Solutions

2.1

- Inspect, palpate, percuss, auscultate ✓.

2.2

- Percussion (and palpation) alters bowel gas and guarding – the less intrusive look-and-feel data come first ✓.

2.3

- It names neither what was examined nor the findings – evidence, not conclusions ✓.

3.1

- Inspection: rate 24, accessory use → MED05 increased work of breathing ✓.
- Palpation: reduced right expansion → asymmetry of ventilation ✓.
- Percussion: dull right base → MED10 fluid replaces air ✓.
- Auscultation last: untouched sounds; comparison against the left separates local from general ✓.

3.2

- From reading: the sequence, the question each step asks, the anatomy-physiology mapping ✓.
- Not from reading: trained perception – volumes, texture, comparison ✓.
- Consequence: sequence first, then supervised practice on the well ✓.
