# Vocabulary Test 词汇测验

A-Level Chemistry · Week 24

Topics 35–37 · Polymerisation, Analytical techniques

---

*Sections A and C are marked on exact spelling; Section B accepts any listed Chinese form.*

| Question | Answer                      | Marks |
|----------|-----------------------------|-------|
| 1        | diamine                     | 1     |
| 2        | poly(alkene)                | 1     |
| 3        | biodegradable               | 1     |
| 4        | thin-layer chromatography   | 1     |
| 5        | mobile phase                | 1     |
| 6        | baseline                    | 1     |
| 7        | gas / liquid chromatography | 1     |
| 8        | retention time              | 1     |
| 9        | NMR                         | 1     |
| 10       | chemical shift              | 1     |
| 11       | splitting                   | 1     |
| 12       | singlet                     | 1     |
| 13       | quartet                     | 1     |
| 14       | multiplet                   | 1     |
| 15       | tetramethylsilane           | 1     |
| 16       | 色谱                          | 1     |
| 17       | 溶剂前沿                        | 1     |
| 18       | 化学环境                        | 1     |
| 19       | 双峰                          | 1     |
| 20       | 氘代溶剂                        | 1     |
