

Solutions

Each answer shows the steps, then the **result**.

2.1

- $\log(y)$ against x

2.2

- the data are exponential

2.3

- $\log(y) = \log a + x \log b$

3.1 B

3.2 B

3.3

(a)

- $\log(y) = \log a + x \log b$

(b)

- $\log b$

(c)

- $\log a$
