Distributions, transformations and spread

SAT · Vocabulary in context

Word	Example
median /ˈmiːdiːən/	Put the values in order before you find the **median**.
frequency /ˈfriːkwənsi/	The **frequency** column counts how often each score appears.
interquartile range /ˌɪntəˈkwɔːtaɪl reɪndʒ/	The **interquartile range** is Q3 − Q1, the spread of the middle half of the data.
standard deviation /ˈstændəd ˌdiːvɪˈeɪʃn/	A larger **standard deviation** means the values are more spread out.
outlier /ˈaʊtlaɪə/	A score of 98 in a class that mostly scored 50–70 is an **outlier**.
