

HSK4 – student checkpoint

Chinese

Original course checkpoints; not official mock papers, scaled HSK scores or unseen assessments.

Work with help closed first. Play each listening passage twice. Complete reading before checking answers. Speaking and writing require human feedback; use the models for review after attempting the task.

Suggested time: listening 12 minutes, reading 15 minutes, writing 18 minutes, speaking 6 minutes. These are short-course practice times, not official examination timings.

Listening

Play the audio at exercises.lol/chinese/checkpoint/hsk4 or ask a teacher to read the separate script twice. Keep the script closed.

Writing

Write a connected Chinese message of at least 80 characters explaining a schedule change. Give the new arrangement, the reason, what stays the same and what the reader needs to do. You may invent the details.

Speaking

Recommend one of two plans for a group activity. Give an advantage and a limitation, then respond to a partner who prefers the other plan.

Review one uncertain detail and try a fresh response tomorrow. This checkpoint does not produce an official HSK score.
