AP European History Name: _____ Score: _____

1. This unit follows which half of unit 1's opening sentence?
   - ☐ both equally
   - ☐ observation of the natural world
   - ☐ the rediscovered texts
   - ☐ neither
2. The CED puts which claim before the heliocentric conclusion?
   - ☐ the invention of the telescope
   - ☐ questioning the authority of the ancients
   - ☐ the printing press
   - ☐ the fall of Rome
3. Select **all** the concepts the CED says Enlightenment thought focused on.
   - ☐ divine right
   - ☐ classical sources of knowledge
   - ☐ human reason and rationalism
   - ☐ empiricism and scepticism

   Tick every correct option.
4. Select **all** the causes of 17th-century food disruption the CED names.
   - ☐ small landholdings
   - ☐ urban migration
   - ☐ poor transportation and adverse weather
   - ☐ low-productivity agricultural practices

   Tick every correct option.
5. The CED presents public opinion as something that...
   - ☐ was abolished
   - ☐ was purely religious
   - ☐ developed in this period
   - ☐ always existed
   - ☐ abolished
   - ☐ experimented with
   - ☐ exported
   - ☐ established
7. Select **all** the orders the unit's method was turned on.
   - ☐ divine right
   - ☐ mercantilism
   - ☐ the printing press
   - ☐ ancient authority in nature

   Tick every correct option.
8. The Enlightenment is the _____ of Scientific Revolution methods to political, social and ethical issues.

   _____

   - ☐ Galen's humoral theory
   - ☐ heliocentrism
   - ☐ mercantilism
10. The CED presents the exclusion of women as an outside criticism of the Enlightenment.

    ☐ True ☐ False

Answers ·

AP European History

1. **observation of the natural world**

   1.2 followed the texts; the Scientific Revolution is the observation thread.

2. **questioning the authority of the ancients**

   The revolution is first about who decides what is true.

3. **classical sources of knowledge; human reason and rationalism; empiricism and scepticism**

   Divine right is what the political theories replaced.

4. **small landholdings; poor transportation and adverse weather; low-productivity agricultural practices**

   Migration is a consequence of later growth, not a cause of famine.

5. **developed in this period**

   It required a literate public, varied print and a contested subject.

6. **experimented with**

   A limited, revocable adoption, not a change of system.

7. **divine right; mercantilism; ancient authority in nature**

   Religion's public role completes the four; printing is a means, not a target.

8. **application**

   The mechanism is written in the CED's sentence.

9. **Galen's humoral theory**

   The body as an integrated system replaced four fluids in balance.

10. **False**

    It states it as part of the movement – evidence for 4.1's *not unchallenged*.
