

Revolutions

AP World History ■ Unit 5

AP World History

What we will cover

- 1 The Enlightenment
- 2 Nationalism and Revolution
- 3 The Industrial Revolution Begins
- 4 Industrialisation Spreads
- 5 Government, Economy, and Reaction
- 6 Society in the Industrial Age

The Enlightenment

Unit 5 covers 1750 to 1900, and it has two engines running at once: an intellectual revolution that changed how people justified political authority, and an industrial revolution that changed how societies produced and lived. Most questions ask you to connect them.

- **Individualism** 个人主义, **natural rights** 天赋权利, and the **social contract** 社会契约.
- Calls for **religious tolerance** 宗教宽容 and limits on established authority.

The Enlightenment, continued

Those ideas influenced **reform movements** 改革运动: the expansion of suffrage, the abolition of slavery, and **demands for women's suffrage** 妇女选举权诉求 alongside an emergent **feminism** 女权主义 that challenged political and gender hierarchies.

Nationalism and Revolution

Discontent with monarchist and imperial rule encouraged **revolution** 革命. Enlightenment ideas, as reflected in revolutionary documents, justified those movements, and colonial subjects in the Americas led a series of rebellions inspired by them – the examinable set being the American, French, Haitian, and Latin American revolutions.

Answers that give only the idea, or only the grievance, explain nothing.

The Industrial Revolution Begins

no single factor is sufficient - the answer to 'why here, why then' is the COMBINATION

the distinction this unit turns on

The Industrial Revolution Begins

A **variety of factors** contributed to the growth of industrial production: access to **coal** 煤炭 and **iron** 铁, navigable rivers and canals, **agricultural productivity** 农业生产率 that freed labour, **capital** 资本 and legal protection for it, urbanisation, and access to raw materials and markets through overseas empire.

That change – as much organisational as technical – is what made the scale of output possible.

Industrialisation Spreads

The rapid development of **steam-powered** 蒸汽动力 industrial production in Europe spread to other regions, and as new methods became common, states that industrialised gained enormous advantages in wealth and military power over those that did not.

Government, Economy, and Reaction

As industrial influence grew, a small number of **states sponsored industrialisation** 国家推动工业化 directly – the standard examples being Meiji Japan, Russia under state-led programmes, and Egypt under Muhammad Ali.

- Workers organised, often in **labour unions** 工会, and pressed for shorter hours, safety, and wages.
- **Alternative visions** of society emerged – **socialism** 社会主义, **communism** 共产主义, and **anarchism** 无政府主义 – as critiques of industrial capitalism.
- Some governments passed **reform legislation** 改革立法 on working conditions, child labour, and public health.
- The expansion of industrialising states led to **internal reform movements** 内部改革运动 elsewhere in Asia, as states tried to respond to new pressure.

Government, Economy, and Reaction, continued

Western European countries began abandoning **mercantilism** and adopting **free trade** 自由贸易 policies, and the global nature of trade and production contributed to the proliferation of **transnational businesses** 跨国企业 and new financial instruments.

Society in the Industrial Age

New **social classes** 社会阶级 formed, including a **middle class** 中产阶级 and an **industrial working class** 工业工人阶级, each with its own culture and politics.

Continuity and Change in the Industrial Age

The unit's reasoning skill is **continuity and change**.

Production and class structure changed fundamentally, while imperial competition, coerced labour in colonised regions, and inequality persisted in new forms.

Exam tips

- Answer "why Britain first" with **several factors at once** – coal, capital, agriculture, empire – not one cause.
- The **factory system** is an organisational change; say what it replaced.
- For revolutions, pair an **idea** with a **grievance**. Either alone explains nothing.
- **State-sponsored industrialisation** (Meiji Japan, Russia, Egypt) is the contrast to the British pattern.
- Give the reactions as a set: **unions**, **socialism and communism**, and **reform legislation**.
- Living standards rose **eventually and unevenly**. Saying so is what makes an answer an evaluation.
