

“After the [Russian] revolution of 1917, the Bolshevik regime became the first government in history to declare that women’s emancipation was one of its primary goals and to write it into law. Legislation ensuring equal pay for equal work was instantly [passed], and women’s right (if not their obligation) to work became central to Soviet notions of citizenship. Yet, after the first fifteen years of Soviet rule, it was evident that the Leninist ideal of freeing women...was still a distant utopia. In retrospect it was also evident that the Soviet Union’s commitment to women’s equal employment has never been purely ideological and has been based rather on pragmatic, demographic factors: rapid economic growth, labor shortages, and a frequent shortage of males.

In the past decade [the 1980s], the average female worker, although she was slightly better educated than her male counterpart, earned only two-thirds as much as the average male.... Some forty percent of Soviet working women are employed in unskilled manual labor or low-skilled industrial work.

The higher professions are equally unbalanced. About three-quarters of the schoolteachers but only about a third of the school principals are women. Some seventy percent of the doctors are women, but more than half the hospital administrators are men and [they] are in charge of formulating local health policy. The inequality is even more striking among engineers and skilled technical workers.”

1. Respond to parts A, B, and C.

- A. Describe the main argument made by the author in the excerpt.
- B. Describe one piece of evidence used by the author in the excerpt to support her argument.
- C. Explain how one historical development in the second half of the 1900s likely influenced the author’s perspective.

EUROPEAN HISTORY**SECTION I, Part B****Time—40 minutes**

Directions: Answer Question 1 **and** Question 2. Answer **either** Question 3 **or** Question 4.

Write your responses in the Section I, Part B: Short-Answer Response booklet. You must write your response to each question on the lined page designated for that response. Each response is expected to fit within the space provided.

In your responses, be sure to address all parts of the questions you answer. Use complete sentences; an outline or bulleted list alone is not acceptable. You may plan your answers in this exam booklet, but no credit will be given for notes written in this booklet.

“In 1658 Sir Edward Dering (1625–1684), gentleman, politician, and poet, spent his summer making and testing medicines in his home in [England]. Sometime in May of that year, he started a new section in his [journal] headed “physical practices” and began writing down a series of recipes for medicinal remedies and records of his own trials of these medicines. . . .

Dering’s enthusiasm for recipes and recipe trials was not unusual. In fact, early modern English gentlemen and gentlewomen were gripped by recipe fever. They eagerly exchanged know-how and . . . diligently wrote down the treasured knowledge in notebooks of all shapes and sizes.

The rich archive of surviving texts and the continual appearance of recipes in personal writings and in literary works attest to the importance of recipe collection and exchange as a social and cultural phenomenon in early modern England. Masters and mistresses of large households were expected to have basic knowledge of [natural remedies], cookery, and sugarcraft [the making and use of sugar].

Gentlemen and gentlewomen dedicated considerable time, manpower, and resources to all kinds of home-based health care. Not only was the household considered the first resource for dealing with many medical ailments, . . . [but] domestic space was one of the main sites for medical intervention and the promotion of health. Household members were quick to combine self-diagnosis and self-treatment with commercially available medical care, and many produced their own homemade medicines. Gathering, trying and testing medicines and, relatedly, foods were part of this set of activities to gather and construct knowledge about health and the body.”
