Answers ·

GAC Academic English

1. **Recruit volunteers and give response details**

   Its direct address and event details encourage a response; it does not report a controlled comparison.

2. **Nearby**

   The following walking clue supports nearby; the text gives no exact distance.

3. **Eighteen of twenty orders were collected within the window**

   On-time collection directly addresses how the arrangement worked.

4. **A later word-recall task score**

   Card H describes a recall task, not a clinical outcome or prescribed duration.

5. **What should a small museum consider when improving visitor information?**

   The cards address access, clarity and maintenance in small-museum practice, not universal or international rankings.

6. **30**

   $120 - 90 = 30$. No customer counts were recorded.

7. **11**

   The report states eleven returned; eighteen attended at least one session.

8. **True**

   Reasons, contrasts and conditions differ in meaning; grammatical decoration alone is insufficient.

9. **2**

   $20 - 18 = 2$, consistent with the two late-arriving customers.

10. **24**

    The passage explicitly states twenty-four volunteers.
