

3(a)	Identify <u>two</u> ways business activity can affect the environment. Award 1 mark per way (max 2). Points might include: • Pollution (or examples) • Use up green space / deforestation / loss of habitat • Deplete natural resources / overmining • (Traffic) congestion Other appropriate responses should be credited.
3(b)	Identify <u>two</u> reasons why a business should respond to environmental pressures. Award 1 mark per reason (max 2). Points might include: • Enhance/protect brand image / reputation • Attract/maintain sales • Reduce risk of customer boycott • Differentiate from competitors • To avoid pressure group action • Help recruit employees • Help retain employees • Help attract investors • Reduce risk of legal action/fines / ensure meets legal standards Other appropriate responses should be credited.

3(c)

Outline two ways economic growth might affect STB.

Award 1 mark for each relevant way (max 2).

Award 1 mark for each relevant reference to this business (max 2).

Points might include:

- High demand/sales [k] for houses [app]
- More difficult to recruit/find suitable employees [k] for job production [app]
- High(er) business profits likely [k] for this public limited company [app]
- Can increase output [k] above 13 500 (houses) [app]
- Increase in/high level of business confidence for STB [k]
- STB may consider more investment [k]
- Employees may ask for higher wages [k]
- Increased rent costs / less choice of location [k]

Other appropriate responses should be credited.

3(d)

Explain two benefits to STB of using job production.

Award 1 mark for identification of each relevant benefit (max 2).

Award 1 mark for each relevant reference to this business (max 2).

Award 1 mark for each relevant explanation (max 2).

Points might include:

- Motivate employees [k] helping lower absenteeism / increase retention [an] among its 5000 employees [app]
- Could set high(er) price [k] for each house [app] which may help increase added value/increase profit margin [an]
- Meet exact customer requirements/needs [k] can help brand loyalty / increase competitive advantage [an] for this public limited company [app]
- Unique/one-off product / specialised products / USP [k]
- High-quality goods/service [k]

Other appropriate responses should be credited.

3(e)

Do you think employees are the most important stakeholder group for a manufacturing business? Justify your answer.

Award up to 2 marks for identification of relevant points.
Award up to 2 marks for relevant development of points.
Award up to 2 marks for justified decision about whether employees are the most important stakeholder group for a manufacturing business.

Points might include:

- Make/produce the products [k] otherwise there is nothing to sell/cannot meet demand [an]
- Responsible for quality [k] which could improve/damage its reputation [an]
- Without sufficient employees the business may not be able to meet demand [k]

Other stakeholder groups include:

- Shareholders/owners [k] who provide finance / invest money / capital for the business [an]
- Customers [k] as they buy the products [an] generating revenue [an]
- Suppliers [k] who provide materials/inventory [an]
- Local community [k] who provide the workers for the business [an]
- Government [k] as it provides the legal framework in which the business operates [an]
- Bank [k] who provide finance/loans [an]

Other appropriate responses should be credited.

3(e)

Justification might include:

Employees are important as they make the products [k] otherwise there is nothing to sell [an]. Another stakeholder group is customers [k] as they buy the products [an].

Customers are the most important stakeholder because without them, the manufacturing business cannot generate revenue, which is necessary to pay the costs including wages [eval] whereas the business could use machinery instead of some employees. [eval]

2(a)	Identify <u>one</u> way each of the following changes in country X's exchange rate might affect businesses which import materials. Award 1 mark for each way (max 2). Points might include: • Depreciation: Imports dearer/more expensive • Appreciation: Imports cheaper
2(b)	Identify <u>two</u> reasons why consumer spending patterns might change. Award 1 mark for each reason (max 2). Points might include changes in: • Price of product • Price of competitors products/increased competition • Incomes/wages/unemployment/business cycle or examples • Population size/structure/life stage of consumers • Taste/fashion/preferences • Advertising/promotion • Technology • Taxation • Interest rates • Exchange rates • Weather/season Other appropriate responses should be credited.

2(c)

Outline two reasons why maintaining quality is important for NSL.

Award 1 mark for each relevant reason (max 2).

Award 1 mark for each relevant reference to this business (max 2).

Points might include:

- Develop strong brand image / generate good publicity / better reputation [k] for its food [app]
- Keep customer loyalty/remain competitive [k] which may help as spending patterns change [app]
- Can charge high/premium prices [k] which may help cover any effect of exchange rates [app]
- Lower costs/less wastage [k] at the factory [app]
- Fewer customer complaints/returns [k]
- Attract new customers/increase sales [k]
- To meet legal requirements [k] such as food standards [app]
- It adds value [k]

Other appropriate responses should be credited.

2(d)

Explain two benefits to NSL of using lean production.

Award 1 mark for identification of each relevant benefit (max 2).

Award 1 mark for each relevant reference to this business (max 2).

Award 1 mark for each relevant explanation (max 2).

Points might include:

- Fewer mistakes/errors [k] so less rework / lower repair costs / may improve reputation [an] as maintaining quality is important [app]
- Less inventory held [k] of imported materials [app] lowering storage costs/amount of working capital [an]
- Cut out some processes [k] when making the food [app] which speeds up production / increase productivity [an]
- Increase motivation [k] leading to lower absenteeism / reduce labour turnover [an] at the factory [app]
- Less waste of time/ materials OR improved efficiency [k]quicker/increased output [an]
- Lower (unit) costs [k] improving competitiveness [an]

Other appropriate responses should be credited.

2(e)

Explain two methods of market research a business could use to help make business decisions. Which is likely to be the best method for a manufacturing business to use? Justify your answer.

Award up to 2 marks for identification of relevant points.
Award up to 2 marks for relevant development of points.
Award up to 2 marks for a justified decision as to which is the best method of market research for a manufacturing business to use to make business decisions.

Points might include:

- Government sources/statistics [k] provide information from a wide number of people [an]
- Using internet/online sources [k] which is free / low cost / immediately available [an]
- Information from trade associations/journals [k] as specifically about the industry [an]
- Market research agency reports [k] can often be expensive/provide detailed information [an]
- Questionnaire [k] as provides up-to-date information / specific to the business [an]
- Interviews [k] to obtain in depth details/opinions [an]
- Survey [k] can reach out to more/large number of people [an]
- Focus group [k] as it provides detailed information / allows for follow-up questions [an]
- Test marketing [k] so the cost of any problem is limited to a smaller number of products [an]
- Observation [k] low cost [an]
- Newspapers/magazines [k]

Other appropriate responses should be credited.

2(e)	Justification might include: Government statistics [k] provide information from a wide number of people [an]. A focus group [k] can provide detailed information about consumer tastes [an]. Government statistics are better because they are based on wide samples whereas a focus group is based on a few existing customers so it may not identify what is happening in the market overall so the business may not produce the right product. [eval] [eval]
------	--

4(a)	Explain <u>one</u> effect on PF of the increase in each of the <u>two</u> taxes outlined in Appendix 2. • Tax on people's income • Tax on profit made by businesses Award 1 mark for each effect (max 2). Award a maximum of 3 additional marks for each explanation of the effect of the increase in each tax – one of which must be applied to this context. Relevant effects of the increase in tax on people's income might include: • Consumers will have less income to spend – may reduce demand for products – leads to lower sales and revenue • Little effect on sales of non-luxury products – as consumers may still make purchases of lower priced goods – so output remains at a similar level • If seen as a lower priced alternative product – then may even see sales increase – as customers switch from higher priced competing products • Employees may ask for a wage increase to return their take home pay to what it was before the increase in tax level – if successful then wage costs will increase • Employees may not be as motivated as now lower pay after tax – may reduce output/efficiency Relevant effects of the increase in tax on profit made by businesses might include: • May leave less profit to be retained for future investment in the business – reduces investment in the business – may become less competitive in the future leading to lower sales • Owner will be left with less profit to be received in dividends – less incentive to carry on with the risks of owning a business • Discourages existing/new shareholders from investing in the business – so will have to look for other ways to obtain funds For example: Consumers will have less income available to spend (1) as the increase in tax will reduce their take-home pay (1) may reduce demand for PF's shoes (app) which will lead to lower sales and revenue (1). Application could include: rubber shoes; natural rubber raw material; build a new factory; 20 workers; paid a weekly wage; selling in a mass market; bank loan for new factory; sister wants to invest in the business; \$100 000; 2% rise tax on incomes; 4% rise in tax on profits; information from Appendix 3.
------	--

4(b)

Using Appendix 3 and other information, consider PF's financial position in 2025 and forecast financial position in 2026. Do you think Philip's sister should invest in PF? Justify your answer using suitable calculations.

Level	Description	Marks
3	Sound application of knowledge and understanding of relevant business concepts using appropriate terminology. Detailed discussion of the both statements. Well-justified recommendation. Candidates discussing both statements in detail, in context and with a well-justified recommendation, including whether or not Philip's sister should invest in PF, should be rewarded with the top marks in the band.	9–12
2	Sound application of knowledge and understanding of relevant business concepts using appropriate terminology. Detailed discussion of at least one statement. Judgement with some justification/some evaluation of choice made. Candidates discussing at least one statement in detail and applying it to the case should be rewarded with the top marks in theband.	5–8
1	Limited application of knowledge and understanding of relevant business concepts. Limited ability to discuss the statements with little/no explanation. Simple judgement with limited justification/limited evaluation of choice made. Candidates outlining both statements in context should be rewarded with the top marks in the band.	1–4
0	No creditable response.	0

4(b)	Relevant points might include: <table border="1"> <tr> <td data-bbox="368 185 651 461">Basic points might include:</td><td data-bbox="651 185 1385 461"> - The non-current assets are forecast to increase by \$500 000 - Inventories are forecast to increase by \$20 000 - Long-term bank loans are forecast to increase by \$460 000 - The amount of retained profit is forecast to increase by \$40 000 to \$100 000 in 2026 </td></tr> <tr> <td data-bbox="368 461 651 1249">More developed points might include:</td><td data-bbox="651 461 1385 1249"> - The current ratio for 2025 is 1.25 - The current ratio forecast for 2026 is 1.2 - The acid test ratio for 2025 is 1 - The acid test ratio forecast for 2026 is 0.6 - The current ratio for 2025 could be considered low and is better to be nearer 2 which would show that the business is able to pay its short-term debts and has sufficient liquidity - The current ratio forecast for 2026 is lower than for 2025 and is a cause for concern as to why it has fallen. This may mean that the business will have expanded too quickly and may have cash flow problems in the future - The low acid test ratio for 2026 suggests that the business is likely to have liquidity problems after the new factory is built - The expansion appears to have been forecast to be mainly funded by a large bank loan of \$460 000 – this may cause problems in the future as the interest repayments of this loan will result in a large increase in expenses – possibly reducing profitability in the future </td></tr> <tr> <td data-bbox="368 1249 651 1821">Recommendation</td><td data-bbox="651 1249 1385 1821"> Justification might include: - Philip's sister should invest in PF as the non-current assets are forecast to increase by nearly double and the building of the new factory is predicted to be financed mainly by a bank loan. The bank will be confident of a successful expansion of PF, or it will not grant such a big loan. This should help reassure Philip's sister that the investment will provide good returns in the future. - Philip's sister should not invest in PF as the forecast statement of financial position suggests that there may be significant liquidity problems producing shoes in the future with an expected fall in the current ratio of 0.05 and an expected fall in the acid test ratio of 0.4. </td></tr> </table>	Basic points might include:	- The non-current assets are forecast to increase by \$500 000 - Inventories are forecast to increase by \$20 000 - Long-term bank loans are forecast to increase by \$460 000 - The amount of retained profit is forecast to increase by \$40 000 to \$100 000 in 2026	More developed points might include:	- The current ratio for 2025 is 1.25 - The current ratio forecast for 2026 is 1.2 - The acid test ratio for 2025 is 1 - The acid test ratio forecast for 2026 is 0.6 - The current ratio for 2025 could be considered low and is better to be nearer 2 which would show that the business is able to pay its short-term debts and has sufficient liquidity - The current ratio forecast for 2026 is lower than for 2025 and is a cause for concern as to why it has fallen. This may mean that the business will have expanded too quickly and may have cash flow problems in the future - The low acid test ratio for 2026 suggests that the business is likely to have liquidity problems after the new factory is built - The expansion appears to have been forecast to be mainly funded by a large bank loan of \$460 000 – this may cause problems in the future as the interest repayments of this loan will result in a large increase in expenses – possibly reducing profitability in the future	Recommendation	Justification might include: - Philip's sister should invest in PF as the non-current assets are forecast to increase by nearly double and the building of the new factory is predicted to be financed mainly by a bank loan. The bank will be confident of a successful expansion of PF, or it will not grant such a big loan. This should help reassure Philip's sister that the investment will provide good returns in the future. - Philip's sister should not invest in PF as the forecast statement of financial position suggests that there may be significant liquidity problems producing shoes in the future with an expected fall in the current ratio of 0.05 and an expected fall in the acid test ratio of 0.4.
Basic points might include:	- The non-current assets are forecast to increase by \$500 000 - Inventories are forecast to increase by \$20 000 - Long-term bank loans are forecast to increase by \$460 000 - The amount of retained profit is forecast to increase by \$40 000 to \$100 000 in 2026						
More developed points might include:	- The current ratio for 2025 is 1.25 - The current ratio forecast for 2026 is 1.2 - The acid test ratio for 2025 is 1 - The acid test ratio forecast for 2026 is 0.6 - The current ratio for 2025 could be considered low and is better to be nearer 2 which would show that the business is able to pay its short-term debts and has sufficient liquidity - The current ratio forecast for 2026 is lower than for 2025 and is a cause for concern as to why it has fallen. This may mean that the business will have expanded too quickly and may have cash flow problems in the future - The low acid test ratio for 2026 suggests that the business is likely to have liquidity problems after the new factory is built - The expansion appears to have been forecast to be mainly funded by a large bank loan of \$460 000 – this may cause problems in the future as the interest repayments of this loan will result in a large increase in expenses – possibly reducing profitability in the future						
Recommendation	Justification might include: - Philip's sister should invest in PF as the non-current assets are forecast to increase by nearly double and the building of the new factory is predicted to be financed mainly by a bank loan. The bank will be confident of a successful expansion of PF, or it will not grant such a big loan. This should help reassure Philip's sister that the investment will provide good returns in the future. - Philip's sister should not invest in PF as the forecast statement of financial position suggests that there may be significant liquidity problems producing shoes in the future with an expected fall in the current ratio of 0.05 and an expected fall in the acid test ratio of 0.4.						

4(a)	Explain <u>two</u> possible effects on TSE of the business cycle in country P moving into the recession stage. Award 1 mark for each relevant effect (max 2). Award a maximum of 3 additional marks for each explanation of the effects on TSE of the business cycle moving into the recession phase – one of which must be applied to this context. Relevant effects might include: • Makes it easier for TSE to recruit new employees – larger pool of unemployed people to choose from – may be more skilled people available for work • May make it easier to resist demand for higher wages from employees – with a high level of unemployment – there will be more competition amongst workers for jobs so willing to accept lower wages • May lead to lower demand for TSE's products – consumer spending is lower – as many people have lost their jobs – so incomes are lower • Lower priced products produced by TSE may see an increase in demand – as consumers have less income available to spend on luxury high priced items – buy cheaper substitutes • TSE may be less willing to invest – as future sales and therefore profit may not increase for some time in country P – making it more difficult to gain a return on investment • TSE may focus more on the export of its products to make up for the lower sales in country P • Lower revenue – may lead to lower profits For example: Makes it easier for TSE to recruit new employees (1) as there is a larger pool of unemployed people to choose from (1) and there may be more skilled people available to work for TSE (1) leading to an increase in the output of sports equipment (app). Application could include: sports equipment; skilled and full-time workers; plastic raw materials; sells in more than 30 countries; factories in 10 countries; want to increase market share; a well-motivated workforce is important; uses new technology and automation for flow production; unemployment is increasing.
------	--

4(b)

Using Appendix 3 and other information, consider the extracts from the income statements for the two companies in country P. Which company should TSE take over? Justify your answer using suitable calculations.

Level	Description	Marks
3	Sound application of knowledge and understanding of relevant business concepts using appropriate terminology. Detailed discussion of both companies. Well-justified recommendation. Candidates discussing both companies in detail, in context and with a well-justified recommendation, including why the alternative company was rejected, should be rewarded with the top marks in the band.	9–12
2	Sound application of knowledge and understanding of relevant business concepts using appropriate terminology. Detailed discussion of one company. Judgement with some justification / some evaluation of choice made. Candidates discussing at least one company in detail and applying it to the case should be rewarded with the top marks in the band.	5–8
1	Limited application of knowledge and understanding of relevant business concepts. Limited ability to discuss the companies with little/no explanation. Simple judgement with limited justification / limited evaluation of choice made. Candidates outlining the two companies in context should be rewarded with the top marks in the band.	1–4
0	No creditable response.	0

4(b)	Relevant points might include: Simple statements: • Company B has twice as much revenue at \$200m • Company A has less revenue than Company B • Company A has less than half the cost of sales, a difference of \$50m • Company B has higher cost of sales at \$90m • The expenses are less than twice as much for Company B at \$60m • Lower revenue means that Company A is probably smaller than Company B Possible calculations: • The gross profit of Company A is \$60m • The gross profit margin of Company A is 60% • The gross profit of Company B is \$110m • The gross profit margin of Company B is 55% • The profit of Company A is \$20m • The profit margin of Company A is 20% • The profit of Company B is \$50m • The profit margin of Company B is 25% Justification might include: • TSE should take over Company A because it has a 5% higher gross profit margin than Company B. This suggests that it is more efficient in its management of variable costs. It is a smaller competitor as its revenue is lower at \$100m and therefore it could require a lower amount of capital to take over the company. It should not take over Company B as TSE may need to borrow a much higher amount of capital as the company appears to be larger. • TSE should take over Company B because it has much higher revenue suggesting it is a larger competitor than Company A and will better help TSE to achieve the aim of increasing its market share and it has a 5% higher profit margin than Company A.
------	--

4(a)	Explain <u>two</u> ways the information in the government report outlined in Appendix 3 might affect Jemi's restaurant. Award 1 mark for each way (max 2). Award a maximum of 3 additional marks for each explanation of the way the information in the government report might affect Jemi's restaurant – one of which must be applied to this context. Relevant ways it could affect the restaurant might include: • Increase in number of families demanding vegan meals – because the report suggests that eating more fruit and vegetables is healthy – especially for children and therefore may attract more families to the restaurant • Increase in demand for vegan food from the general population – as increased from 10% to 25% of the population eating only vegan meals – trend forecast to increase in the future so likely for demand to keep increasing leading to growth in the market • May increase competition with other restaurants adding vegan meals to their menus / new restaurants opening up – which may lead to fewer sales for Jemi's restaurant • Finding suppliers of fruit and vegetables may become more difficult – increased transport costs from buying from suppliers further away – more time taken to fetch deliveries • Increased demand from more restaurants serving vegan meals increased demand for ingredients – possibly higher prices for ingredients – higher costs / higher prices For example: Increase in the number of customers (1) as there is likely to be an increase in demand for vegan meals (app) because the government report suggests that eating more fruit and vegetables is healthy (1) especially for children and therefore may attract more families to the restaurant resulting in an increase in revenue (1). Application could include: vegan target market; plant-based ingredients; meals; fruit and vegetables; \$50 000; chefs; working 40 hours a week; 12 employees; increasing trend for people eating vegan meals; good for the environment; menus; recipes.
------	---

4(b)	Consider the following <u>two</u> methods of motivation that Jemi could use. Which method should Jemi choose to use? Justify your answer. • Job enrichment • Discount on meals in Jemi's restaurant		
	Level	Description	Marks
	3	Sound application of knowledge and understanding of relevant business concepts using appropriate terminology. Detailed discussion of both methods of motivation. Well-justified recommendation. Candidates discussing both methods of motivation in detail, in context and with a well-justified recommendation, including why the alternative method of motivation was rejected, should be rewarded with the top marks in the band.	9–12
	2	Sound application of knowledge and understanding of relevant business concepts using appropriate terminology. Detailed discussion of at least one method of motivation. Judgement with some justification/some evaluation of choice made. Candidates discussing at least one method of motivation in detail and applying it to the case should be rewarded with the top marks in the band.	5–8
	1	Limited application of knowledge and understanding of relevant business concepts. Limited ability to discuss the methods of motivation with little/no explanation. Simple judgement with limited justification/limited evaluation of choice made. Candidates outlining both methods of motivation in context should be rewarded with the top marks in the band.	1–4
	0	No creditable response.	0

4(b)	Relevant points might include: <table border="1"> <tr> <td data-bbox="368 185 632 696">Job enrichment</td><td data-bbox="632 185 1396 696"> - Workers in the restaurant to carry out additional tasks that require more skill or responsibility so makes the job less boring – more customers served per hour – reducing average costs - Workers may become more involved in decision-making in the restaurant – makes them feel more valued by the business - May not want to take on additional responsibility – which may demotivate employees – leading to poorer customer service - May not have the skills to carry out the additional tasks – additional training likely to be required – increases costs </td></tr> <tr> <td data-bbox="368 696 632 1106">Discount on meals in Jemi's restaurant</td><td data-bbox="632 696 1396 1106"> - Encourages employee loyalty – by giving the 12 employees the incentive to eat in the restaurant with family and friends – increases sales - Likely to encourage lower labour turnover – if employee values the discounts - Lower revenue after discount applied to meals – reduces gross profit margin on meals served to employees - May be too low to have any impact / employee does not want to eat at the restaurant as does not like vegan food </td></tr> <tr> <td data-bbox="368 1106 632 1617">Recommendation</td><td data-bbox="632 1106 1396 1617"> Judgement might include: - Job enrichment should be chosen as the business is new and may not be able to afford to give a discount. It might be better to add additional tasks that require more responsibility to the job to try to make it more interesting and maintain increased motivation for a longer period of time. A discount may only motivate the 12 restaurant workers for a short time as they may get fed up with the meals at the restaurant. - Discounts on vegan meals in the restaurant will be the best way to motivate employees as it will save them and their families money when eating at the restaurant which will encourage loyalty. </td></tr> </table>	Job enrichment	- Workers in the restaurant to carry out additional tasks that require more skill or responsibility so makes the job less boring – more customers served per hour – reducing average costs - Workers may become more involved in decision-making in the restaurant – makes them feel more valued by the business - May not want to take on additional responsibility – which may demotivate employees – leading to poorer customer service - May not have the skills to carry out the additional tasks – additional training likely to be required – increases costs	Discount on meals in Jemi's restaurant	- Encourages employee loyalty – by giving the 12 employees the incentive to eat in the restaurant with family and friends – increases sales - Likely to encourage lower labour turnover – if employee values the discounts - Lower revenue after discount applied to meals – reduces gross profit margin on meals served to employees - May be too low to have any impact / employee does not want to eat at the restaurant as does not like vegan food	Recommendation	Judgement might include: - Job enrichment should be chosen as the business is new and may not be able to afford to give a discount. It might be better to add additional tasks that require more responsibility to the job to try to make it more interesting and maintain increased motivation for a longer period of time. A discount may only motivate the 12 restaurant workers for a short time as they may get fed up with the meals at the restaurant. - Discounts on vegan meals in the restaurant will be the best way to motivate employees as it will save them and their families money when eating at the restaurant which will encourage loyalty.
Job enrichment	- Workers in the restaurant to carry out additional tasks that require more skill or responsibility so makes the job less boring – more customers served per hour – reducing average costs - Workers may become more involved in decision-making in the restaurant – makes them feel more valued by the business - May not want to take on additional responsibility – which may demotivate employees – leading to poorer customer service - May not have the skills to carry out the additional tasks – additional training likely to be required – increases costs						
Discount on meals in Jemi's restaurant	- Encourages employee loyalty – by giving the 12 employees the incentive to eat in the restaurant with family and friends – increases sales - Likely to encourage lower labour turnover – if employee values the discounts - Lower revenue after discount applied to meals – reduces gross profit margin on meals served to employees - May be too low to have any impact / employee does not want to eat at the restaurant as does not like vegan food						
Recommendation	Judgement might include: - Job enrichment should be chosen as the business is new and may not be able to afford to give a discount. It might be better to add additional tasks that require more responsibility to the job to try to make it more interesting and maintain increased motivation for a longer period of time. A discount may only motivate the 12 restaurant workers for a short time as they may get fed up with the meals at the restaurant. - Discounts on vegan meals in the restaurant will be the best way to motivate employees as it will save them and their families money when eating at the restaurant which will encourage loyalty.
