

Solutions

Each answer shows the steps, then the **result**.

2.1 B

- math-defined, cleanly scalable = vector

2.2

- each part can be edited separately without altering the rest — non-destructive, flexible editing

2.3

- for photographs or richly detailed painterly images

3.1

- Look for: a composed design (1); a sensible layer breakdown enabling non-destructive edits (2)

3.2

- Look for: correct choice justified by the idea (1); thumbnail suits that format (2)
