
Vocabulary Test 词汇测验

AP Calculus AB · Week 4

Topics 2–4 · Differentiation: Definition and Fundamental Properties, Differentiation:
Composite, Implicit, and Inverse Functions, Contextual Applications of Differentiation

Sections A and C are marked on exact spelling; Section B accepts any listed Chinese form.

Question	Answer	Marks
1	power rule	1
2	Constant multiple	1
3	polynomial	1
4	quotient rule	1
5	identities	1
6	second derivative	1
7	composite function	1
8	Implicit differentiation	1
9	inverse function	1
10	inverse trigonometric functions	1
11	concavity	1
12	position	1
13	acceleration	1
14	at rest	1
15	Speed	1
16	local linearity	1
17	linear approximation	1
18	乘积法则	1
19	链式法则	1
20	倒数	1
21	速度	1
22	相关变化率	1
23	高估	1
