

Solutions

Each answer shows the steps, then the **result**.

2.1

- the science of learning from data that vary

2.2

- individuals: the students; variable: their height

2.3

- it anticipates variability (its answer is a distribution, not one value)

3.1 B

3.2 B

3.3

(a)

- the students

(b)

- favourite sport

(c)

- no — it has a single answer with no variability
