

8 Which row describes silicon dioxide?

|          | electrical conductivity in liquid state | solubility in water |
|----------|---|---------------------|
| <b>A</b> | non-conductor                           | insoluble           |
| <b>B</b> | non-conductor                           | soluble             |
| <b>C</b> | conductor                               | insoluble           |
| <b>D</b> | conductor                               | soluble             |
