Solutions

2.1

- Onset, character, radiation, timing (associated/alleviating), exacerbating-relieving, severity ✓.

2.2

- Ideas, concerns, expectations ✓.

2.3

- Open elicits the story unled; closed harvests specific features ✓.

3.1

- Agenda: introduce, ask what the patient wants addressed ✓.
- Open: tell me about the discomfort from the start ✓.
- Closed: site and radiation; character; relation to food/stairs; severity change over three weeks ✓.
- Open-before-closed: the frame arrives unled; timing patterns are diagnostic ✓.
- Red-flag screen: in the HPC – pain with sweating or at rest at night would interrupt ✓.

3.2

- Poor: it records a conclusion without the evidence or context ✓.
- Rewrites: evidence in the patient's terms plus functional context ✓.
- Standard sections: complaint, HPC, systems review, past, drugs, family, social, ICE summary ✓.
