

Supported preparation: Inquiry method and source evaluation

International Baccalaureate · IB Diploma · Religion and Society · SL

Scope and prerequisites

IB Religion and Society first assessment 2029; future course only. At least three religious traditions through change, identity, interpretation and power. Foundations distinguish contextual definitions, classification frameworks, and academic versus devotional approaches.

Mapped preparation outcomes: `ib_religions_society_sl.3.1`, `ib_religions_society_sl.3.2`. Read the matching native lesson first. Actual approved choices, evidence and final learner work remain separate.

Source vocabulary

`inquiry focus` ; `expression` .

Explanation and worked method

A focused inquiry connects an approved issue with a course concept and relevant evidence. Compare source origin, method, purpose and scope. Keep uncertainty and researcher position visible.

Original source / task evidence

Task: a committee leaflet and one member's account disagree about who shaped a decision. Plan an inquiry without fabricating engagement.

Separate what is stated from the interpretation.
Inquiry method and source evaluation

Task: a committee leaflet and one member's account disagree about who shaped a decision. Plan an inquiry without fabricating engagement.

Ask how authority was exercised in a bounded setting. Compare minutes if available, document purpose and approved voluntary accounts; distinguish formal rules from practice. Neither one interested source nor one dissenter settles the whole issue.

Independent transfer

Decision minutes are unavailable. What can the inquiry conclude from the leaflet and one account?

Attempt independently before reading the model.

Checked original model

It can compare the public justification and the individual's reported experience, with attribution and limits. It cannot reconstruct every decision or hidden motive. Revise the question to the available source claims, identifying minutes or varied independent accounts as precise missing evidence.

These are authored formative expectations, not official IB descriptors. Accept other justified arguments with evidence and material limits.

Source and task holds

Scope authority: `coverage.yaml` and its hashed source files. Detailed full-guide criteria and school selections remain held exactly as recorded; this supplement teaches the supported method. No practice-bank item, reserved diagnostic or student evidence has been republished.
