

13 Excretion and the kidneys – Part 1

—Answers

Answers

Work through these after trying the questions yourself.

13.1 The removal of the waste products of the body's chemical reactions (and of substances in excess).

13.2 Carbon dioxide.

13.3 In the liver.

13.4 The kidneys.

13.5 kidney → ureter → bladder → urethra.

13.6 **Carbon dioxide** is made in cells by respiration and leaves through the **lungs**. **Urea** is made in the **liver** and leaves through the **kidneys** (in urine).
