

Solutions

Each answer shows the steps, then the **result**.

2.1

- Temperature and precipitation

2.2

- Desert

2.3

- Tundra

3.1 B

- precipitation

3.2

(a)

- Tropical rainforest

(b)

- Any one: high biodiversity, tall dense trees, high productivity

3.3

- They differ mainly in **precipitation** — a desert is very dry while a rainforest is very wet — which controls the plants and animals that can live there
