group, it means "not only". The opposite of 不止 + amount is 不到 (less than).

不止一百人	不到一百人	超过一百人
more than a hundred people	fewer than a hundred	over a hundred (exact, neutral)

Watch out

- 不止 (more than) is not 不到 (less than).



42. 将近 (nearly, just under)

Form: 将近 + amount (time, age, number, part)

- **这座桥已经有将近一百年了。** *Zhè zuò qiáo yǐjīng yǒu jiāngjìn yìbǎi nián le.* – This bridge is nearly a hundred years old.
- **将近一半的学生选了这门课。** – Nearly half the students chose this course.
- **将近十二点了，快睡吧。** – It's nearly twelve – go to sleep.

How it works. 将近 means "nearly": the real amount is a little below the number. It is a little formal. For a little more, use 多 / 不止; for "about" either way, 差不多 / 左右; for "almost" with any verb, 几乎.

将近一百年	一百多年	我几乎忘了
nearly 100 years	over 100 years	I almost forgot

Watch out

- 将近 is always just under the number.

43. 起码 (at the very least)

Form: 起码 + verb / amount · 起码的 + noun · 最起码

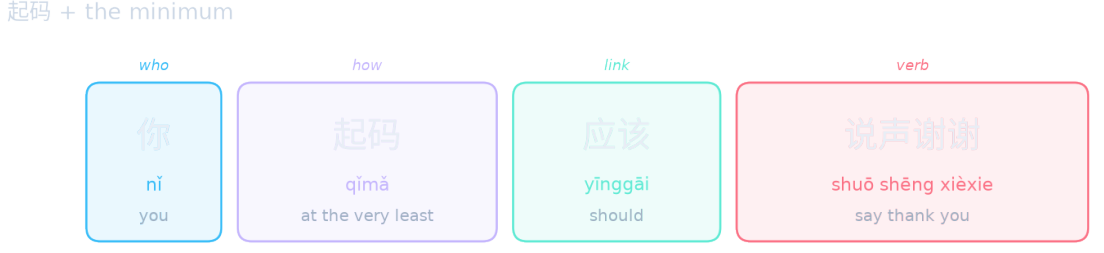
- **人家帮了你一整天，你起码应该说声谢谢。** *Rénjia bāng le nǐ yì zhěng tiān, nǐ qǐmǎ yīnggāi shuō shēng xièxie.* – They helped you all day – the very least you should do is say thank you.
- **从这儿走过去起码要半个小时。** – Walking there takes at least half an hour.
- **这是做人起码的礼貌。** – That's the most basic courtesy a person should have.

How it works. 起码 sets the lowest acceptable amount or action; it is spoken and sounds a little stronger than 至少 (最起码 is stronger still). Unlike 至少, it can describe a noun: 起码的 + noun = the most basic ….

起码要半个小时	起码的要求	至少一个小时
takes at least half an hour	the minimum requirement	at least an hour

Watch out

- *wrong:* 至少的要求 → 起码的要求.



44. 颇, 异常 and 万分 (formal “quite / very”)

Form: 颇 (为) + adjective / verb · 异常 + adjective · 万分 + feeling

- **这本书颇受欢迎。** *Zhè běn shū pō shòu huānyíng.* – This book is quite popular.
- **今年夏天异常炎热。** – This summer is unusually hot.
- **我们万分感谢。** – We are extremely grateful.

How it works. Three written degree words. 颇 = quite, rather; 异常 = unusually (alone: abnormal); 万分 = extremely, mostly with feelings. In speech say 挺 / 很 / 非常.

颇有道理	异常炎热	万分着急
quite reasonable	unusually hot	extremely anxious

Watch out

- 万分 mostly goes with feelings: *wrong:* 万分高.

45. 接连 vs 连续 (in a row)

Form: 接连 + verb (+ number) · 连续 + time / verb

- **他接连打了三个电话。** *Tā jiēlián dǎ le sān ge diànhuà.* – He made three calls in a row.
- **最近接连出了几件怪事。** – Several strange things have happened one after another lately.
- **我们队连续三年得了冠军。** – Our team has won the championship three years in a row.

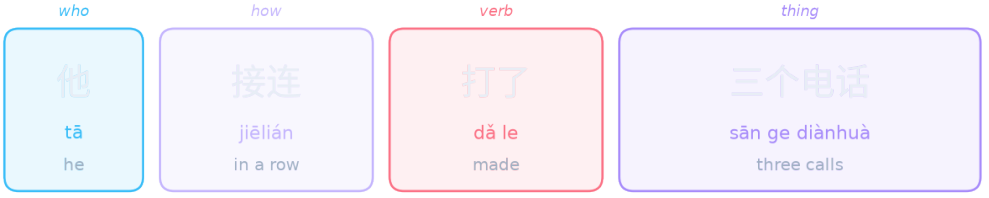
How it works. 接连 describes separate events that happen one right after another, often to you. 连续 = without a break (one activity over time, records). 陆续 = one after another over a period of time.

接连打了三个电话	连续工作十个小时	客人陆续到了
three calls in a row	work ten hours straight	guests arrived over time

Watch out

- *wrong:* 我打算接连学三个小时 → 我打算连续学三个小时.

接连 + verb: in a row



46. 大致 vs 大概 (roughly, in outline)

Form: 大致 + 了解 / 相同 / 分为 … · 大致的 + noun

- **我大致看懂了这篇文章。** *Wǒ dàzhì kàn dǒng le zhè piān wénzhāng.* – I roughly understood this article.
- **两个方案大致相同，只是价格不一样。** – The two plans are roughly the same; only the price is different.
- **他大概不来了。** – He's probably not coming.

How it works. 大致 gives the main outline, not every detail. 大概 is roughly (numbers) or probably (guesses). 基本上 = for the most part.

大致了解	大概不来了	基本上写完了
know roughly	probably not coming	mostly finished

Watch out

- *wrong:* 他大致不来了 → 他大概不来了.

大致 + verb: roughly, in outline

47. 何必 (why bother / no need)

Form: (subject) + (又) + 何必 + verb + (呢)?

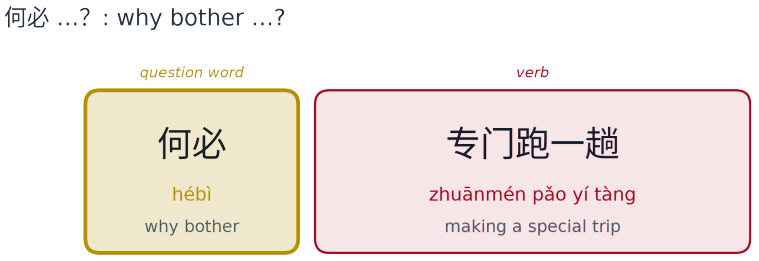
- **何必专门跑一趟？下次见面再给我就行了。** *Hébì zhuānmén pǎo yí tàng?* – Why make a special trip? Just give it back next time.
- **你何必这么客气？** – There's no need to be so polite.
- **既然他不喜欢，你又何必勉强他？** – Since he doesn't like it, why force him?

How it works. 何必 *hébì* "why bother" is a rhetorical question: the answer, "there's no need", is built in. It gently advises against something unnecessary, and 呢 often ends it (何必呢？).

何必担心呢?	你不必担心
rhetorical, softer, persuasive	plain statement: no need

Watch out

- Don't answer 何必 with a reason; it isn't really asking why.



48. 无非 (nothing but / merely)

Form: (what ...) + 无非 (是 / 想) + ordinary content

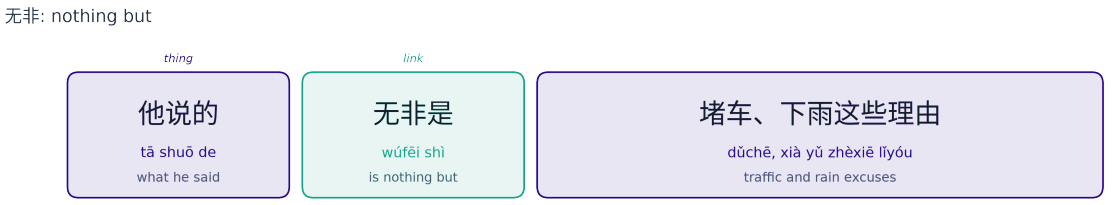
- **他说的无非是堵车、下雨这些理由。** *Tā shuō de wúfēi shì dǔchē, xià yǔ zhèxiē lǐyóu.* – His reasons are nothing but the usual: traffic, rain.
- **大家讨论的无非是两个问题：时间和钱。** – The discussion came down to two things: time and money.
- **他这么做，无非是想引起注意。** – He's only doing it to get attention.

How it works. 无非 *wúfēi* "nothing but, simply" sums something up as no more than the ordinary items named. It is often dismissive. Typical forms are 无非是 and 无非想 / 要.

只是 / 不过	无非
only, just (neutral)	nothing more than (summing up, dismissive)

Watch out

- What follows should be ordinary or limited; 无非 doesn't introduce surprising news.



49. 到时候 (when the time comes)

Form: (future event …)，到时候 + (subject) + action

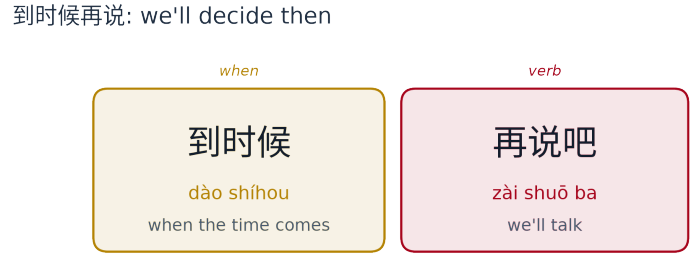
- **到时候再说吧。** *Dào shíhou zài shuō ba.* – Let's deal with it when the time comes.
- **你现在不复习，到时候就来不及了。** – If you don't revise now, it'll be too late when the time comes.
- **下周开会，到时候大家都要发言。** – There's a meeting next week; everyone will have to speak then.

How it works. 到时候 "when the time comes, then" points to a **future** moment that is already known (the trip, the exam, the meeting). It usually starts its clause.

到时候	当时 / 那时候
then (future)	at that time (past)
到时候你就知道了	当时我还很小

Watch out

- The moment must be clear from context; for the past use 当时.



50. 迟早 / 早晚 (sooner or later)

Form: subject + 迟早 / 早晚 + 会 / 要 + verb (+ 的)

- **你迟早会明白的。** *Nǐ chízǎo huì míngbai de.* – You'll understand sooner or later.
- **你天天熬夜，身体迟早会出问题。** – You stay up late every night; sooner or later your health will suffer.
- **别着急，问题迟早能解决。** – Don't worry, the problem will be solved sooner or later.

How it works. 迟早 says something is certain to happen, though the time is unknown. 会 usually follows. 早晚 means the same and is more spoken.

他迟早会来的	他早晚会后悔的	早晚各吃一次药
he'll come sooner or later	he'll regret it sooner or later (spoken)	morning and evening

Watch out

- Future only: *wrong:* 他迟早来了 → 他迟早会来的.

51. 务必 (be sure to – formal request)

Form: (请) 务必 + action · 务必不要 + action

- **请务必准时参加。** *Qǐng wùbì zhǔnshí cānjiā.* – Please be sure to attend on time.
- **出门前务必关好门窗。** – Be sure to close the doors and windows before you leave.
- **请大家务必在周五之前交报告。** – Everyone, please make sure you hand in your reports before Friday.

How it works. 务必 makes a firm but polite request: this must not be forgotten. It is formal and common in notices, emails and instructions.

务必	必须	一定要
be sure to (formal request)	must (a rule)	be sure to (spoken)

Watch out

- "Be sure not to" = 务必不要, not *wrong:* 不务必.
- For a rule, use 必须.

52. 反之 vs 相反 and 否则 (conversely)

Form: condition A → result；反之，→ opposite result

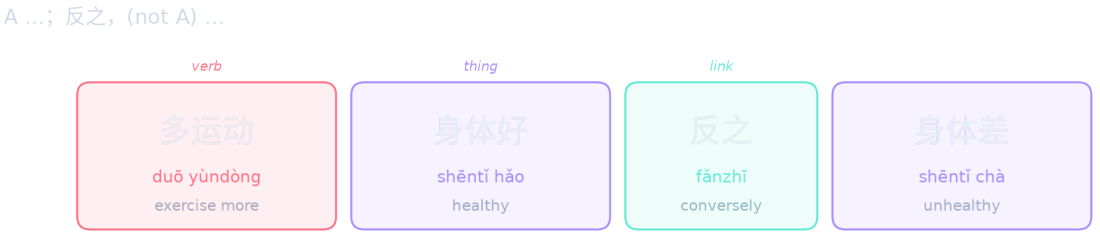
- **经常运动的人身体好；反之，不运动的人容易生病。** *Jīngcháng yùndòng de rén shēntǐ hǎo; fǎnzhī, bú yùndòng de rén róngyì shēngbìng.* – People who exercise often are healthy; conversely, people who don't get ill easily.
- **价格低，买的人就多；反之，买的人就少。** – When prices are low, many people buy; when they aren't, few do.
- **他没生气，相反，他很高兴。** – He wasn't angry – on the contrary, he was very happy.

How it works. 反之 states what happens in the opposite case, in formal writing. 相反 = on the contrary (the reality is the opposite). 否则 / 要不然 = otherwise (a warning).

反之	相反	否则 / 要不然
conversely	on the contrary	otherwise

Watch out

- 反之 is written; in speech, say the opposite case in full (不运动就 ……).



53. 不禁 / 不由得 (can't help – a reaction)

Form: trigger, subject + 不禁 / 不由得 + reaction

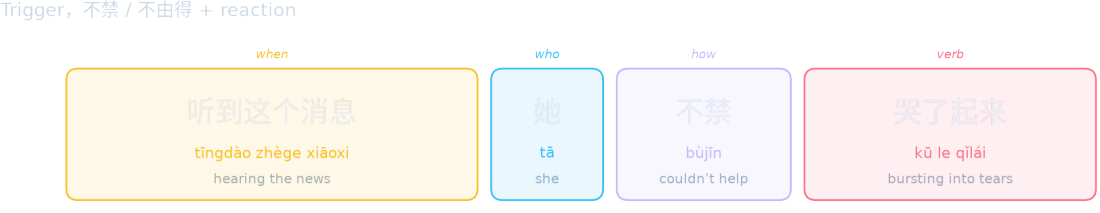
- **听到妈妈的声音，她不禁哭了起来。** *Tīngdào māma de shēngyīn, tā bùjīn kūle qǐlái.* – Hearing her mother's voice, she couldn't help bursting into tears.
- **看到这张老照片，我不禁想起了小时候。** – Seeing this old photo, I couldn't help remembering my childhood.
- **他说得那么认真，不由得你不信。** – He said it so seriously that you couldn't help believing him.

How it works. 不禁 and 不由得 describe a feeling or reaction someone could not hold back. The trigger comes first. They are written style; 忍不住 is the spoken word and also works for the future.

她不禁笑了	我怕我会忍不住笑
she couldn't help laughing (what happened)	I'm afraid I'll laugh (future: 忍不住)

Watch out

- Not for plans or orders: *wrong:* 明天我不禁去.
- After the subject: *wrong:* 不禁她笑了 → 她不禁笑了.



54. 动不动就 (at the slightest thing)

Form: subject + 动不动 + 就 + verb

- **他动不动就生气。** *Tā dòngbudòng jiù shēngqì.* – He gets angry at the slightest thing.
- **这孩子动不动就哭。** – This child cries at the slightest thing.
- **现在的年轻人动不动就换工作。** – Young people these days change jobs at the drop of a hat.

How it works. 动不动就 complains that something happens too easily and too often. 就 always follows 动不动.

他动不动就迟到	他总是迟到	他经常帮助别人
late at the slightest excuse (annoyed)	always late	often helps others (a good habit)

Watch out

- *wrong:* 他动不动迟到 → 他动不动就迟到.
- Not for good habits: use 经常.

55. 索性 (might as well / simply)

Form: reason, subject + 索性 + action

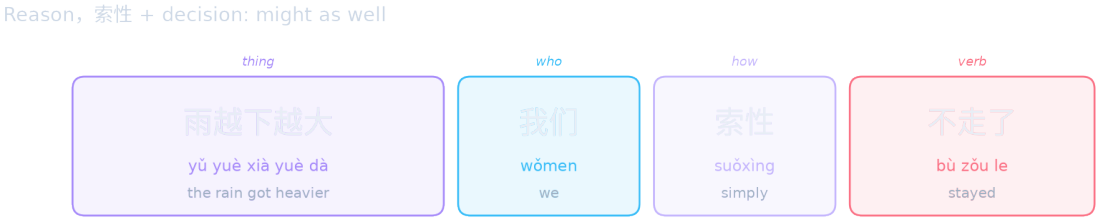
- **雨越下越大，我们索性不走了。** *Yǔ yuè xià yuè dà, wǒmen suǒxìng bù zǒu le.* – The rain kept getting heavier, so we just stayed.
- **既然已经迟到了，我索性不去了。** – Since I'm already late, I might as well not go at all.
- **这台电脑老是坏，索性买台新的吧。** – This computer keeps breaking – let's just buy a new one.

How it works. 索性 marks a clear-cut decision after a frustrating situation, often going all the way instead of a half-measure. 干脆 means the same and is more spoken.

索性不去了	干脆打车吧	他很干脆
might as well not go (written)	let's just take a taxi (spoken)	he's straightforward (only 干脆)

Watch out

- 索性 goes before an action, not an adjective: *wrong:* 我索性很累.
- The reason comes first.



56. 顿时 (at once – a sudden change)

Form: event，(subject) 顿时 + change of state or feeling

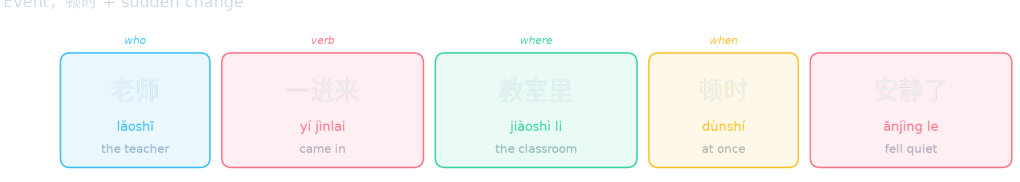
- **老师一进来，教室里顿时安静了。** *Lǎoshī yí jìnlai, jiàoshì li dùnshí ānjìng le.* – The moment the teacher came in, the classroom went quiet.
- **听了这句话，他顿时明白了。** – When he heard this, he understood at once.
- **听到这个好消息，大家顿时高兴得跳了起来。** – Hearing the good news, everyone jumped for joy at once.

How it works. 顿时 tells how a scene or feeling changed immediately after an event. It is written and describes what happened, so it never gives an order or a plan (use 立刻). For a surprise with no cause before it, use 忽然.

顿时安静了	你立刻过来!	电话忽然响了
went quiet at once	come here right now!	the phone suddenly rang

Watch out

- *wrong:* 你顿时过来 → 你立刻过来.



57. 随即 (immediately after that)

Form: action 1 (后 / 了), 随即 + action 2

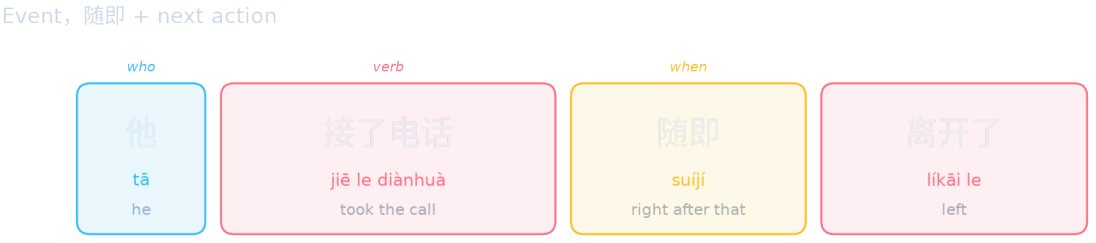
- **他接了一个电话，随即离开了会场。** *Tā jiē le yí ge diànhuà, suíjí líkāi le huìchǎng.* – He took a phone call and left the meeting right after.
- **比赛结束后，记者随即采访了冠军。** – After the match, reporters interviewed the winner straight away.
- **消息公布后，网上随即出现了很多评论。** – As soon as the news came out, lots of comments appeared online.

How it works. 随即 joins two actions in a written story or report: the second follows the first at once. It can't give an order (use 立即). 随后 means "afterwards, a little later".

随即离开了	请立即离开	我们随后就到
left right after	please leave immediately	we'll be there shortly

Watch out

- *wrong:* 请随即离开 → 请立即离开.



58. 依次 vs 轮流 and 陆续 (in turn)

Form: 依次 + verb · A、B、C 依次是 …

- **请大家依次上车。** *Qǐng dàjiā yīcì shàng chē.* – Please get on the bus one by one, in order.
- **他依次介绍了三个方案。** – He presented the three plans one by one.
- **获得前三名的依次是小王、小李和小张。** – First, second and third went to Xiao Wang, Xiao Li and Xiao Zhang.

How it works. 依次 means "in turn, in a fixed order"; it is formal (notices, reports). 轮流 = take turns (each person in turn); 陆续 = one after another at different times. In speech: 一个一个地 / 按顺序.

Auxiliary words

HSK 6

来着 at the end of a sentence helps you recall something from the recent past: 你刚才说什么来着? ("What was it you just said?"). It is spoken and friendly, and it often goes with a question word when you have forgotten a detail.

Sentence + 来着 (recalling the recent past)

Form: sentence + 来着 (spoken)

- **他叫什么名字来着?** *Tā jiào shénme míngzi láizhe?* – What was his name again?
- **你刚才说什么来着?** *Nǐ gāngcái shuō shénme láizhe?* – What did you just say?
- **我昨天还看见他来着。** *Wǒ zuótiān hái kànjiàn tā láizhe.* – I saw him only yesterday.
- **那家饭馆在哪儿来着? 我上次去过。** *Nà jiā fànguǎn zài nǎr láizhe? Wǒ shàng cì qùguo.* – Where was that restaurant again? I went there last time.
- **我们几点见面来着?** *Wǒmen jǐ diǎn jiànmiàn láizhe?* – What time were we meeting again?
- **老师上课的时候讲过这个问题来着。** *Lǎoshī shàngkè de shíhou jiǎngguo zhège wèntí láizhe.* – The teacher went over this question in class, remember.

How it works. 来着 *láizhe* sits at the very end of a sentence, and it always looks back at something in the recent past that the speaker already knew or experienced.

In a **question** with a question word (什么, 哪儿, 几点, 谁), it admits that you knew the answer once and have forgotten: "… again?" It is a polite, natural way to ask for a reminder, because it tells the listener you are not asking for new information. In a **statement**, it recalls a recent event as a reminder or a mild point: 我昨天还看见他来着 ("and yet I saw him only yesterday").

他叫什么名字?	他叫什么名字来着?
asks for new information	asks to be reminded of something you knew
meeting someone new	the name is on the tip of your tongue

Watch out

- Only for the past, never the future: *wrong:* 我明天去北京来着 → 我明天去北京.
- A 来着 question uses a question word, not 吗: *wrong:* 你去过那儿来着吗? → 你去过那儿吗? or 你去过哪儿来着?
- Very colloquial: keep it out of essays and formal emails.

In a passage

Answers and explanations

Mark your work, then correct each mistake in your own words.

1. 来着

来着 = what was it again?

2. C. The speaker knew it but has forgotten.

3. 我昨天还看见他来着。

Statement + 来着 recalls the recent past.

4. False.

False. 来着 is colloquial and belongs in conversation. In formal writing you would simply ask 他叫什么名字? or restate the information.

5. Model answer: 他叫什么名字来着?

Check your answer:

- 来着 is for things in the recent past; it cannot describe the future.
- Keep it out of formal writing; 他说什么来着 is the basic form, and 了 may also appear (他说了什么来着) depending on the sentence.

■ Mixed practice

For arguing, 固然 admits a point before a stronger one, 并非 … 而是 corrects a wrong idea, 况且 adds a reason, 即便 … 也 holds firm whatever happens, and 进而 takes the next step. Use them in reports and essays rather than in conversation.

At a glance

- **1.** 以便 – so as to / in order to: 请留下您的电话，以便我们联系您。
- **2.** 以免 – so as to avoid: 你带上雨伞，以免淋湿。
- **3.** 以及 – as well as / and: 参加会议的有经理、工程师以及部分客户。
- **4.** 则 – while / whereas – formal contrast: 北方人爱吃面，南方人则爱吃米饭。
- **5.** 总之 – in short / in a word: 总之，我们下周五出发。
- **6.** 固然 … 但 … – admittedly …, but …: 钱固然重要，但健康更重要。

- **8.** 况且 – besides – one more reason: 这么晚了，况且又下着雨，你就住在这儿吧。
- **9.** 即便 … 也 … – even if – formal: 即便明天下雨，比赛也会照常进行。
- **10.** 进而 – and then go further: 我们要先了解学生的需要，进而改进教学方法。
- **11.** 以致 vs 以便 and 以免 – result / goal / to avoid: 他平时不努力，以致考试没通过。

1. 以便 (so as to / in order to)

Form: action，以便 + wanted goal

- **请留下您的电话，以便我们联系您。** *Yǐbiàn wǒmen liánxì nín.* – Please leave your number so that we can contact you.
- **我们把时间提前了，以便大家早点儿回家。** – We moved the time earlier so everyone can get home sooner.
- **请保留收据，以便日后查询。** – Please keep the receipt for future reference.

How it works. 以便 *yǐbiàn* “so that, in order to (make it easier)” starts the second clause and gives the purpose the action serves. It is formal, typical of instructions and notices.

为了 + goal，action	action，以便 / 好 + goal	action，以免 + bad result
goal first	goal after (好 is spoken)	avoid something
为了方便联系，请留下电话	留个电话，好联系你	带伞，以免淋湿

2. 以免 (so as to avoid)

Form: precaution，以免 + unwanted result

- **你带上雨伞，以免淋湿。** *Nǐ dàishang yǔsǎn, yǐmiǎn línshī.* – Take an umbrella so you don't get soaked.
- **开车时不要看手机，以免发生事故。** – Don't look at your phone while driving, to avoid accidents.
- **把药放在高处，以免孩子拿到。** – Keep the medicine up high, out of children's reach.

How it works. 以免 *yǐmiǎn* "so as to avoid, lest" begins the second clause. The first clause is the precaution, and the second is the bad result to avoid. It is formal, typical of instructions and notices; in speech use 免得 / 省得 (早点儿走，免得堵车).

以免 + bad result	以便 + good goal
以免迟到	以便准时到

Watch out

- No 不 after 以免: *wrong:* 以免不迟到 → 以免迟到 (以免 already contains the "not").

以免: so as to avoid

3. 以及 (as well as / and)

Form: A、B 以及 C

- **参加会议的有经理、工程师以及部分客户。** … *yǐjí bùfen kèhù.* – Attending were the manager, the engineers and some of the clients.
- **大家讨论了活动的时间、地点以及费用。** – We discussed the time, place and cost of the event.
- **怎么去以及什么时候去，还没决定。** – How and when to go haven't been decided.

How it works. 以及 *yǐjí* is a formal "and, as well as" before the **last** item of a list. It often adds something of a slightly different kind or lower rank (部分客户). Unlike 和, it can easily join long phrases and question clauses.

和	及	以及
everyday "and"	compact written: 学生及家长	formal, joins longer phrases

Watch out

- Use it once, before the last item: *wrong:* A 以及 B 以及 C → A、B 以及 C.
- In casual speech, 和 is more natural.

以及: as well as (formal list)

4. 则 (while / whereas – formal contrast)

Form: A + comment，B + 则 + contrasting comment ·(如果) condition，则 + result

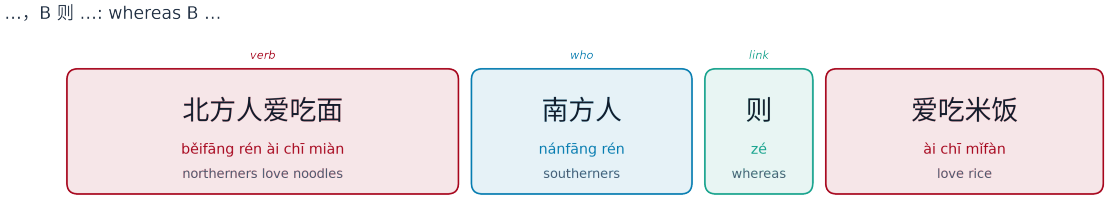
- **北方人爱吃面，南方人则爱吃米饭。** *Nánfāng rén zé ài chī mǐfàn.* – Northerners love noodles, whereas southerners prefer rice.
- **他喜欢安静，我则喜欢热闹。** – He likes quiet; I, on the other hand, like a lively atmosphere.
- **如果温度超过一百度，则水会沸腾。** – If the temperature exceeds 100 degrees, the water will boil.

How it works. 则 *zé* is written and formal. In a contrast, it sits **after** the second subject: "whereas". In a condition, it means "then", as in the proverb 欲速则不达 "more haste, less speed".

北方冷，而南方暖和	北方冷，南方则暖和
而 starts the clause	则 follows the subject

Watch out

- *wrong:* 则南方人爱吃米饭 → 南方人则爱吃米饭.
- In speech, use 而 / 但是 / 可是.



5. 总之 (in short / in a word)

Form: points …。总之，+ summary

- **价格太高，质量一般，服务也不好。总之，我不推荐。** *Zǒngzhī, wǒ bù tuījiàn.* – The price is too high, the quality average, the service poor. In short, I don't recommend it.
- **总之，我们下周五出发。** – So, to sum up: we leave next Friday.

How it works. 总之 *zǒngzhī* "in short, all in all" begins a sentence that pulls earlier points into one conclusion. 总而言之 is the full, more formal version.

总之	反正
sums up the points made	anyway (my mind is made up): 反正我不去

Watch out

- 总之 comes **after** the details; it can't open a discussion.

6. 固然 … 但 … (admittedly …, but …)

Form: A 固然 + point，但 / 可是 + stronger point · A 固然 …，B 也 …

- **钱固然重要，但健康更重要。** *Qián gùrán zhòngyào, dàn jiànkāng gèng zhòngyào.* – Money is important, of course, but health matters more.
- **这个办法固然好，但太费时间了。** – This method is good, admittedly, but it takes too much time.
- **考上大学固然好，考不上也没关系。** – Getting into university is good, of course, but not getting in is OK too.

How it works. 固然 accepts a point ("I grant you that") before you move to a stronger one with 但. With 也, both sides are fine. 固然 usually goes after the subject.

虽然 … 但是 …	固然 … 但 …	固然 … 也 …
although … but … (two facts)	admittedly … but … (an argument)	… is good, … is fine too

Watch out

- *wrong:* 钱重要固然 → 钱固然重要 (usually after the subject).

7. 并非 (is not – formal); 并非 A，而是 B

Form: 并非 + noun / idea · 并非 A，而是 B

- **她的成功并非偶然，而是多年努力的结果。** *Tā de chénggōng bìngfēi ǒurán, ér shì duō nián nǔlì de jiéguǒ.* – Her success was no accident; it was the result of years of hard work.
- **这件事并非你想的那么简单。** – This matter is not as simple as you think.
- **他并非不想帮忙，而是实在没有时间。** – It's not that he doesn't want to help; he really has no time.

How it works. 并非 is a formal 并不是. It denies an idea someone might hold; 而是 then gives the real answer.

并非偶然	并不难	不是 A，而是 B
is no accident (formal, + noun / idea)	isn't hard at all (+ adjective)	not A but B (everyday)

Watch out

- 并非 already contains 是: write 这并非我的错, not 并非是.
- Before a plain adjective, use 并不.

8. 况且 (besides – one more reason)

Form: reason，况且 (又 / 也 / 还) + reason，(decision)

- **这么晚了，况且又下着雨，你就住在这儿吧。** *Zhème wǎn le, kuàngqiě yòu xià zhe yǔ, nǐ jiù zhù zài zhèr ba.* – It's so late, and besides, it's raining – just stay here.

- **他已经二十岁了，况且还有朋友帮他。** – He's twenty already, and besides, he has friends to help him.

How it works. 况且 adds one more reason, often a stronger one, to back up a suggestion or decision. 又, 也 or 还 often follow it.

而且	况且	何况
and also (neutral)	besides (one more reason)	let alone; also "besides"

Watch out

- 况且 brings a reason, not the decision.
- It joins clauses, not single words.

9. 即便 … 也 … (even if – formal)

Form: 即便 + possible case，subject + 也 / 都 / 还 + result ·即便如此，…

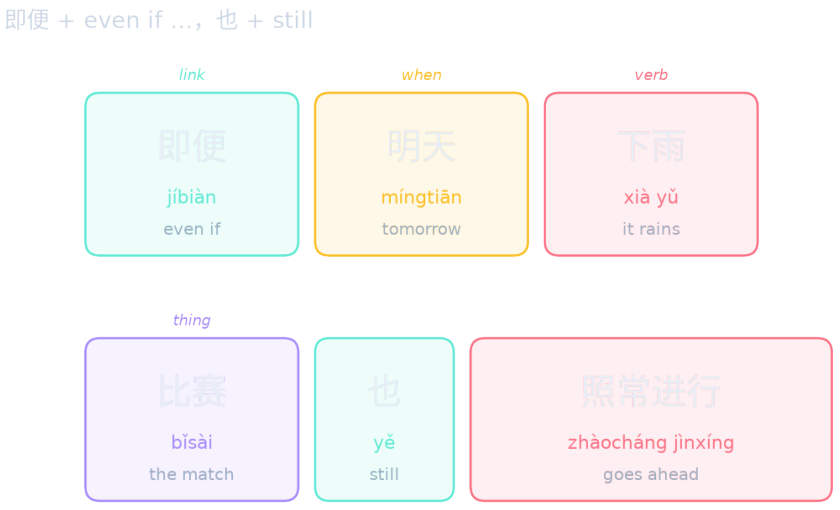
- **即便明天下雨，比赛也会照常进行。** *Jíbiàn míngtiān xià yǔ, bǐsài yě huì zhàocháng jìnxíng.* – Even if it rains tomorrow, the races will go ahead as usual.
- **即便你不同意，我也要试一试。** – Even if you don't agree, I still want to give it a try.
- **这份工作很辛苦。即便如此，他也从来不抱怨。** – The job is very hard. Even so, he never complains.

How it works. 即便 is a formal 即使 ("even if"). The second clause, with 也, says the result stays the same. 即便如此 means "even so".

即使 / 即便 / 哪怕	尽管
even if (usually a possible case; neutral / formal / spoken)	although (a real fact)

Watch out

- Pair 即便 with 也, not 但是.
- 也 comes after the subject of the second clause.



10. 进而 (and then go further)

Form: (先) step 1，进而 + a further step

- **我们要先了解学生的需要，进而改进教学方法。** *Wǒmen yào xiān liǎojiě xuésheng de xūyào, jìn'ér gǎijìn jiàoxué fāngfǎ.* – We must first understand students' needs, and then go on to improve our teaching methods.

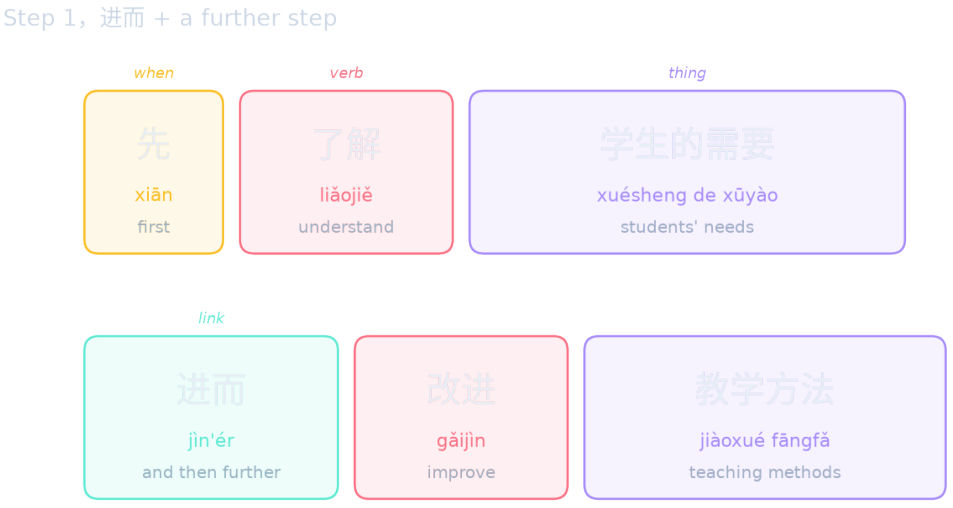
- **这次活动让大家认识了彼此，进而成为了好朋友。** – The event let everyone get to know each other, and then become good friends.

How it works. 进而 says one step leads on to a further, higher step. It is formal and the subject usually stays the same.

然后	从而	进而
then (time order)	and so (the result)	and then, further (the next step up)

Watch out

- *wrong:* 我先吃饭，进而去学校 → 我先吃饭，然后去学校.



11. 以致 vs 以便 and 以免 (result / goal / to avoid)

Form: cause，以致 + (bad) result ，…，以便 + goal ，…，以免 + result to avoid

- **他平时不努力，以致考试没通过。** *Tā píngshí bù nǔlì, yǐzhì kǎoshì méi tōngguò.* – He didn't work hard during the term, so in the end he failed the exam.
- **请提前通知，以便大家安排时间。** – Please give notice in advance, so that everyone can plan their time.
- **出门带上伞，以免淋雨。** – Take an umbrella so you don't get wet.

How it works. 以致 links a cause to a result, usually bad; it is formal. A goal you want takes 以便; a result you want to avoid takes 以免. 以至于 is close to 以致 but can also mean "to the point that".

以致考试没通过	以便大家安排时间	以免淋雨
with the result that he failed	so that everyone can plan	so as not to get wet

Watch out

- A purpose takes 以便, not 以致.

Nouns

HSK 6

Two formal noun patterns. 本 + noun means “this” or “our own” in notices: 本校, 本次活动, 本人. Word + 性 turns a word into a quality, like English -ness or -ity: 重要性 (importance), 可能性 (possibility).

At a glance

- **1.** 本 + Noun – this / our / one’s own: 本店营业时间为早上九点到晚上十点。
- **2.** Word + 性 – -ness / -ity: 这款车的安全性很高。

1. 本 + Noun (this / our / one’s own)

Form: 本 + organisation / time / person noun (formal “this, our, one’s own”)

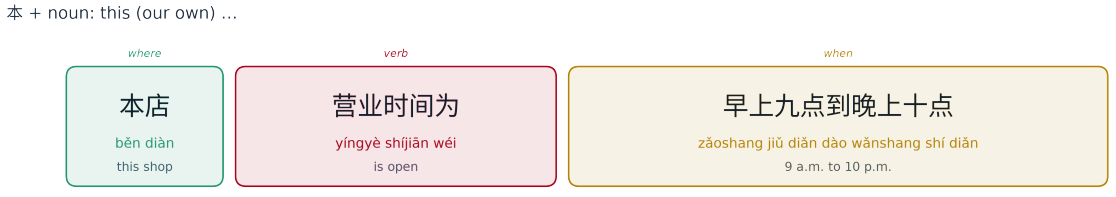
- **本店营业时间为早上九点到晚上十点。** *Běn diàn yíngyè shíjiān wéi …* – This shop is open from 9 a.m. to 10 p.m.
- **本周五下午停水。** – There is no water this Friday afternoon.
- **需要本人签字。** – The person concerned must sign in person.

How it works. In notices and announcements, 本 *běn* refers to the speaker’s own organisation (本店, 本校, 本公司) or to the current period (本周, 本月, 本次). 本人 means “I myself / the person concerned”, and 本地 means local (本地人, 本地菜).

本 + noun	Everyday equivalent
本店	我们店
本校	我们学校
本周	这个星期

Watch out

- No 的 or measure word: *wrong:* 本个公司 → 本公司.
- 本 is also the measure word for books (一本书); before an organisation or time word it means “this / our”.



exercises.lol exercises.com.cn

2. Word + 性 (-ness / -ity)

Form: word + 性 → abstract noun (-ness, -ity) + 高 / 大 / 强 …

- **下雨的可能性很大。** – There's a high chance of rain.
- **这个工作的灵活性比较强。** – This job is quite flexible.

How it works. 性 *xìng* turns a word into an abstract quality noun, common in reports and science. Being a noun, it takes 高 / 大 / 强 / 低 as its description.

Base	+ 性	Meaning
安全	安全性	safety
重要	重要性	importance
可能	可能性	possibility, likelihood
必要	必要性	necessity
积极	积极性	enthusiasm, motivation

Particles

HSK 6

Five particles. 是否 and 与否 both ask "whether or not" in formal writing; …… 之 …… is a literary 的; 嘛 says something is obvious; and 呗 gives a relaxed, shrugging answer. Notice the range: the first three are formal, the last two are spoken.

At a glance

- **1.** 是否 – whether or not: 请说明您是否申请过本项目。
- **2.** … 与否 – whether … or not: 能否赢得比赛，取决于平时的训练。
- **3.** Noun + 之 + Noun – a literary 的: 他是我最好的朋友之一。
- **4.** Statement + 嘛 – self-evident: 周末嘛，人当然多。
- **5.** Sentence + 呗 – a casual shrug: 不会就学呗，又不难。

1. 是否 (whether or not)

Form: (subject) + 是否 + verb / adjective

- **请说明您是否申请过本项目。** *Qǐng shuōmíng nín shìfǒu shēnqǐngguo běn xiàngmù.* – Please state whether you have applied for this programme before.
- **您是否同意这个方案?** – Do you agree with this proposal?
- **我不知道他是否会来。** – I don't know whether he'll come.

How it works. 是否 *shìfǒu* "whether (or not)" is the formal 是不是. It goes before the verb, in direct questions and in reported ones (不知道 …… 是否 ……).

Spoken	Formal
你是不是累了?	您是否需要帮助?
能不能按时完成	能否按时完成

Watch out

- No 吗: *wrong:* 您是否同意吗? → 您是否同意?
- 是否 already covers yes and no, so don't add 不 unless you mean it (是否不同意 asks whether you disagree).

exercises.lol exercises.com.cn

2. … 与否 (whether … or not)

Form: issue / predicate + 与否 (+ 取决于 / 关系到 …)

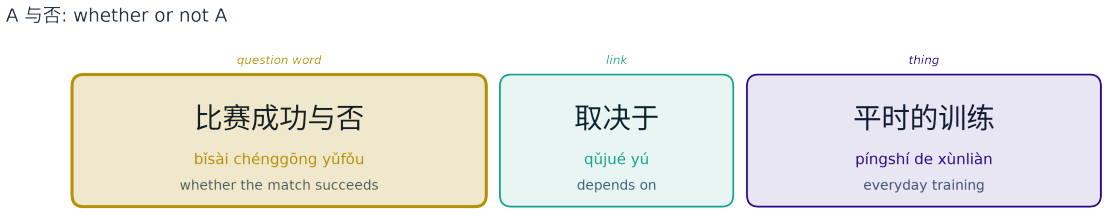
- **比赛成功与否，取决于平时的训练。** *Bǐsài chénggōng yǔfǒu, qǔjué yú píngshí de xùnliàn.* – Whether the match goes well depends on everyday training.
- **方法正确与否，关系到结果。** – Whether the method is right affects the result.
- **不管你喜欢与否，都要完成。** – Whether you like it or not, you have to finish.

How it works. 与否 *yǔfǒu* "whether … or not" goes **after** the word in question and turns the phrase into a noun-like topic. It is formal and common with 取决于, 关系到, 不管 and 无论.

是否成功	成功与否	成不成功
before the verb (formal)	after the word (formal topic)	spoken A-not-A

Watch out

- *wrong:* 与否成功 → 成功与否.



3. Noun + 之 + Noun (a literary 的)

Form: modifier + 之 + noun (literary 的) · fixed 之 phrases

- **西安是中国的古都之一。** *Xī'ān shì Zhōngguó de gǔdū zhī yī.* – Xi'an is one of China's ancient capitals.
- **这是原因之一。** – This is one of the reasons.
- **朋友之间应该互相帮助。** – Friends should help each other.

Phrase	Meaning
…… 之一	one of …
…… 之间	between …
…… 之前 / 之后	before / after …
成功之路	the road to success
中国之最	China's greatest

Watch out

- Don't replace everyday 的 with 之: *wrong:* 我之书 → 我的书.

… 之一: one of (a literary title)

4. Statement + 嘛 (self-evident)

Form: reason / topic + 嘛, comment · statement + 嘛

- **周末嘛，人当然多。** *Zhōumò ma, rén dāngrán duō.* – Well, it's the weekend; of course it's crowded.
- **手工做的嘛，贵一点儿很正常。** – It's handmade, after all, so it's normal for it to cost a bit more.
- **快点儿嘛！** – Come on, hurry up!

How it works. 嘛 *ma* presents something as obvious, a reason the listener should accept. After a topic (周末嘛) it sets up an obvious explanation; at the end of a request it softly insists. It is casual.

吗	嘛	吧	呗
yes/no question	it's obvious	suggestion or guess	shrug: no big deal
你知道吗?	你知道嘛	走吧	不会就学呗

Watch out

Sentence patterns – rhetoric & emphasis

HSK 6

Rhetorical patterns that make an argument stronger. Some ask a question that expects agreement (岂不是, 莫非), some insist (非 …… 不可, 非得 …… 不可), some compare choices (与其 …… 宁可, 莫过于) and some organise reasons (一来 …… 二来 ……, 由此). Each one is a fixed frame, so learn both halves together.

At a glance

Questions that persuade

- **1.** 岂不是 – wouldn't that be …?: 你不去的话，岂不是白花钱了?
- **2.** 莫非 – could it be that …?: 莫非今天放假?

Insisting

- **3.** 非 (要) … 不可 – simply must / insist on: 下这么大的雨，他非要去不可。
- **4.** 非得 … 不可 – absolutely must: 你烧得这么厉害，非得去医院不可。

Comparing and choosing

- **5.** 与其 A，宁可 / 宁愿 B – rather than … would rather: 与其在车里等，我宁可走路去。
- **6.** 莫过于 – nothing is more … than: 最开心的莫过于周末全家一起吃饭。
- **7.** 跟 … 似的 – just like / as if: 我的手冷得跟冰似的。
- **8.** 不愧是 – truly worthy of: 不愧是冠军，他跑得太快了!

Organising an argument

- **9.** 一来 … ，二来 … – firstly …, secondly …: 一来上班方便，二来房租也不贵。
- **10.** 由此 – from this / hence: 大多数学生每天睡不到七个小时，由此可见，学习压力很大。
- **11.** 兼 – doubling as / concurrently: 他是我们公司的经理兼技术员。
- **12.** 由 … 做主 – for … to decide: 这是你的人生，由你自己做主。

- **现在去的话，岂不是要迟到?** – If we go now, won't we be late?
- **你这么说，岂不是承认自己错了?** – By saying that, aren't you admitting you were wrong?

How it works. 岂不是 *qǐ bú shì* is a rhetorical "wouldn't that be …?": the speaker is sure of the answer and points out a consequence, often after a condition. It is

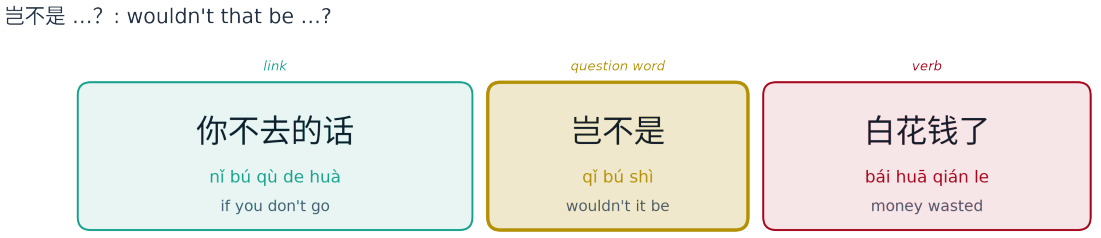
exercises.lol exercises.com.cn

somewhat literary; speech uses 那不就 …… 了吗? (那不就白花钱了吗?).

难道…… 吗?	岂不是……?
challenges a belief: 难道你不知道吗?	draws out a consequence: 那岂不是白跑一趟?

Watch out

- Don't answer it as a real question; it is making a point.



2. 莫非 (could it be that ...?)

Form: 莫非 + guess + (不成)?

- **莫非今天放假?** *Mòfēi jīntiān fàngjià?* – Could it be that today's a holiday?
- **他一直不接电话, 莫非出了什么事?** – He hasn't picked up all day; could something have happened?
- **莫非你忘了不成?** – Don't tell me you've forgotten?

How it works. 莫非 *mòfēi* introduces a surprised, suspicious guess: the speaker thinks it may be true but isn't sure. It is literary, and 不成 at the end adds force. Speech uses 是不是 or 难道.

难道 …… 吗?	莫非 ……?
challenge: expects "no"	suspicion: suspects "yes"
难道你不知道吗?	莫非他病了?

Watch out

- A guess, not a statement of fact.

莫非 …? : could it be that …?

必须 / 一定要	非 …… 不可
must (plain)	must, no way around it (emphatic)

Watch out

- The verb goes in the middle: *wrong:* 非不可去 → 非去不可.

非 … 不可: absolutely must

4. 非得 ... 不可 (absolutely must)

必须	非 …… 不可	非得 …… (不可)
neutral, written	emphatic	emphatic, spoken

Watch out

- **与其抱怨，不如想办法。** – Rather than complain, better to find a solution.
- **与其花钱买，我宁愿自己做。** – I'd rather make it myself than spend money buying one.

How it works. The option after 与其 *yǔqí* is **rejected**, and the one after 宁可 / 宁愿 / 不如 is **chosen**. 宁可 and 宁愿 give a firm personal choice, often with a sacrifice; 不如 recommends the better option.

exercises.lol exercises.com.cn

Pattern	Rejected option
与其 A，宁可 B	first
宁可 B，也不 A	second
与其 A，不如 B	first (recommendation)

Watch out

- 宁 is read *nìng*.
- Don't swap the halves: 与其 always marks the option you're giving up.

最重要的是健康	最重要的莫过于健康
plain statement	stronger: nothing is more important

Watch out

- Put one top example after it, not a list.

莫过于: nothing is more ... than

7. 跟 ... 似的 (just like / as if)

- **我的手冷得跟冰似的。** *Wǒ de shǒu lěng de gēn bīng shìde.* – My hands are as cold as ice.
- **他高兴得跟孩子似的。** – He was as happy as a child.
- **他说话的样子，好像什么都知道似的。** – The way he talks, you'd think he knew everything.

How it works. 跟 / 像 X 似的 *shìde* makes a vivid comparison, "like X", or an imagined one, "as if". It can follow a 得 degree phrase (冷得跟冰似的) or describe a noun (跟孩子似的脾气). It is spoken; writing prefers 像 …… 一样 or 仿佛.

像冰一样冷	冷得跟冰似的

Watch out

跟 ... 似的: just like

"If" statements

HSK 6

假使 …… 就 …… is a formal "if, supposing", mostly found in writing. It sets up an imagined situation: 假使明天停课，我们就在家学习. Nothing in the sentence says it will happen.

假使 ... ，就 ... (if / supposing)

Form: 假使 + condition，(subject) + 就 / 便 / 也 + result

- **假使人能活两百岁，生活会是什么样子？** *Jiǎshǐ rén néng huó liǎngbǎi suì, shēnghuó huì shì shénme yàngzi?* – Supposing people lived to two hundred, what would life be like?
- **假使没有你的帮助，我就不会成功。** *Jiǎshǐ méiyǒu nǐ de bāngzhù, wǒ jiù bú huì chénggōng.* – Without your help, I would not have succeeded.
- **假使明天下雨，比赛便改期。** *Jiǎshǐ míngtiān xià yǔ, bǐsài biàn gǎiqī.* – Should it rain tomorrow, the match will be rescheduled.
- **假使再给我一次机会，我一定会做得更好。** *Jiǎshǐ zài gěi wǒ yí cì jīhuì, wǒ yídìng huì zuò de gèng hǎo.* – If I were given one more chance, I would certainly do better.
- **假使地球上没有水，生命就不可能存在。** *Jiǎshǐ dìqiú shang méiyǒu shuǐ, shēngmìng jiù bù kěnéng cúnzài.* – If there were no water on Earth, life could not exist.
- **假使你遇到困难，也不要轻易放弃。** *Jiǎshǐ nǐ yùdào kùnnan, yě búyào qīngyì fàngqì.* – Even supposing you run into difficulties, don't give up lightly.

How it works. 假使 *jiǎshǐ* is a literary "if, supposing". It is used above all for imagined, unlikely or unreal situations (人能活两百岁, 地球上没有水), which is why it is common in essays, speeches, thought experiments and literature. The result clause takes 就, the more formal 便, or 也 when the result holds "even so"; a question can also follow (生活会是什么样子？).

Like other "if" words, the condition comes first, and 就 / 便 / 也 go after the subject of the result clause. Chinese has a ladder of "if" words from spoken to literary; choose by the register of what you are writing.

Spoken	Neutral	Literary
要是（……的话）	如果	假如 · 假使 · 倘若
要是下雨，我们就不去了。	如果有问题，请联系我。	假使没有水，生命便不能存在。

Watch out

- 就 goes after the subject of the result: *wrong:* 假使下雨，就比赛改期 → 假使下雨，比赛就改期.

- Do not pair it with 所以: *wrong:* 假使你努力，所以你会成功 → 假使你努力，你就会成功.
- In everyday speech 假使 sounds bookish; say 要是 or 如果.

In a passage

> 假使有一天，所有的手机都突然停止工作，我们的生活会变成什么样？人们也许会重新写信，在街上问路，和家人面对面地聊天。假使真是这样，生活便会慢下来，但也可能变得更加真实。

Read and notice. What imagined situation does the writer describe? Find the two results that follow 假使.

Practice

Cover the teaching pages before you answer. The answers are at the end.

1. Complete: “Supposing it rains, the match will be cancelled.” 假使下雨，比赛…… 取消。

2. Which “if” is the most spoken?

- A. 倘若
- B. 假如
- C. 要是
- D. 假使

3. Build: “Had it not been for your help, I wouldn’t have succeeded.”

Put in order: ， / 假使没有你的帮助 / 我就 / 不会成功。

4. True or false? 假使 suits formal essays better than casual chat. If false, correct it.

5. In a philosophy class you imagine an unlikely situation. Use 假使 … ，就 …. Write your answer in Chinese, then say it aloud.

Mixed practice

These questions mix the patterns and use new situations.

6. Choose 假使 or 即使: …… 明天停课，我们就在家学习。/ …… 明天停课，我们也要在家学习。

7. Which register fits 假使?

- A. A written report
- B. A text message to a friend

8. Find and fix the problem. A classmate reads 假使明天停课，我们就在家学习 as “Class is cancelled tomorrow.” Correct it.

9. Use it yourself. Give a back-up plan in case the hall is not available.

Answers and explanations

Mark your work, then correct each mistake in your own words.

假使 …，就 ….

2. C. 要是

要是 is the everyday spoken "if": 要是下雨就不去了. 如果 is neutral, while 假如, 假使 and 倘若 are more written or literary.

3. 假使没有你的帮助，我就不会成功。

假使 + condition, subject + 就 + result.

4. True.

True. 假使 is literary and fits formal essays. In casual chat you would use 要是 or 如果.

5. Model answer: 假使人能活两百岁，生活会是什么样子?

Check your answer:

- In everyday speech, use 如果 / 要是: 要是明天下雨，….
- Put 就 after the subject of the result: 我就不会 …, not 就我不会 ….

■ Mixed practice

6. 假使 …… 就 = supposing (the plan depends on it); 即使 …… 也 = even if (the plan stays the same).

7. A. 假使 is formal; in a message say 要是 or 如果.

8. 假使 imagines a situation: if class were cancelled, we would study at home. It has not been decided.

9. Model answer. 假使礼堂不能用，我们就在教室开会。

Review later. Tomorrow, rewrite one 如果 sentence with 假使.

Cause & effect statements

HSK 6

因为 …… 而 …… joins a cause to a result in formal writing: 他因为准备不足而失败. 而 comes directly before the result verb. It is more compact than 因为 …… 所以 …… and keeps both halves in one clause.

因为 ... 而 ... (because ..., thereby ...)

Form: subject + 因 (为) + cause + 而 + result

- **这个小镇因为一道菜而出名。** *Zhège xiǎozhèn yīnwèi yí dào cài ér chūmíng.* – This little town became famous for one dish.
- **很多人因为这部电影而爱上了中国。** *Hěn duō rén yīnwèi zhè bù diànyǐng ér àishàngle Zhōngguó.* – Many people fell in love with China because of this film.

- **这座城市因交通方便而吸引了很多企业。** *Zhè zuò chéngshì yīn jiāotōng fāngbiàn ér xīyǐnle hěn duō qǐyè.* – This city has attracted many businesses because of its good transport links.

How it works. 因 (为) A 而 B packs cause and result into **one** formal clause: "B because of A, B as a result of A". The subject comes first, then 因 or 因为 + the cause (a noun phrase or a short clause), then 而 + the result. The result after 而 is a verb phrase or adjective: 出名, 推迟, 放弃, 感动, 改变.

因 alone is more formal than 因为. Negatives and modal words go before 因为, not after 而: 我们**不能**因为一次失败而放弃. Adverbs of degree can stand between 而 and the result: 因 …… 而更加努力. This pattern is typical of news reports, essays and formal notices.

因为下雨，所以比赛取消了。	比赛因下雨而取消。
two clauses; everyday	one tight clause; formal
cause first	subject first, cause in the middle

Watch out

- No 所以 in this pattern: *wrong:* 比赛因为下雨而所以取消 → 比赛因为下雨而取消.
- The subject goes before 因: *wrong:* 因天气会议而推迟 → 会议因天气而推迟.
- Put 不能 / 没 before 因为: *wrong:* 我们因为一次失败而不能放弃 (this says failure *stops* you giving up) → 我们不能因为一次失败而放弃.

以公司的名义	借公司之名
on behalf of the company (neutral, official)	using the company as a cover (critical)

Watch out

- It accuses someone of a hidden motive: use it only when you mean to criticise.

3. 通过 … 使 … (by …, bring about …)

Form: subject + 通过 + means + 使 + someone / something + result · 通过 + means, subject + result

Add a subject	Drop 使
学校通过这次活动，使学生更自信了	通过这次活动，学生更自信了

Watch out

- The same trap catches 经过 / 由于 …… 使 ……: *wrong:* 经过大家的努力，使问题得到了解决 → 经过大家的努力，问题得到了解决.

4. 势必 (be bound to / inevitably)

Form: (cause / situation，) + 势必 + (会) + result

可能 / 恐怕	势必	必然

- **我们所做的一切都是为了孩子。** – Everything we do is for the children.
- **正如大家所看到的，情况已经好转。** – As you can all see, things have improved.

How it works. 所 *suǒ* before a verb marks what the verb acts on: 他所说的话 "the words he said". It adds a formal, precise tone; the meaning is the same without it (他说的话). Set phrases keep it: 众所周知 "as everyone knows".

Watch out

Let alone...

HSK 6

连 …… 都 ……，何况 …… means "even … , let alone …". The 连 part is the case where you would least expect the result; 何况 adds a case where it is even more obvious: 连专家都不懂，何况我们. In formal writing, A 尚且 ……，何况 B says the same thing.

At a glance

- **1.** 连 … 都 … ，何况 … – even …, let alone …: 这本书连大人都看不懂，何况小孩子呢?
- **2.** 尚且 … 何况 … – even …, let alone – formal: 这架钢琴大人尚且搬不动，何况孩子呢?

1. 连 ... 都 ... ，何况 ... (even ..., let alone ...)

Form: 连 + stronger case + 都 / 也 …，何况 + weaker case (呢)?

- **这本书连大人都看不懂，何况小孩子呢?** *Zhè běn shū lián dàrén dōu kàn bu dǒng, hékuàng xiǎo háizi ne?* – Even adults can't understand this book, let alone a small child.
- **他连最难的题都会做，何况这么简单的?** *Tā lián zuì nán de tí dōu huì zuò, hékuàng zhème jiǎndān de?* – He can do even the hardest questions, let alone such an easy one.
- **这件事连他最好的朋友都不知道，何况我呢?** *Zhè jiàn shì lián tā zuì hǎo de péngyou dōu bù zhīdào, hékuàng wǒ ne?* – Not even his best friend knows about this, so how would I?
- **平时走路都要二十分钟，何况今天下雪呢?** *Píngshí zǒulù dōu yào èrshí fēnzhōng, hékuàng jīntiān xià xuě ne?* – It takes twenty minutes on foot on a normal day, and today it's snowing!
- **太远了，何况天也晚了，我们明天再去吧。** *Tài yuǎn le, hékuàng tiān yě wǎn le, wǒmen míngtiān zài qù ba.* – It's too far, and besides, it's getting late; let's go tomorrow.
- **学好母语都不容易，更不用说外语了。** *Xuéhǎo mǔyǔ dōu bù róngyì, gèng búyòng shuō wàiyǔ le.* – Mastering your mother tongue isn't easy, let alone a foreign language.

How it works. 何况 *hékuàng* draws the obvious conclusion. The first clause makes a claim about a *strong* test case, usually with 连 …… 都 / 也 ("even"): 连大人都看不懂. 何况 then names a case for which the claim is *even more* true: 何况小孩子. With 呢 and a question mark it becomes a rhetorical question: "so what about a child?", meaning "of course a child can't".

The direction is the key: 连 takes the case where you would least expect the claim to

exercises.lol exercises.com.cn

hold (adults understanding, the hardest question, his best friend knowing), and 何况 takes the case where it obviously follows. Without 连, 何况 can simply add a further reason: "besides, what's more" (何况天也晚了). 更不用说 …… 了 says the same thing as a plain statement.

……，更不用说 …… 了	……，何况 …… 呢?
a statement: "let alone"	a rhetorical question; more literary
大人都不懂，更不用说孩子了。	大人都不懂，何况孩子呢?

Watch out

- Get the direction right: *wrong:* 这本书连小孩子都看不懂，何况大人呢? (the logic is backwards) → 连大人都看不懂，何况小孩子呢?
- Keep 都 / 也 after the 连 phrase: *wrong:* 连大人看不懂 → 连大人都看不懂.
- 何况 starts the second clause; it does not go after the subject: *wrong:* 小孩子何况呢 → 何况小孩子呢.

In a passage

> 很多人觉得在大城市买房太难了。连工作了十年的白领都买不起，何况刚毕业的年轻人呢？所以越来越多的年轻人选择租房。何况租房还有一个好处：换工作的时候，搬家也比较方便。

Read and notice. Which 何况 draws a "let alone" conclusion, and which one adds a further reason?

2. 尚且 … 何况 … (even …, let alone – formal)

Form: A 尚且 + result，何况 B (呢)? · …，更不用说 B 了

- **这架钢琴大人尚且搬不动，何况孩子呢?** *Zhè jià gāngqín dàrén shàngqiě bān bu dòng, hékuàng háizi ne?* – Even adults can't move this piano, let alone a child.
- **这道题老师尚且要想很久，更不用说学生了。** – Even the teacher needs a long time on this question, not to mention the students.
- **平时尚且这么忙，周末更忙。** – It's this busy even on normal days; at weekends it's busier still.

How it works. 尚且 is the formal partner of 连 … 都. It marks the case where you would least expect the result; 何况 or 更不用说 then adds a case where it is even more obvious.

连大人都搬不动，何况孩子	大人尚且搬不动，何况孩子
everyday style	formal style

Seven pairs of adverbs that English often translates the same way. The difference is usually about attitude (反而 vs 却, 居然 vs 反而), time (一度 vs 一时, 一直 vs 一向) or strength (根本 vs 到底, 不得不 vs 只好, 不断 vs 不停). Read the situation in each example before you choose.

At a glance

- **2.** 不断 vs 不停 – continually vs non-stop: 城市在不断发展。
- **3.** 反而 vs 却 – instead vs however: 我睡了一觉，却还是很累；不但没好，反而更累了。

- **我不得不承认，他说得对。** – I have to admit he's right.

How it works. 只好 *zhǐhǎo* means the **only option left**: other options ran out and you accept it, resigned. 不得不 *bùdébù* means being **forced** by rules, duty, health or pressure; it is a little more formal.

只好	不得不
no other choice remained	something forces you
商店关门了，我只好明天再买	他病了，不得不住院

Often both work (下雨了，我们只好 / 不得不待在家里); 不得不 sounds more forced.

Say it aloud: argument, summary and formal presentation

HSK 6

Argue within the evidence

A library trial kept one reading room open an extra hour for a week. Attendance rose, but the report does not show whether people stayed longer or came from other rooms. Recommend a next step without turning a short trial into proof of a permanent effect.

试行期间，这间阅览室的到访人数增加了。不过，这并不能证明总学习时间也增加了。我建议继续试行，并记录使用时长，以便比较不同安排的效果。

During the trial, visits to this reading room increased. However, that does not prove that total study time also increased. I suggest continuing the trial and recording the duration of use so that different arrangements can be compared.

Choose the argumentative move

Move	Useful frame	Example
Reframe	与其说……不如说……	与其说已经成功，不如说值得继续观察。
Add a reason	何况……	还需要考虑费用，何况工作人员也需要休息。
Maintain a position under a condition	即使…… 也 ……	即使人数增加，也不能忽略成本。

The first frame replaces an interpretation, rather than comparing heights or prices. 何况 relies on an earlier consideration, which may come from another speaker's turn. Keep the condition and result clear in 即使 …… 也 ……; this paired frame is useful without claiming that every Mandarin concessive sentence must contain both words.

Make a concession count

诚然，延长开放时间可能方便部分读者；然而，是否长期实行，还需要比较成本和使用情况。 Admittedly, longer hours may help some readers; whether to make the change permanent still requires comparing costs and use.

A concession should acknowledge a real point. Follow it with a reasoned response, not an unrelated counterclaim. Possible benefit is not the same as measured benefit, and measured attendance is not automatically measured learning.

Summarise without adding a claim

Source: **试行一周后，到访人数增加，但使用时长尚未统计。** After a one-week trial, visits increased, but duration of use had not yet been counted.

Faithful summary: **一周试行后，到访人数上升，使用时长仍不清楚。**After a one-week trial, visits rose; duration of use remains unclear.

Unfaithful summary: **延长开放时间已经提高了学习效率。** Longer opening hours have already improved study efficiency. The source measured neither efficiency nor a long-term effect.

Select formal wording by meaning

因此 introduces a consequence; 此外 adds a point; 其次 introduces a further point in an ordered discussion. They are not interchangeable upgrades for every 所以, 还有 or 然后. 然后 may describe time order, whereas 其次 can order reasons. Formal language still needs clear subjects, supported claims and manageable sentence length.

Give a recommendation, acknowledge one limit and answer a challenge. Review content accuracy separately from grammar, fluency and pronunciation; a polished sentence can still overstate the evidence.

Practice

1. Choose the frame (与其说 …… 不如说 …… / 何况 / 即使 …… 也 ……): _ _ 成本增加，我们 _ _ 应该继续试行。
2. Reframe with 与其说 …… 不如说 ……: the trial has not succeeded yet; it deserves more observation.
3. Source: 新课程试行一个月，学生满意度提高，但考试成绩尚未比较。Which summary is faithful? A. 新课程已经提高了成绩。B. 一个月后满意度上升，成绩变化还不清楚。
4. Choose 因此, 此外 or 其次: 使用时长没有统计，_ _ 还不能证明效率提高了。
5. Write a concession with 诚然 ……；然而 …… about closing the library at weekends.

Mixed practice

These questions mix the patterns and use new situations.

6. Find and fix the problem. A one-week trial showed more library visits, but nobody measured how long people stayed. A summary says study efficiency definitely improved. Correct the summary.

7. Use it yourself. Recommend a further measurement, admit one real limitation, and keep proposals separate from results.

Answers and explanations

Mark your work, then correct each mistake in your own words.

■ Practice answers

1. **即使**成本增加，我们**也**应该继续试行。The position holds under the condition.
2. **与其说试行已经成功，不如说值得继续观察。**
3. **B.** A claims a result the source did not measure.
4. **因此**: it introduces the consequence of the missing data.
5. For example: **诚然，周末关闭可以节省人手；然而，很多学生只有周末才有时间来图书馆，是否关闭还需要先调查使用情况。** The concession is real, and the reply answers it with a reason.

■ Mixed practice

6. The data show more visits only. Say 试用一周，到图书馆的人数增加了，但学习效率是否提高还不清楚, and suggest measuring it.

7. Model answer. 数据显示人数增加了。不过时间只有一周，样本也不大。我建议下个月记录学习时间，再做判断。
