

AP World History: Modern

Name: _____ Score: _____

1. Select **all** the commercial innovations the CED names here.

- ☐ the compass
- ☐ money economies
- ☐ the caravanserai
- ☐ forms of credit

Tick every correct option.

2. The CED's mechanism for how imperial expansion helped trade is that...

- ☐ new people were drawn into their conquerors' economies and networks
- ☐ empires built new roads only
- ☐ merchants were forced to move
- ☐ taxes were abolished

3. The monsoon winds mattered because they...

- ☐ prevent long voyages
- ☐ only affect coastal waters
- ☐ reverse twice a year, so a ship sails out on one season and home on the other
- ☐ blow constantly in one direction

4. Select **all** the transportation innovations the CED names here.

- ☐ the astrolabe
- ☐ caravans
- ☐ paper money
- ☐ the camel saddle

Tick every correct option.

5. Select **all** the categories the CED says cross-cultural interaction diffused.

- ☐ scientific and technological innovations
- ☐ systems of taxation
- ☐ literary and artistic traditions
- ☐ cultural traditions

Tick every correct option.

6. Select **all** the crop diffusions the CED names.

- ☐ citrus in the Mediterranean
- ☐ new rice varieties in East Asia
- ☐ bananas in Africa
- ☐ maize in Europe

Tick every correct option.

7. Select **all** the features shared by all three networks.

- ☐ growth from improved technologies and practices
- ☐ a single ruling empire
- ☐ carrying religion, disease and crops
- ☐ promoting cities or states that taxed them

Tick every correct option.

8. What changed about the Silk Roads after 1200 was mainly...

- ☐ who invented them
- ☐ their location
- ☐ the volume moving along them
- ☐ the languages spoken

9. Transfers happened only through peaceful trade.

- ☐ True ☐ False

10. In diasporic communities, cultural influence ran in both directions.

- ☐ True ☐ False

AP World History: Modern

1. **money economies; the caravanserai; forms of credit**

The compass belongs to the Indian Ocean subtopic, 2.3.

2. **new people were drawn into their conquerors' economies and networks**

A bigger network moves more, and one authority means fewer borders.

3. **reverse twice a year, so a ship sails out on one season and home on the other**

The CED counts environmental knowledge as a cause of trade growth.

4. **caravans; the camel saddle**

The astrolabe is maritime; paper money is a commercial, not transport, innovation.

5. **scientific and technological innovations; literary and artistic traditions; cultural traditions**

Taxation is not on the CED's list here.

6. **citrus in the Mediterranean; new rice varieties in East Asia; bananas in Africa**

Maize crosses the Atlantic in the Columbian Exchange, unit 4.

7. **growth from improved technologies and practices; carrying religion, disease and crops; promoting cities or states that taxed them**

Only the Silk Roads had a single authority, and only for a time.

8. **the volume moving along them**

The routes were old; the CED's causal claim is about commercial practices.

9. **False**

The CED writes **contacts and conflicts** – war moved knowledge too.

10. **True**

The CED's *in turn* is load-bearing – indigenous cultures influenced merchant cultures too.
