# Vocabulary Test 词汇测验

A-Level Computer Science · Week 2

Topic 1 · Information representation

---

*Sections A and C are marked on exact spelling; Section B accepts any listed Chinese form.*

| Question | Answer              | Marks |
|----------|---------------------|-------|
| 1        | file header         | 1     |
| 2        | image resolution    | 1     |
| 3        | screen resolution   | 1     |
| 4        | bit depth           | 1     |
| 5        | vector graphic      | 1     |
| 6        | drawing list        | 1     |
| 7        | primitive           | 1     |
| 8        | property            | 1     |
| 9        | render              | 1     |
| 10       | digital data        | 1     |
| 11       | sampling            | 1     |
| 12       | sampling rate       | 1     |
| 13       | quantisation        | 1     |
| 14       | compression         | 1     |
| 15       | bandwidth           | 1     |
| 16       | lossy               | 1     |
| 17       | run-length encoding | 1     |
| 18       | dictionary methods  | 1     |
| 19       | 颜色深度                | 1     |
| 20       | 绘图对象                | 1     |
| 21       | 模拟数据                | 1     |
| 22       | 采样分辨率               | 1     |
| 23       | 无损                  | 1     |
| 24       | 霍夫曼编码               | 1     |
| 25       | amplitude           | 1     |
