

7 (a) Asymmetric encryption is a type of cryptography.

Identify **one** other type of cryptography.

.....
 [1]

(b) An organisation holds two asymmetric encryption keys, which they intend to use to receive secure transmissions.

Explain how the organisation makes use of the two keys to receive a secure transmission.

.....

 [4]

9 A company requires a digital certificate to ensure the authenticity of its online communications.

Outline the process followed to acquire a digital certificate.

.....

 [4]

10 A stack, `StackArray`, is to be implemented using pseudocode, to store a maximum of 100 string items in an appropriate array. Declarations are required so that the stack has a beginning, an end and a maximum size. An array is also required to store the data.

(a) Write **pseudocode** to declare the variables, constant and array required to implement the stack.

.....

 [3]

(b) Write **pseudocode** for a procedure to initialise the top and bottom pointers of the stack to appropriate values.

.....
