

English: conventions and punctuation

Original skill preparation; versioned source scope

Method and conditions

- Conventions depend on grammar, not a preferred sound.
- Independent clauses; subject head; possessives and parallel forms.

Worked method 1

Read and reason

Conventions depend on grammar, not a preferred sound. “The group of volunteers records outcomes” uses singular group. “Recording the result, Noor checked the card” attaches the modifier to Noor. Use a comma plus conjunction, semicolon or period to separate complete clauses.

Original context 1

Read and reason

Original continuous editing passage — A place to mend [P1] On the first Saturday of each month, a group of volunteers opens a repair table in the public library. [S1] The project began when librarian Noor noticed a row of broken desk lamps outside a nearby building. [S2] Some needed specialist work, but others had loose switches or damaged cables.

Original context 2

Read and reason

[S3] Noor did not want untrained visitors to try unsafe electrical repairs. [S4] She invited a qualified repairer to explain which items the group could inspect and which should go to a professional. The first session accepted only battery-powered objects, with damaged batteries excluded. Visitors registered their items and described the faults before any work began.

Original context 3

Read and reason

[P2] At the entrance, two volunteers record each visitor's name and item. This record helps the group reunite objects with their owners. A blue card goes beside an object awaiting inspection; a white card marks one ready for collection. The cards do not certify safety or guarantee a repair. They simply show where an item is in the process.

Original context 4

Read and reason

[S5] The library's logo was designed many years ago. Beside the cards, a sign asks visitors to stay while their object is examined. Staying allows owners to explain an intermittent fault that might not appear immediately. It also gives them a chance to learn a simple maintenance habit. [P3] Space soon became a problem.

Original context 5

Read and reason

The repair table shared an alcove with readers who wanted a quiet place to work. During the first two sessions, a visitor log recorded six complaints about conversation near the alcove. Noor proposed moving the table into a meeting room. The room could hold fewer people, so a move alone would not solve the problem.

Original context 6

Read and reason

The group introduced short arrival windows and kept two spaces for visitors without bookings. [S6] This totally amazing system fixed every problem forever. In fact, one visitor still waited outside, and the group had to improve the signs leading to the room.

Original context 7

Read and reason

The log recorded one noise complaint during the next two sessions; attendance also fell, so the group did not attribute the whole reduction to the move. [P4] Volunteers were careful about how they described success. An object leaving the table might work again, need another part, or require professional attention. They recorded these outcomes separately. During the trial, forty objects were inspected.

Original context 8

Read and reason

Eighteen worked after a permitted minor adjustment, twelve needed a part, and ten were referred elsewhere. Counting all forty as repaired would hide important differences. [S7] The volunteers recorded the outcomes and wrote the results down in their record. Noor used the figures to decide which spare parts might be useful at later sessions.

Original context 9

Read and reason

She did not use them to promise that any particular object could be repaired. [P5] The project now has a practical aim: help visitors make an informed next decision about a broken object. For some, that means a working lamp. For others, it means knowing when further work would be unsafe or too costly.

Original context 10

Read and reason

The group plans to keep the arrival windows for another trial and ask readers whether noise remains a problem. It will also compare attendance and waiting times before adding more spaces. A repair table succeeds through careful limits as well as useful repairs.

Attempt 1.1

Read and reason

Repair “The set of blue cards show the current stage, they do not certify safety.”
Preserve both claims and explain agreement and boundary.

Reasoning 1.1

Read and reason

“The set of blue cards shows the current stage; it does not certify safety.” Set is singular; the pronoun it refers to the set. A semicolon joins the independent clauses. A full stop or comma plus but also works with appropriate wording.

Attempt 2.1

Read and reason

Repair “Inspecting the lamp, a loose switch was noticed by Noor” and “The group aims to inspect, recording, and advise”.

Reasoning 2.1

Read and reason

“Inspecting the lamp, Noor noticed a loose switch” attaches the inspection to its actor.
“The group aims to inspect, record, and advise” uses parallel infinitive complements under to. Other grammatical rewrites preserving these meanings are acceptable.

Attempt 3.1

Read and reason

Choose “its/it’s” in “The group updates ____ records” and “____ important to label outcomes”. Explain why the same spelling does not fit both.

Reasoning 3.1

Read and reason

“its records” needs the possessive form. “It’s important” means “It is important”. The apostrophe marks a contraction here, not possession; substitution of it checks the distinction.

Transfer and limits

Read and reason

Independent clauses; subject head; possessives and parallel forms.

Check yourself

Read and reason

Close the worked reasoning. Explain why the method fits the final transfer task, reconstruct its conclusion, and state a condition that would change your answer. Then check the full reasoning in the reference.
