

Solutions

Accept equivalent correct methods and supported interpretations. The marks check reasoning; they are not an official grade.

2.1 D – It identifies the arrangement referred to. A and B name no two-group arrangement; C gives an opening date without the division needed by the reference.

Correct response linked to the given case.

2.2 A – The second sentence limits the success described in the first. B would introduce an example of clarity, C another similar success, and D a consequence of clarity. A blocked sign limits the earlier positive result.

Correct response linked to the given case.

2.3 notes – A repeated noun phrase makes the reference clear.

Correct response linked to the given case.

2.4 False – It should fit and complete the passage’s existing purpose.

Correct response linked to the given case.

3.1 P3 presumes the repair table and Noor are already introduced. P1 establishes the project and its limits; P3’s “soon” and space problem then develop that existing situation. A reordered opening would require rewriting those introductions.

Sound conclusion or proposed method. Relevant supporting steps or textual evidence. Accurate conditions, checks or qualification.

3.2 After P2’s first sentence gives “This record” its immediate referent: the visitor name-and-item record. Before P1 no record exists in context. At P5’s end the reference is remote and interrupts the concluding aim. The existing P2 location is clearest.

Sound conclusion or proposed method. Relevant supporting steps or textual evidence. Accurate conditions, checks or qualification.

3.3 “However” or “nevertheless” signals the capacity limitation; use a full stop or semicolon before however between independent clauses. A fitting close is “The next trial should judge access, waiting and safety as well as the number of repairs.” This preserves the practical evaluation rather than promising universal success.

Sound conclusion or proposed method. Relevant supporting steps or textual evidence. Accurate conditions, checks or qualification.
