

AP United States History

Name: _____ Score: _____

1. Select **all** three causes of industrial capitalism the CED names.

- ☐ large-scale production methods
- ☐ foreign conquest
- ☐ technological advances
- ☐ the opening of new markets

Tick every correct option.

2. Select **both** effects of mechanisation the CED names.

- ☐ substantially increased agricultural production
- ☐ declines in food prices
- ☐ fewer farms
- ☐ higher wages

Tick every correct option.

3. Select **all** four opportunities the CED names.

- ☐ building the railroads
- ☐ mining
- ☐ farming
- ☐ ranching

Tick every correct option.

4. Select **both** inputs the CED names.

- ☐ technological innovations
- ☐ tariff protection
- ☐ foreign labour only
- ☐ greater access to natural resources

Tick every correct option.

5. Select **all** three things the CED says accompanied large-scale production.

- ☐ massive technological change
- ☐ labour legislation
- ☐ pro-growth government policies

- ☐ expanding international communication networks

Tick every correct option.

6. The CED says ethnic neighbourhoods...

- ☐ only limited residents
- ☐ were illegal
- ☐ provided new cultural opportunities
- ☐ were empty

7. 'Negotiated compromises' gives immigrants...

- ☐ no role
- ☐ agency as parties to the outcome
- ☐ political office
- ☐ legal citizenship

8. 'Alternative visions' means these movements...

- ☐ proposed a different arrangement
- ☐ opposed all change
- ☐ wanted better terms within the system
- ☐ were foreign

9. 'Some argued' shows the CED is...

- ☐ reporting a position
- ☐ endorsing the position
- ☐ rejecting it
- ☐ dating it

10. Industrialisation brought the **least** change in...

- ☐ city populations
- ☐ Southern agriculture and national politics
- ☐ western settlement
- ☐ manufacturing

AP United States History**1. large-scale production methods; technological advances; the opening of new markets**

'Encouraged' is a modest verb.

2. substantially increased agricultural production; declines in food prices

The second is what makes farming harder.

3. building the railroads; mining; farming; ranching

The motive is stated as an ideal: self-sufficiency and independence.

4. technological innovations; greater access to natural resources

'Made use of' puts the agency with businesses.

5. massive technological change; pro-growth government policies; expanding international communication networks

The third matters for 6.12's laissez-faire debate.

6. provided new cultural opportunities

A deliberate framing, worth reproducing.

7. agency as parties to the outcome

Not material being processed.

8. proposed a different arrangement

The CED chose the stronger word.

9. reporting a position

As it did with Manifest Destiny in 5.2.

10. Southern agriculture and national politics

'Extent' requires a judgement with a limit.
