The College Board: Connecting Students to College Success

The College Board is a not-for-profit membership association whose mission is to connect students to college success and opportunity. Founded in 1900, the association is composed of more than 4,700 schools, colleges, universities, and other educational organizations. Each year, the College Board serves over three and a half million students and their parents, 23,000 high schools, and 3,500 colleges through major programs and services in college admissions, guidance, assessment, financial aid, enrollment, and teaching and learning. Among its best-known programs are the SAT[®], the PSAT/NMSQT[®], and the Advanced Placement Program[®] (AP[®]). The College Board is committed to the principles of excellence and equity, and that commitment is embodied in all of its programs, services, activities, and concerns.

TABLE OF INFORMATION FOR 2005

CONSTANTS AND CONVERSION FACTORS			UNITS		PREFIXES			
			Name	Symbol	Factor	Prefix	Symbol	
1 unified atomic mass unit,	$1 \text{ u} = 1.66 \times 10^{-27} \text{ kg}$		meter	m	10^9	giga	G	
	$= 931 \text{ MeV}/c^2$		kilogram	kg	10^6	mega	M	
Proton mass,	$m_p = 1.67 \times 10^{-27} \text{ kg}$		second	s	10^3	kilo	k	
Neutron mass,	$m_n = 1.67 \times 10^{-27} \text{ kg}$		ampere	A	10^{-2}	centi	c	
Electron mass,	$m_e = 9.11 \times 10^{-31} \text{ kg}$		kelvin	K	10^{-3}	milli	m	
Magnitude of the electron charge,	$e = 1.60 \times 10^{-19} \text{ C}$		mole	mol	10^{-6}	micro	μ	
Avogadro's number,	$N_0 = 6.02 \times 10^{23} \text{ mol}^{-1}$		hertz	Hz	10^{-9}	nano	n	
Universal gas constant,	$R = 8.31 \text{ J}/(\text{mol} \cdot \text{K})$		newton	N	10^{-12}	pico	p	
Boltzmann's constant,	$k_B = 1.38 \times 10^{-23} \text{ J/K}$		pascal	Pa	VALUES OF TRIGONOMETRIC FUNCTIONS FOR COMMON ANGLES			
Speed of light,	$c = 3.00 \times 10^8 \text{ m/s}$		joule	J				
Planck's constant,	$h = 6.63 \times 10^{-34} \text{ J} \cdot \text{s}$		watt	W	θ	$\sin \theta$	$\cos \theta$	$\tan \theta$
	$= 4.14 \times 10^{-15} \text{ eV} \cdot \text{s}$		coulomb	C	0°	0	1	0
	$hc = 1.99 \times 10^{-25} \text{ J} \cdot \text{m}$		volt	V	30°	1/2	$\sqrt{3}/2$	$\sqrt{3}/3$
	$= 1.24 \times 10^3 \text{ eV} \cdot \text{nm}$		ohm	Ω	37°	3/5	4/5	3/4
Vacuum permittivity,	$\epsilon_0 = 8.85 \times 10^{-12} \text{ C}^2/\text{N} \cdot \text{m}^2$		henry	H	45°	$\sqrt{2}/2$	$\sqrt{2}/2$	1
Coulomb's law constant,	$k = 1/4\pi\epsilon_0 = 9.0 \times 10^9 \text{ N} \cdot \text{m}^2/\text{C}^2$		farad	F	53°	4/5	3/5	4/3
Vacuum permeability,	$\mu_0 = 4\pi \times 10^{-7} (\text{T} \cdot \text{m})/\text{A}$		tesla	T	60°	$\sqrt{3}/2$	1/2	$\sqrt{3}$
Magnetic constant,	$k' = \mu_0/4\pi = 10^{-7} (\text{T} \cdot \text{m})/\text{A}$		degree		90°	1	0	∞
Universal gravitational constant,	$G = 6.67 \times 10^{-11} \text{ m}^3/\text{kg} \cdot \text{s}^2$		Celsius	$^\circ\text{C}$				
Acceleration due to gravity at the Earth's surface,	$g = 9.8 \text{ m/s}^2$		electron-volt	eV				
1 atmosphere pressure,	$1 \text{ atm} = 1.0 \times 10^5 \text{ N/m}^2$							
	$= 1.0 \times 10^5 \text{ Pa}$							
1 electron volt,	$1 \text{ eV} = 1.60 \times 10^{-19} \text{ J}$							

The following conventions are used in this examination.

- I. Unless otherwise stated, the frame of reference of any problem is assumed to be inertial.
- II. The direction of any electric current is the direction of flow of positive charge (conventional current).
- III. For any isolated electric charge, the electric potential is defined as zero at an infinite distance from the charge.
- IV. For mechanics and thermodynamics equations, W represents the work done on a system.

FLUID MECHANICS AND THERMAL PHYSICS

$$P = P_0 + \rho gh$$

$$F_{\text{buoy}} = \rho Vg$$

$$A_1 v_1 = A_2 v_2$$

$$P + \rho gy + \frac{1}{2} \rho v^2 = \text{const.}$$

$$\Delta \ell = \alpha \ell_0 \Delta T$$

$$P = \frac{F}{A}$$

$$PV = nRT$$

$$K_{\text{avg}} = \frac{3}{2} k_B T$$

$$v_{\text{rms}} = \sqrt{\frac{3RT}{M}} = \sqrt{\frac{3k_B T}{\mu}}$$

$$W = -P\Delta V$$

$$\Delta U = Q + W$$

$$e = \left| \frac{W}{Q_H} \right|$$

$$e_c = \frac{T_H - T_C}{T_H}$$

A = area

e = efficiency

F = force

h = depth

K_{avg} = average molecular kinetic energy

ℓ = length

M = molar mass

n = number of moles

P = pressure

Q = heat transferred to a system

T = temperature

U = internal energy

V = volume

v = velocity or speed

v_{rms} = root-mean-square velocity

W = work done on a system

y = height

α = coefficient of linear expansion

μ = mass of molecule

ρ = density

ATOMIC AND NUCLEAR PHYSICS

$$E = hf = pc$$

$$K_{\text{max}} = hf - \phi$$

$$\lambda = \frac{h}{p}$$

$$\Delta E = (\Delta m)c^2$$

E = energy

f = frequency

K = kinetic energy

m = mass

p = momentum

λ = wavelength

ϕ = work function

WAVES AND OPTICS

$$v = f\lambda$$

$$n = \frac{c}{v}$$

$$n_1 \sin \theta_1 = n_2 \sin \theta_2$$

$$\sin \theta_c = \frac{n_2}{n_1}$$

$$\frac{1}{s_i} + \frac{1}{s_o} = \frac{1}{f}$$

$$M = \frac{h_i}{h_o} = -\frac{s_i}{s_o}$$

$$f = \frac{R}{2}$$

$$d \sin \theta = m\lambda$$

$$x_m \approx \frac{m\lambda L}{d}$$

d = separation

f = frequency or focal length

h = height

L = distance

M = magnification

m = an integer

n = index of refraction

R = radius of curvature

s = distance

v = speed

x = position

λ = wavelength

θ = angle

GEOMETRY AND TRIGONOMETRY

Rectangle

$$A = bh$$

Triangle

$$A = \frac{1}{2} bh$$

Circle

$$A = \pi r^2$$

$$C = 2\pi r$$

Parallelepiped

$$V = \ell wh$$

Cylinder

$$V = \pi r^2 \ell$$

Sphere

$$V = \frac{4}{3} \pi r^3$$

$$S = 4\pi r^2$$

Right Triangle

$$a^2 + b^2 = c^2$$

$$\sin \theta = \frac{a}{c}$$

$$\cos \theta = \frac{b}{c}$$

$$\tan \theta = \frac{a}{b}$$

2005 AP[®] PHYSICS B FREE-RESPONSE QUESTIONS

PHYSICS B SECTION II

Time—90 minutes

7 Questions

Directions: Answer all seven questions, which are weighted according to the points indicated. The suggested time is about 11 minutes for answering each of questions 1-2 and 5-7, and about 17 minutes for answering each of questions 3-4. The parts within a question may not have equal weight. Show all your work in the pink booklet in the spaces provided after each part, NOT in this green insert.

1. (10 points)

The vertical position of an elevator as a function of time is shown above.

(a) On the grid below, graph the velocity of the elevator as a function of time.

2005 AP[®] PHYSICS B FREE-RESPONSE QUESTIONS

(b)

- Calculate the average acceleration for the time period $t = 8 \text{ s}$ to $t = 10 \text{ s}$.
- On the box below that represents the elevator, draw a vector to represent the direction of this average acceleration.

- (c) Suppose that there is a passenger of mass 70 kg in the elevator. Calculate the apparent weight of the passenger at time $t = 4 \text{ s}$.

2. (10 points)

A simple pendulum consists of a bob of mass 1.8 kg attached to a string of length 2.3 m. The pendulum is held at an angle of 30° from the vertical by a light horizontal string attached to a wall, as shown above.

- (a) On the figure below, draw a free-body diagram showing and labeling the forces on the bob in the position shown above.

- Calculate the tension in the horizontal string.
- The horizontal string is now cut close to the bob, and the pendulum swings down. Calculate the speed of the bob at its lowest position.

2005 AP[®] PHYSICS B FREE-RESPONSE QUESTIONS

3. (15 points)

Two point charges are fixed on the y -axis at the locations shown in the figure above. A charge of $+q$ is located at $y = +a$ and a charge of $+2q$ is located at $y = -a$. Express your answers to parts (a) and (b) in terms of q , a , and fundamental constants.

- Determine the magnitude and direction of the electric field at the origin.
- Determine the electric potential at the origin.

A third charge of $-q$ is first placed at an arbitrary point A ($x = -x_0$) on the x -axis as shown in the figure below.

- Write expressions in terms of q , a , x_0 , and fundamental constants for the magnitudes of the forces on the $-q$ charge at point A caused by each of the following.
 - The $+q$ charge
 - The $+2q$ charge

2005 AP[®] PHYSICS B FREE-RESPONSE QUESTIONS

- The $-q$ charge can also be placed at other points on the x -axis. At each of the labeled points (A , B , and C) in the following diagram, draw a vector to represent the direction of the net force on the $-q$ charge due to the other two charges when it is at those points.

2005 AP[®] PHYSICS B FREE-RESPONSE QUESTIONS

4. (15 points)

Your teacher gives you a slide with two closely spaced slits on it. She also gives you a laser with a wavelength $\lambda = 632 \text{ nm}$. The laboratory task that you are assigned asks you to determine the spacing between the slits. These slits are so close together that you cannot measure their spacing with a typical measuring device.

- (a) From the list below, select the additional equipment you will need to do your experiment by checking the line next to each item.

☐ Meterstick ☐ Ruler ☐ Tape measure ☐ Light-intensity meter
☐ Large screen ☐ Paper ☐ Slide holder ☐ Stopwatch

- (b) Draw a labeled diagram of the experimental setup that you would use. On the diagram, use symbols to identify carefully what measurements you will need to make.
- (c) On the axes below, sketch a graph of intensity versus position that would be produced by your setup, assuming that the slits are very narrow compared to their separation.

- (d) Outline the procedure that you would use to make the needed measurements, including how you would use each piece of the additional equipment you checked in (a).
- (e) Using equations, show explicitly how you would use your measurements to calculate the slit spacing.

2005 AP[®] PHYSICS B FREE-RESPONSE QUESTIONS

Note: Figure not drawn to scale.

5. (10 points)

A large rectangular raft (density 650 kg/m^3) is floating on a lake. The surface area of the top of the raft is 8.2 m^2 and its volume is 1.80 m^3 . The density of the lake water is 1000 kg/m^3 .

- (a) Calculate the height h of the portion of the raft that is above the surrounding water.
- (b) Calculate the magnitude of the buoyant force on the raft and state its direction.
- (c) If the average mass of a person is 75 kg , calculate the maximum number of people that can be on the raft without the top of the raft sinking below the surface of the water. (Assume that the people are evenly distributed on the raft.)

2005 AP[®] PHYSICS B FREE-RESPONSE QUESTIONS

6. (10 points)

An experiment is performed to determine the number n of moles of an ideal gas in the cylinder shown above. The cylinder is fitted with a movable, frictionless piston of area A . The piston is in equilibrium and is supported by the pressure of the gas. The gas is heated while its pressure P remains constant. Measurements are made of the temperature T of the gas and the height H of the bottom of the piston above the base of the cylinder and are recorded in the table below. Assume that the thermal expansion of the apparatus can be ignored.

T (K)	H (m)
300	1.11
325	1.19
355	1.29
375	1.37
405	1.47

- Write a relationship between the quantities T and H , in terms of the given quantities and fundamental constants, that will allow you to determine n .
- Plot the data on the axes below so that you will be able to determine n from the relationship in part (a). Label the axes with appropriate numbers to show the scale.

- Using your graph and the values $A = 0.027 \text{ m}^2$ and $P = 1.0$ atmosphere, determine the experimental value of n .

2005 AP[®] PHYSICS B FREE-RESPONSE QUESTIONS

$n = 4$	_____
$n = 3$	_____ -6.04 eV
$n = 2$	_____ -13.6 eV
$n = 1$	_____ -54.4 eV

Note: Energy levels not drawn to scale.

7. (10 points)

The diagram above shows the lowest four discrete energy levels of an atom. An electron in the $n = 4$ state makes a transition to the $n = 2$ state, emitting a photon of wavelength 121.9 nm .

- Calculate the energy level of the $n = 4$ state.
- Calculate the momentum of the photon.

The photon is then incident on a silver surface in a photoelectric experiment, and the surface emits an electron with maximum possible kinetic energy. The work function of silver is 4.7 eV .

- Calculate the kinetic energy, in eV, of the emitted electron.
- Determine the stopping potential for the emitted electron.

END OF EXAM
