# Page structure

HTML & CSS Reference · Vocabulary in context

| Word | Example |
| --- | --- |
| **skeleton** /'skelɪtn/ | Every page has the same **skeleton**: html, head and body.<br>html、head body |
| **comment** /'kɒment/ | A **comment** starts with # and the computer ignores it.<br># |
| **nest** /nest/ | **Nest** one tag inside another, like <li> inside <ul>.<br><li><br><ul> |
| **indent** /ˌɪn'dent/ | **Indent** the inner tags so the code is easy to read. |
