

- 34 Two types of epithelial cells, 1 and 2, occur in the mammalian gas exchange system in a healthy human.

1

2

Which row shows the function and distribution of these types of epithelial cells?

	cell type 1	cell type 2
<b>A</b>	absorption in bronchi	secrete mucus in alveoli
<b>B</b>	exchange surface in alveoli	secrete mucus in bronchi
<b>C</b>	absorption in bronchi	move mucus in alveoli
<b>D</b>	exchange surface in alveoli	move mucus in bronchi
