

2.5 Price changes

Name: _____ Class: _____ Date: _____

Total: 16 marks

KEY WORDS shortage 短缺 • excess demand 超额需求 • excess supply 超额供给 • surplus 过剩
• disequilibrium 非均衡

Objective

Build the skills to answer exam questions on **price changes** 价格变化 — how a **shift** in demand or supply changes the equilibrium, and **disequilibrium** 非均衡 (**excess demand and excess supply** 超额需求与超额供给).

You must be able to:

- state how a shift in demand or supply changes price and quantity
- explain excess demand (a shortage) and excess supply (a surplus)
- analyse how the market returns to equilibrium

1 Worked examples

■ Disequilibrium

Either way the price is pushed back to equilibrium

- **Demand right** → price ↑, quantity ↑. **Supply right** → price ↓, quantity ↑.

- **Excess demand** 超额需求 (price too low) = a **shortage** 短缺 → buyers compete, price rises.
- **Excess supply** 超额供给 (price too high) = a **surplus** 过剩 → sellers cut the price.

A shift in demand (or supply) moves the equilibrium to a new price and quantity

Answer shapes: an **Analyse** [up to 6] answer should use a labelled diagram; **Discuss** [8] adds a judgement (Ev).

2 Practice

2.1 Define the term *excess demand*. [2]

2.2 State what happens to price when there is a **surplus** (excess supply). [1]

2.3 State the effect on equilibrium price and quantity of a rightward shift in supply. [2]

3 Exam-style questions

3.1 A price set **below** the equilibrium price will cause: [1]

A	B
C	D

A excess supply, pushing price down

B excess demand, pushing price up

C the market to stay in equilibrium

D the demand curve to shift left

3.2 Explain how a market with a **surplus** returns to equilibrium. [4]

3.3 Bad weather destroys part of a coffee harvest. Analyse the effect on the market for coffee. [6]
