

Solutions

2.1 Registration shows uptake at one stage, not effective healthcare access. Inspect failed connections, device sharing, staff availability, patient groups and existing alternatives. Compare completed timely consultations and relevant access barriers before and after implementation, with a suitable comparator where possible. Include privacy, power reliability and environmental costs. Authored points for identifying relevant evidence, explaining a supported inference and a material limit.

3.1 The overall count can rise without reducing exclusion. Compare completion and barriers for previously underserved users, using compatible definitions and periods. Evaluate alternatives, costs and unmet need before claiming equitable improvement. Authored points for a relevant judgement, reason tied to the case and justified qualification or method. Accept a supported alternative.
