

4.1 Government macroeconomic intervention

Name: _____ Class: _____ Date: _____

Total: 19 marks

KEY WORDS inflation 通货膨胀 • macroeconomic aims 宏观经济目标
• balance of payments 国际收支 • conflict 冲突 • unemployment 失业

Objective

Build the skills to answer exam questions on **government macroeconomic intervention** 政府宏观经济干预 — the five **macroeconomic aims** 宏观经济目标 and how they can **conflict** 冲突, and the three policy tools.

You must be able to:

- state the five macroeconomic aims
- explain a conflict between two aims
- identify the three policy tools (fiscal, monetary, supply-side)

1 Worked examples

■ Aims and tools

Exam: fiscal = G & T; monetary = interest rate / money; supply-side = capacity & productivity

Governments balance aims that can pull against each other

- **Aims:** economic growth, **full employment** 充分就业, **price stability** 价格稳定, **balance of payments** 国际收支 stability, redistribution.
- **Conflict** 冲突: fast growth or cutting unemployment can pull prices up (inflation).
- **Tools:** **fiscal** 财政 (spending/tax), **monetary** 货币 (interest rates), **supply-side** 供给侧 (capacity).

Policy aims to smooth the business cycle — supporting demand in a slump, cooling it in a boom

Answer shapes: K + App + An + Ev (a justified judgement, for discuss questions).

2 Practice

2.1 State three macroeconomic aims of a government.

[3]

2.2 State one conflict between two macroeconomic aims.

[2]

2.3 Identify the three sets of government policy tools.

[3]

3 Exam-style questions

3.1 Fast economic growth is most likely to **conflict** with the aim of: [1]

A	B
C	D

- A** full employment
- B** price stability
- C** higher tax revenue
- D** higher incomes

3.2 Explain why low unemployment and low inflation may be difficult to achieve at the same time. [4]

3.3 Analyse why a government may not be able to achieve all of its macroeconomic aims at once. [6]
