1(e)	Explain <u>two</u> ways a business can increase added value. Which is likely to be the best way for a business to use? Justify your answer. Award up to 2 marks for identification of relevant points. Award up to 2 marks for relevant development of points. Award up to 2 marks for a justified decision as to which is the best way for a business to increase added value. Points might include: Ways to increase price: • (Improve) quality of product/service [k] so customers may be prepared to <u>pay higher prices</u> [an] • (Build a) brand image/marketing/packaging [k] so customers think the product is <u>worth more</u> [an] • (Improve) product features / change/create a unique design [k] making the product more desirable than similar products so willing to <u>pay more</u> [an] • Convenience [k] customers may <u>pay more</u> for a product they can have straightaway [an] Ways to lower (input/raw material) costs: • Buy cheaper raw materials / find cheaper suppliers [k] reduces material/input costs [an] widening the gap between cost and price [an] • Reduce the number of materials used [k] Other appropriate responses should also be credited. Justification might include: One way is improving the quality [k] as customers may be willing to pay a higher price [an]. It could buy cheaper raw materials [k] which may reduce material costs [an]. Improving quality is better because cheaper materials could damage the reputation leading to fewer sales [eval] while improving quality could even help attract new customers [eval].
