

2. Let f and g be the functions defined by $f(x) = 1 + x + e^{x^2-2x}$ and $g(x) = x^4 - 6.5x^2 + 6x + 2$. Let R and S be the two regions enclosed by the graphs of f and g shown in the figure above.
- Find the sum of the areas of regions R and S .
 - Region S is the base of a solid whose cross sections perpendicular to the x -axis are squares. Find the volume of the solid.
 - Let h be the vertical distance between the graphs of f and g in region S . Find the rate at which h changes with respect to x when $x = 1.8$.
