

AP World History: Modern

Name: _____ Score: _____

1. The step that turned a way of studying nature into a way of questioning government was applying empiricism to...

- ☐ astronomy
- ☐ mathematics
- ☐ agriculture
- ☐ human relationships

2. Select **all** the revolutionary documents the CED names.

- ☐ the French Declaration of the Rights of Man and of the Citizen
- ☐ Bolívar's Letter from Jamaica
- ☐ the American Declaration of Independence
- ☐ Adam Smith's Wealth of Nations

Tick every correct option.

3. Select **all** the CED's industrialisation factors.

- ☐ proximity to waterways
- ☐ universal education
- ☐ legal protection of private property
- ☐ improved agricultural productivity

Tick every correct option.

4. Select **all** the places the CED says industrial methods spread to.

- ☐ other parts of Europe
- ☐ Russia and Japan
- ☐ Australia
- ☐ the United States

Tick every correct option.

5. Select **all** the fossil fuels the CED specifies.

- ☐ oil
- ☐ peat
- ☐ wood

☐ coal

Tick every correct option.

6. The CED says state-sponsored industrialisation was promoted by...

☐ every industrialising state

☐ private companies, not states

☐ a small number of states and governments

☐ European empires only

7. The CED says free trade was adopted *partly* in response to Smith's theories, which implies...

☐ Smith opposed free trade

☐ state interests mattered too

☐ mercantilism continued unchanged

☐ ideas were the only cause

8. Select **all** the demands the CED says workers organised for.

☐ improved working conditions

☐ higher wages

☐ limited hours

☐ ownership of factories

Tick every correct option.

9. The variable the CED uses to explain women's different experiences is...

☐ class

☐ age

☐ region

☐ religion

10. "To what extent" requires an answer that is...

☐ a date

☐ a definition

☐ a degree, weighing change against continuity

☐ a list of changes

AP World History: Modern

1. human relationships

The CED names both the natural world **and** human relationships.

2. the French Declaration of the Rights of Man and of the Citizen; Bolívar's Letter from Jamaica; the American Declaration of Independence

Smith is an economic theorist, in subtopic 5.7.

3. proximity to waterways; legal protection of private property; improved agricultural productivity

Coal/iron/timber distribution, urbanisation, foreign resources and capital complete the seven.

4. other parts of Europe; Russia and Japan; the United States

Two of the named receivers are outside the West.

5. oil; coal

Wood is a renewable fuel and is listed among industrial resources, not fossil fuels.

6. a small number of states and governments

It was the exception, not the pattern.

7. state interests mattered too

A country that can undersell everyone gains from open markets.

8. improved working conditions; higher wages; limited hours

Ownership is what socialism and communism proposed – a different response.

9. class

Working-class women held wage jobs; middle-class women were increasingly confined to the household.

10. a degree, weighing change against continuity

An answer that only lists changes has answered "did it?"
