1. **11**

It lasts 11 to 14 minutes.

2. **4**

Four — Fluency and coherence, Lexical resource, Grammatical range and accuracy, and Pronunciation. It is a full quarter of the band and almost nobody prepares it.

3. **Six to eight nouns, one or two per prompt**

Nouns trigger speech; sentences get read aloud, and reading aloud is audible and discounted as memorised language.

4. **Yes, I do — I cook dinner most evenings because it's the one part of the day I'm not looking at a screen.**

Answer plus one reason or example, two or three sentences. One word gives the examiner nothing; a speech costs you the next question.

5. **1**

One minute to prepare, then up to two minutes to speak.

6. **English carries a lot of grammar on its final consonants**

Tense, plural and possession all live at the end of the word. Dropping the consonant removes the grammar as well as the sound.

7. **2**

Two, and the examiner will not stop you early. Most candidates dry up at about 45 seconds, which is what the timer practice is for.

8. **It tends to be; It depends on; That's probably truer of X than of Y**

'I don't know' ends the answer. The other three qualify a claim, which needs a structure — and that structure is what is marked.

9. **A trained examiner, face to face**

It is a live interview with one examiner in all three parts.

10. **pho-TO-gra-phy**

phoTOgraphy. Compare PHOtograph and photoGRAPHic — the stress moves when the suffix changes, which is where most errors live.
