

2.10 Mixed economic system

Name: _____ Class: _____ Date: _____

Total: 18 marks

KEY WORDS public sector • private sector • intervention
 • maximum price • minimum price

Objective

Build the skills to answer exam questions on **the mixed economic system**

– the **private and public sectors**, and government **intervention**
 (maximum and minimum prices, taxes, subsidies, regulation, direct provision).

You must be able to:

- explain what a mixed economy is
- describe the methods of government intervention
- analyse and evaluate government intervention to correct market failure

1 Key knowledge and worked examples

■ Government intervention

A mixed economy has both a private and a public sector

- **Mixed economy** : a **private sector** (price mechanism) + a **public sector** (government).
- **Maximum price** (below equilibrium) → a shortage. **Minimum price** (above equilibrium) → a surplus.
- **Indirect tax** (cuts demerit goods), **subsidy** (raises merit goods), **regulation**, **direct provision**.

Exam: merit → under-consumed (subsidise); demerit → over-consumed (tax / regulate)

The public sector steps in for merit and demerit goods the market gets wrong

Answer shapes: an **Analyse** [up to 6] answer may use a price-control diagram; **Discuss** [8] adds a judgement (Ev).

2 Practice

2.1 Define the term *mixed economy*. [2]

2.2 State the effect of a **maximum price** set below the equilibrium price. [1]

2.3 Identify two methods of government intervention. [2]

3 Exam-style questions

3.1 A government sets a **minimum price** above the equilibrium. This will cause: [1]

- ☐ **A** a shortage
B a surplus
C the market to clear
D demand to rise

3.2 Using a diagram, explain the effect of a maximum price set below the equilibrium price. [4]

3.3 Discuss whether a government should use an indirect tax to reduce consumption of a demerit good. [8]
