

## Solutions

---

Each answer shows the steps, then the **result**.

### 2.1

- Innate behavior is inherited/present from birth; learned behavior develops from experience

### 2.2

- Any one: reflex, web-spinning, sea turtle heading to the ocean

### 2.3

- Individuals with the helpful behavior survive and reproduce more, passing on the behavior

### 3.1 B

- innate

### 3.2

(a)

- Innate

(b)

- Reaching the ocean quickly avoids predators on land, so turtles that do it survive and reproduce more, favoring the behavior

### 3.3

- Innate is inherited and present from birth (e.g. a reflex); learned develops through experience (e.g. a dog trained to sit)
