

38 Which statement about addition polymers or condensation polymers is correct?

- A** Addition polymers only contain carbon and hydrogen atoms.
- B** One of the monomers used to make a polyester is a diamine.
- C** Addition polymers contain carbon–carbon double bonds in the main chain.
- D** Water is an additional product in the formation of a protein from amino acids.

35 The diagrams represent four monomers.

The monomers each react in a 1 : 1 ratio with the dicarboxylic acid shown.

How many of the four monomers shown can react with the dicarboxylic acid to form a polymer?

- A** 1 **B** 2 **C** 3 **D** 4

38 Nylon is made in a polymerisation reaction.

Which row describes the type of polymerisation and identifies the other product of the reaction?

	type of polymerisation	other product
A	addition	water
B	addition	none
C	condensation	water
D	condensation	none
