

6.5 Presentation and Image Quality

Name: _____ Class: _____ Date: _____ **Total: 10 marks**

KEY WORDS keystone 梯形失真 • image quality 图像质量 • resolution 分辨率
• portfolio 作品集

Objective

Build the skills to present work with high **image quality** 图像质量.

You must be able to:

- explain that image quality is part of the grade
- photograph with even light, sharp focus, true colour
- avoid **keystone** 梯形失真 and glare
- keep files at high **resolution** 分辨率

1 Worked examples

Study these first. Each one shows the method for a task used later.

■ Presentation matters

How work is photographed affects its score — a great piece shot badly loses marks. Image quality is part of the grade.

■ Good photography

Use **even lighting**, **sharp focus**, **true colour**, and a plain background; crop tight and shoot square-on to avoid **keystone**.

■ Files

Follow the required formats and keep **resolution** high so detail is not lost.

2 Practice

2.1 Tilted, distorted edges from shooting a work at an angle are called [1]

- **A** cropping
- **B** keystone
- **C** glazing
- **D** hatching

2.2 State three features of a good photograph of your work. [2]

2.3 Explain why image quality affects your score. [1]

3 Studio & portfolio tasks

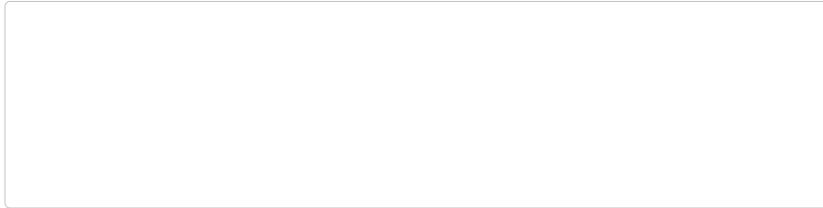

3.1 Plan a **photographing setup**.

(a) Sketch a lighting/camera setup that avoids glare and keystone. [3]

3.2 Quality checklist.

(a) Write a 4-point checklist to run before submitting each image.

[3]

Solutions

2.1 B. off-angle distortion of edges = keystoneing.

2.2 any three of: even lighting, sharp focus, true colour, plain background, tight crop, square-on.

2.3 the reader can only judge what they see; poor images hide real skill.

3.1 Look for: light placed to avoid glare (1); camera square-on at the right height to avoid keystoneing (2).

3.2 Look for: four sensible checks (focus, light, colour, crop/resolution) (3).
