

1	Any method to find x , or a or getting an equation relating x and a For example: $\frac{x}{2} = 40$ or $x = 2 \times 40$ or $x = 40 \times 2 + \frac{1}{2}(0)2^2$ or $\frac{x-0}{4-6} = -40$ or $x = \frac{1}{2} \times a \times 4^2$
	$x = 80$
	$a = 10$
