

1(a)	
1(b)	Obtain critical value $\frac{4}{5}$ from $3x - 1 = 3 - 2x$
	State final answer $x < \frac{4}{5}$
	Alternative Method for Question 1(b)
	Obtain critical value $\frac{4}{5}$ from $(3x - 1)^2 = (3 - 2x)^2$
	State final answer $x < \frac{4}{5}$
