2.6.5 Use the distinction

- 只 limits the number of older brothers to one.
- In this frame 只 precedes 有, but its scope is supplied by the predicate and context. 只有他知道 means only he knows; do not turn the common position into a claim that 只 always limits the verb's action alone.

You have one older brother and no other older brothers. Close the examples. Say a Mandarin response, then write it in Chinese. Explain briefly in English what the lesson's pattern adds. Compare with the model, then change one detail and try again.

One possible response: 我只有一个哥哥。

- My response conveys a message that fits the opening situation.
- I can explain the meaning of the pattern, rather than only naming it.
- In this frame 只 precedes 有, but its scope is supplied by the predicate and context.
- 只有他知道 means only he knows; do not turn the common position into a claim that 只 always limits the verb's action alone.

17.1.4 Know the boundary

- This is an existential description.
- 一幅画挂在墙上 is also grammatical and starts with the known painting instead. Do not reject the second order merely because this lesson teaches place-first presentation.

- The repeated 什么 makes the action follow your choice of food.
- Match the repeated question word: 想去哪儿就去哪儿. Freedom remains subject to the real situation; the grammar does not create food that is unavailable or remove rules mentioned elsewhere.
