

Exercise walk-through

# 2.3

## Using CSS to Enhance your Website

---

GAC Computing

## You must be able to

- identify selectors and declarations
- distinguish margin from padding
- choose flexible sizing for a small screen

1

The method

---

## Method — Let the layout adapt

In `max-width: 400px; width: 100%;`, the card can fill a narrow screen but never become wider than 400 pixels. This is more flexible than a fixed width. In the **box model** 盒模型, padding is inside the border; margin is outside it. Use padding for space within a card and margin for space between cards.

2

Practice

---

## Practice 2.1 ■ 1 mark

State what a CSS selector chooses.

## Solution 2.1

### Worked steps

- The element or elements to style. **B1**

## Practice 2.2 ■ 1 mark

State whether padding is inside or outside an element's border.

## Solution 2.2

Method: Let the layout adapt — p.4

### Worked steps

- Inside. **B1**
