| 2(d) | <p><b>Discuss whether or not increased government spending on education will lead to economic development.</b></p> <p>In assessing each answer, use the table opposite.</p> <p>Why it might:</p> <ul style="list-style-type: none"> <li>• increase skills / qualifications / knowledge</li> <li>• increase job opportunities</li> <li>• encourage more investments</li> <li>• increase productive capacity</li> <li>• reduce consumption of demerit goods</li> <li>• improved health / life expectancy</li> <li>• higher HDI</li> </ul> |
|------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

2(d)

Why it might not:

- takes a long time to have an impact on the economy
- financial cost of government spending e.g. taxation / borrowing
- opportunity cost e.g. health spending
- reduced benefit to the economy if there is emigration of skilled workers / net migration is negative
- government might spend the money inefficiently
- education programmes may be ineffective.
