AP World History: Modern

1. air travel and shipping containers; the internet; radio and cellular communication

Antibiotics belong to the medical bullet.

2. cholera; tuberculosis; malaria

Alzheimer's is in the longevity category.

3. desertification; increased consumption of fresh water; a decline in air quality; deforestation

The sentence then names competition as their consequence.

4. the United States under Reagan; Britain under Thatcher; China under Deng Xiaoping

Chile under Pinochet completes the four; Stalin belongs to 7.4.

5. liberation theology in Latin America; global feminism movements; the U.N. Universal Declaration of Human Rights

The Negritude movement completes the four; the WTO belongs to 9.4.

6. political and social change, then the arts, then global popular culture

Culture is presented as responding to the century's upheavals.

7. substitution

It accepts the technology and rejects the dependence.

8. examine the gap between the stated goal and the record

That is better history than either praise or dismissal.

9. a distribution problem

They are treatable and preventable conditions that continued anyway.

10. reduced the problem of geographic distance

Shipping still takes weeks; bandwidth and air freight cost money.
