

1.3 The Production Possibilities Curve

Name: _____ Class: _____ Date: _____

Total: 9 marks

KEY WORDS efficient 有效率 • unattainable 无法实现 • economic growth 经济增长
• production possibilities curve (ppc) 生产可能性曲线 • opportunity cost 机会成本

Objective

Build the skills to answer exam questions on **the production possibilities curve**.

You must be able to:

- draw and interpret a **production possibilities curve (PPC)** 生产可能性曲线
- use it to show **scarcity**, **opportunity cost**, and trade-offs
- distinguish efficient, inefficient, and unattainable points
- link a **bowed-out** PPC to increasing opportunity cost

1 Worked examples

Study these first. Each one shows the method for a question type used later.

■ The PPC

Shows the maximum combinations of two goods an economy can produce. Points **on** the curve are efficient; **inside** are inefficient; **outside** are unattainable now.

■ Shape

A **bowed-out** PPC reflects the law of **increasing** opportunity cost; a **straight-line** PPC reflects constant opportunity cost.

■ Growth

More or better resources, or new technology, shift the PPC **outward**.

2 Practice

2.1 State what a point **on** the PPC represents.

[1]

2.2 State what a bowed-out PPC shows about opportunity cost. [1]

2.3 A country moves from 8 wheat and 30 cloth to 12 wheat and 20 cloth. Find the opportunity cost of the 4 extra wheat. [2]

3 Exam-style questions

3.1 A point inside the PPC is [1]

- | | |
|---|---|
| A | B |
| C | D |
- A** efficient
 - B** inefficient
 - C** unattainable
 - D** optimal

3.2 A straight-line PPC shows [1]

- | | |
|---|---|
| A | B |
| C | D |
- A** increasing opportunity cost
 - B** constant opportunity cost
 - C** zero output
 - D** economic growth

3.3 An economy's resources and technology both improve.

- (a) State the effect on the PPC. [1]
- (b) Name the process. [1]
- (c) State whether a previously unattainable point may now be reachable. [1]
