GAC Computing

Name: _____ Score: _____

1. Which search is more likely to return research-grade sources?
 - ☐ "Do electric cars really pollute less than petrol cars overall?"
 - ☐ lifecycle emissions electric vehicle comparison
 - ☐ electric cars good or bad
 - ☐ best car 2025
2. What is the right way to divide a group document?
 - ☐ By sentence, so everyone contributes everywhere
 - ☐ By section, agreed before anyone writes
 - ☐ One person writes it all
 - ☐ Everyone writes their own version and picks the best
3. What does a scope statement do?
 - ☐ Lists who is in the group
 - ☐ Says what the project will and will not do
 - ☐ Sets the final deadline
 - ☐ Describes the presentation
4. A slide needs two sentences to summarise. What does that mean?
 - ☐ It is a good, dense slide
 - ☐ It is two slides
 - ☐ It needs a smaller font
 - ☐ It needs animation
5. Your rehearsal is 90 seconds too long. What should you do?
 - ☐ Speak faster on the day
 - ☐ Cut content
 - ☐ Skip the questions section
 - ☐ Read from a script
6. A storyboard has eight shots of about fifteen seconds each. How long is the video, in seconds?

7. Which operator restricts results to a single domain?

8. Writing your part privately and pasting it in at the end is a safe way to work.

☐ True ☐ False

9. A task assigned to "the group" is safer than one assigned to a named person.

☐ True ☐ False

10. A chart on a slide can leave out axis labels if you explain them aloud.

☐ True ☐ False

Answers · 答案

GAC Computing

1. lifecycle emissions electric vehicle comparison

Those are the words a study would use. A question phrased as a sentence matches pages written as answers to questions.

2. By section, agreed before anyone writes

Sections can be owned; sentences cannot. Then one person reads it through for consistency.

3. Says what the project will and will not do

The "will not" half is the useful half. Most overrun starts as an unwritten extra.

4. It is two slides

One message per slide. Shrinking the font hides the problem instead of fixing it.

5. Cut content

Speaking faster in a second language reduces what the audience receives. Cutting protects comprehension.

6. 120

Two minutes. Fixing the length first is what stops the script growing.

7. site:

site:gov, site:edu, site:org — the fastest way to filter by the kind of publisher.

8. False

The version history is your evidence of contribution, and a single late paste looks like doing nothing until the deadline.

9. False

A task owned by everyone is owned by nobody. Name the person, every time.

10. False

Labels and units are a marked criterion, and the audience reads the chart before you reach that sentence.
